PUBLISHERS' NOTE

"ROBINSON CRUSOE," wrote Charles Lamb, "is delightful to all ranks and classes. It is capital kitchen reading, and equally worthy for its deep interest to find a place in the libraries of the wealthiest and most learned." Not only is it one of the best boys' books in the world, but in the fundamental humanity of the story—the narrative of the triumph of a human will over almost insuperable obstacles—it has never failed to make a powerful appeal to the most sophisticated readers. Yet of late, despite the multiplication of editions, the taste of the boy has been largely regarded, and few attempts have been made to conceive an embodiment of appropriateness and charm with an appeal for the booklover, for the sophisticated reader. To supply this lack has been the aim of the publishers in planning the present edition. The form that found favor in the volume of "The Familiar Letters of James Howell" has been chosen for Defoe's masterpiece, in the hope that it may prove pleasant to both the eye and the hand; while for embellishment the classical series of designs by Thomas Stothard has been selected—a series which in the opinion of many critics shows a vigor and charm seldom equalled in the field of book illustration.

4 PARK STREET, BOSTON,
SEPTEMBER 16, 1908.

SUBJECTS OF THE PLATES

VOLUME I

PLATE	PAGE
I. <i>Robinson Crusoe taking leave of his father and mother (page 6)</i>	FRONTISPIECE
II. <i>Robinson Crusoe and Xury alarmed at the sight of a lion</i>	38
III. <i>Robinson Crusoe shipwrecked and clinging to a rock</i>	64
IV. <i>Robinson Crusoe upon his raft</i>	80
V. <i>Robinson Crusoe at work in his cave</i>	96
VI. <i>Robinson Crusoe in his island dress</i>	214

VOLUME II

VII. <i>Robinson Crusoe discovers the print of a man's foot (page 2)</i>	FRONTISPIECE
VIII. <i>Robinson Crusoe first sees and rescues his man Friday</i>	72
IX. <i>Robinson Crusoe and Friday making a boat</i>	108

SUBJECTS OF THE PLATES

VOLUME III

PLATE	PAGE
X. <i>Robinson Crusoe's first interview with the Spaniards on his second landing (page 48)</i>	FRONTISPIECE
XI. <i>A view of the plantation of the three Englishmen</i>	102
XII. <i>The two Englishmen retreating with their wives and children</i>	106
XIII. <i>The Spaniards and Englishmen burning the Indians' boats</i>	128
XIV. <i>Robinson Crusoe distributing tools of husbandry among the inhabitants</i>	150
XV. <i>The plantation of the two Englishmen</i>	170

VOLUME IV

XVI. <i>Robinson Crusoe's seamen vowing revenge for the death of their comrade (page 28)</i>	FRONTISPIECE
--	--------------

ROBINSON CRUSOE

ROBINSON CRUSOE

CHAPTER I

I WAS born in the year 1632, in the city of York, of a good family, though not of that country, my father being a foreigner of Bremen, named Kreutznaer, who settled first at Hull. He got a good estate by merchandise, and leaving off his trade, lived afterwards at York, from whence he had married my mother, whose relations were named Robinson, a very good family in that country, and after whom I was so called, that is to say, Robinson Kreutznaer; but, by the usual corruption of words in England, we are now called, nay, we call ourselves, and write our name, Crusoe; and so my companions always called me.

I had two elder brothers, one of whom was lieutenant-colonel to an English regiment of foot in Flanders, formerly commanded by the famous Colonel Lockhart, and was killed at the battle near Dunkirk against the Spaniards. What became of my second brother, I never knew, any more than my father and mother did know what was become of me.

Being the third son of the family, and not bred to any trade, my head began to be filled very early with rambling thoughts. My father, who was very aged, had given me a competent share of learning, as far as house education and a country free school generally go, and designed me for the law; but I would be satisfied with nothing but going to sea; and my inclination to this led me so strongly against the will, nay, the commands of my father, and against all the entreaties and persuasions of my mother and other friends, that there seemed to be something fatal in that propension of nature, tending directly to the life of misery which was to befall me.

My father, a wise and grave man, gave me serious and excellent counsel against what he foresaw was my design. He called me one morning into his chamber, where he was confined by the gout, and expostulated very warmly with me upon this subject: he asked me what reasons, more than a mere wandering inclination, I had for leaving his house, and my native country, where I might be well introduced, and had a prospect of raising my fortune, by application and industry, with a life of ease and pleasure. He told me it was men of desperate fortunes, on one hand, or of superior fortunes, on the other, who went abroad upon adventures, aspiring to rise by enterprise, and make themselves famous in undertakings of a nature out of the common road; that these things were all either too far above me, or too far below me; that mine was the mid-

dle state, or what might be called the upper station of low life, which he had found, by long experience, was the best state in the world, the most suited to human happiness; not exposed to the miseries and hardships, the labour and sufferings, of the mechanic part of mankind, and not embarrassed with the pride, luxury, ambition, and envy of the upper part of mankind: he told me, I might judge of the happiness of this state by one thing, viz. that this was the state of life which all other people envied; that kings have frequently lamented the miserable consequences of being born to great things, and wished they had been placed in the middle of two extremes, between the mean and the great; that the wise man gave his testimony to this as the just standard of true felicity, when he prayed to have “neither poverty nor riches.”

He bademe observe it, and I should always find, that the calamities of life were shared among the upper and lower part of mankind; but that the middle station had the fewest disasters, and was not exposed to so many vicissitudes as the higher or lower part of mankind: nay, they were not subjected to so many distempers and uneasinesses, either of body or mind, as those were, who, by vicious living, luxury, and extravagancies, on one hand, or, by hard labour, want of necessaries, and mean and insufficient diet, on the other hand, bring distempers upon themselves by the natural consequences of their way of living; that the middle station of life was calculated for all kind of virtues, and all

kind of enjoyments; that peace and plenty were the handmaids of a middle fortune; that temperance, moderation, quietness, health, society, all agreeable diversions, and all desirable pleasures were the blessings attending the middle station of life; that this way men went silently and smoothly through the world, and comfortably out of it, not embarrassed with the labours of the hands or of the head, not sold to the life of slavery for daily bread, or harassed with perplexed circumstances, which rob the soul of peace, and the body of rest; not enraged with the passion of envy, or secret burning lust of ambition for great things; but, in easy circumstances, sliding gently through the world, and sensibly tasting the sweets of living, without the bitter; feeling that they are happy, and learning by every day's experience, to know it more sensibly.

After this he pressed me earnestly, and in the most affectionate manner, not to play the young man, nor to precipitate myself into miseries which nature, and the station of life I was born in, seemed to have provided against; that I was under no necessity of seeking my bread; that he would do well for me, and endeavour to enter me fairly into the station of life which he had been just recommending to me; and that if I was not very easy and happy in the world, it must be my mere fate, or fault, that must hinder it; and that he should have nothing to answer for, having thus discharged his duty in warning me against measures which he knew would be to my hurt: in a word, that as he would do very

kind things for me if I would stay and settle at home as he directed; so he would not have so much hand in my misfortunes as to give me any encouragement to go away: and, to close all, he told me I had my elder brother for an example, to whom he had used the same earnest persuasions to keep him from going into the Low Country wars; but could not prevail, his young desires prompting him to run into the army, where he was killed; and though, he said, he would not cease to pray for me, yet he would venture to say to me, that if I did take this foolish step, God would not bless me; and I would have leisure, hereafter, to reflect upon having neglected his counsel, when there might be none to assist in my recovery.

I observed, in this last part of his discourse, which was truly prophetic, though, I suppose, my father did not know it to be so himself; I say, I observed the tears run down his face very plentifully, especially when he spoke of my brother who was killed; and that, when he spoke of my having leisure to repent, and none to assist me, he was so moved, that he broke off the discourse, and told me his heart was so full he could say no more to me.

I was sincerely affected with this discourse; as, indeed, who could be otherwise? and I resolved not to think of going abroad any more, but to settle at home, according to my father's desire. But alas! a few days wore it all off: and, in short, to prevent any of my father's further importunities,

in a few weeks after I resolved to run quite away from him. However, I did not act so hastily, neither, as my first heat of resolution prompted; but I took my mother, at a time when I thought her a little pleasanter than ordinary, and told her that my thoughts were so entirely bent upon seeing the world, that I should never settle to anything with resolution enough to go through with it, and my father had better give me his consent than force me to go without it; that I was now eighteen years old, which was too late to go apprentice to a trade, or clerk to an attorney: that I was sure, if I did, I should never serve out my time, and I should certainly run away from my master before my time was out, and go to sea; and if she would speak to my father to let me make but one voyage abroad, if I came home again, and did not like it, I would go no more; and I would promise by a double diligence, to recover the time I had lost.

This put my mother into a great passion: she told me she knew it would be to no purpose to speak to my father upon any such a subject; that he knew too well what was my interest to give his consent to anything so much for my hurt; and that she wondered how I could think of any such thing, after such a discourse as I had from my father, and such kind and tender expressions as she knew my father had used to me; and that, in short, if I would ruin myself, there was no help for me; but I might depend I should never have their consent to it: that for her part, she would not have so much hand

in my destruction ; and I should never have it to say, that my mother was willing when my father was not.

Though my mother refused to move it to my father, yet, as I have heard afterwards, she reported all the discourse to him ; and that my father, after showing a great concern at it, said to her with a sigh, “ That boy might be happy if he would stay at home ; but if he goes abroad, he will be the most miserable wretch that ever was born : I can give no consent to it.”

It was not till almost a year after this that I broke loose ; though in the mean time I continued obstinately deaf to all proposals of settling to business, and frequently expostulating with my father and mother about their being so positively determined against what they knew my inclinations prompted me to. But being one day at Hull, whither I went casually, and without any purpose of making an elopement at that time, and one of my companions then going to London by sea in his father’s ship, and prompting me to go with them by the common allurements of seafaring men, viz. that it should cost me nothing for my passage, I consulted neither father nor mother any more, nor so much as sent them word of it ; but left them to hear of it as they might, without asking God’s blessing, or my father’s, without any consideration of circumstances or consequences, and in an ill hour, God knows.

CHAPTER II

ON the 1st September, 1651, I went on board a ship bound for London. Never any young adventurer's misfortunes, I believe, began younger, or continued longer, than mine. The ship had no sooner got out of the Humber, than the wind began to blow, and the waves to rise, in a most frightful manner; and as I had never been at sea before, I was most inexpressibly sick in body, and terrified in mind. I began now seriously to reflect upon what I had done, and how justly I was overtaken by the judgment of Heaven, for wickedly leaving my father's house. All the good counsels of my parents, my father's tears, and my mother's entreaties, came now fresh into my mind; and my conscience, which was not yet come to the pitch of hardness to which it has been since, reproached me with the contempt of advice, and the abandonment of my duty.

All this while the storm increased, and the sea, which I had never been upon before, went very high, though nothing like what I have seen many

times since; no, nor what I saw a few days after; but, such as it was, enough to affect me then, who was but a young sailor, and had never known anything of the matter. I expected every wave would have swallowed us up, and that every time the ship fell down, as I thought, in the trough or hollow of the sea, we should never rise more; and in this agony of mind I made many vows and resolutions, that if it would please God to spare my life this voyage, if ever I got my foot once on dry land, I would go directly home to my father, and never set it into a ship again while I lived; that I would take his advice, and never run myself into such miseries as these any more. Now I saw plainly the goodness of his observations about the middle station of life; how easy, how comfortable, he had lived all his days, and never had been exposed to tempests at sea or troubles on shore; and I resolved that I would, like a true repenting prodigal, go home to my father.

These wise and sober thoughts continued during the storm, and indeed some time after; but the next day, as the wind was abated, and the sea calmer, I began to be a little inured to it. However, I was very grave that day, being also a little sea-sick still: but towards night the weather cleared up, the wind was quite over, and a charming fine evening followed; the sun went down perfectly clear, and rose so the next morning; and having little or no wind, and a smooth sea, the

sun shining upon it, the sight was, as I thought, the most delightful that I ever saw.

I had slept well in the night, and was now no more sea-sick, but very cheerful, looking with wonder upon the sea that was so rough and terrible the day before, and could be so calm and pleasant in a little time after.

And now lest my good resolutions should continue, my companion, who had indeed enticed me away, came to me, and said, "Well, Bob," clapping me on the shoulder, "how do you do after it? I warrant you you were frightened, wa'n't you, last night, when it blew but a cap-full of wind?" — "A cap-full, do you call it?" said I; "'t was a terrible storm." — "A storm, you fool!" replies he, "do you call that a storm? Why, it was nothing at all; give us but a good ship, and sea-room, and we think nothing of such a squall of wind as that: you are but a fresh-water sailor, Bob; come, let us make a bowl of punch, and we'll forget all that. D' ye see what charming weather 't is now?" To make short this sad part of my story, we went the way of all sailors; the punch was made, and I was made drunk with it; and in that one night's wickedness I drowned all my repentance, all my reflections upon my past conduct, and all my resolutions for the future. In a word, as the sea was returned to its smoothness of surface and settled calmness by the abatement of the storm, so the hurry of my thoughts being over, my fears and apprehensions of being swallowed up by the sea

forgotten, and the current of my former desires returned, I entirely forgot the vows and promises I had made in my distress. I found, indeed, some intervals of reflection; and serious thoughts did, as it were, endeavour to return again sometimes; but I shook them off and roused myself from them, as it were from a distemper, and, applying myself to drink and company, soon mastered the return of those fits — for so I called them; and I had in five or six days got as complete a victory over conscience as any young sinner, that resolved not to be troubled with it, could desire. But I was to have another trial for it still; and Providence, as in such cases generally it does, resolved to leave me entirely without excuse: for if I would not take this for a deliverance, the next was to be such a one as the worst and most hardened wretch among us would confess both the danger and the mercy of. The sixth day of our being at sea we came into Yarmouth Roads; the wind having been contrary and the weather calm, we had made but little way since the storm. Here we were obliged to come to an anchor, and here we lay, the wind continuing contrary, viz. at south-west, for seven or eight days, during which time a great many ships from Newcastle came into the same roads, as the common harbour where the ships might wait for a wind for the river Thames. We had not, however, rid here so long, but we should have tided up the river, but that the wind blew too fresh; and, after we had lain four or five days, blew very

hard. However, the roads being reckoned as good as a harbour, the anchorage good, and our ground tackle very strong, our men were unconcerned and not in the least apprehensive of danger, but spent the time in rest and mirth, after the manner of the sea. But the eighth day, in the morning, the wind increased, and we had all hands at work to strike our topmasts and make everything snug and close, that the ship might ride as easy as possible. By noon the sea went very high indeed, and our ship rode forecastle in, shipped several seas, and we thought, once or twice, our anchor had come home; upon which our master ordered out the sheet anchor; so that we rode with two anchors ahead, and the cables veered out to the better end.

By this time it blew a terrible storm indeed; and now I began to see terror and amazement in the faces of even the seamen themselves. The master was vigilant in the business of preserving the ship; but, as he went in and out of his cabin by me, I could hear him softly say to himself several times, "Lord, be merciful to us! we shall be all lost; we shall be all undone!" and the like. During these first hurries I was stupid, lying still in my cabin, which was in the steerage, and cannot describe my temper. I could ill reassume the first penitence, which I had so apparently trampled upon, and hardened myself against; I thought that the bitterness of death had been past, and that this would be nothing too, like the first: but when the master himself came by me, as I said just now, and said we should

be all lost, I was dreadfully frightened. I got up out of my cabin, and looked out; but such a dismal sight I never saw; the sea went mountains high, and broke upon us every three or four minutes. When I could look about, I could see nothing but distress around us; two ships that rid near us, we found had cut their masts by the board, being deeply laden; and our men cried out that a ship which rid about a mile ahead of us was foundered. Two more ships, being driven from their anchors, were run out of the roads to sea, at all adventures, and that with not a mast standing. The light ships fared the best, as not so much labouring in the sea; but two or three of them drove, and came close by us, running away, with only their spritsails out, before the wind. Toward evening, the mate and boatswain begged the master of our ship to let them cut away the foremast, which he was very loath to do; but the boatswain protesting to him, that if he did not, the ship would founder, he consented; and when they had cut away the foremast, the mainmast stood so loose, and shook the ship so much, they were obliged to cut it away also, and make a clear deck.

Any one may judge what a condition I must be in at all this, who was but a young sailor, and who had been in such a fright before at but a little. But if I can express, at this distance, the thoughts I had about me at that time, I was in tenfold more horror of mind upon account of my former convictions, and the having returned from them to the

resolutions I had wickedly taken at first, than I was at death itself; and these, added to the terror of the storm, put me into such a condition, that I can by no words describe it; but the worst was not come yet; the storm continued with such fury, that the seamen themselves acknowledged they had never known a worse. We had a good ship, but she was deep laden, and so wallowed in the sea, that the seamen every now and then cried out she would founder. It was my advantage, in one respect, that I did not know what they meant by *founder*, till I inquired. However, the storm was so violent that I saw what is not often seen, the master, the boat-swain, and some others, more sensible than the rest, at their prayers, and expecting every moment the ship would go to the bottom. In the middle of the night, and under all the rest of our distresses, one of the men, that had been down on purpose to see, cried out, we had sprung a leak; another said there was four feet water in the hold. Then all hands were called to the pump. At that very word my heart, as I thought, died within me, and I fell backwards upon the side of my bed, where I sat in the cabin. However, the men roused me, and told me that I, who was able to do nothing before, was as well able to pump as another: at which I stirred up and went to the pump, and worked very heartily. While this was doing, the master seeing some light colliers, who, not able to ride out the storm, were obliged to slip and run away to sea, and would not come near us, ordered us to fire a gun as a signal

of distress. I, who knew nothing what that meant, was so surprised, that I thought the ship had broke, or some dreadful thing had happened. In a word, I was so surprised that I fell down in a swoon. As this was a time when everybody had his own life to think of, no one minded me, or what was become of me: but another man stepped up to the pump, and thrusting me aside with his foot, let me lie, thinking I had been dead; and it was a great while before I came to myself.

We worked on; but the water increasing in the hold, it was apparent that the ship would founde; and though the storm began to abate a little, yet as it was not possible she could swim till we might run into a port, so the master continued firing guns for help; and a light ship, who had rid it out just ahead of us, ventured a boat out to help us. It was with the utmost hazard the boat came near us, but it was impossible for us to get on board, or for the boat to lie near the ship's side; till at last the men rowing very heartily, and venturing their lives to save ours, our men cast them a rope over the stern with a buoy to it, and then veered it out a great length, which they, after great labour and hazard, took hold of, and we hauled them close under our stern, and got all into their boat. It was to no purpose for them or us, after we were in the boat, to think of reaching their own ship; so all agreed to let her drive, and only to pull her in towards shore as much as we could: and our master promised them, that if the boat was staved upon shore, he would make

it good to their master ; so partly rowing, and partly driving, our boat went away to the northward, sloping towards the shore almost as far as Winterton-Ness.

We were not much more than a quarter of an hour out of our ship when we saw her sink ; and then I understood, for the first time, what was meant by a ship foundering in the sea. I must acknowledge, I had hardly eyes to look up when the seamen told me she was sinking ; for, from that moment, they rather put me into the boat, than that I might be said to go in. My heart was, as it were, dead within me, partly with fright, partly with horror of mind, and the thoughts of what was yet before me.

While we were in this condition, the men yet labouring at the oar to bring the boat near the shore, we could see (when, our boat mounting the waves, we were able to see the shore) a great many people running along the strand, to assist us when we should come near ; but we made slow way towards the shore ; nor were we able to reach it, till, being past the light-house at Winterton, the shore falls off to the westward, towards Cromer, and so the land broke off a little the violence of the wind. Here we got in, and, though not without much difficulty, got all safe on shore, and walked afterwards on foot to Yarmouth ; where, as unfortunate men, we were used with great humanity, as well by the magistrates of the town, who assigned us good quarters, as by the particular merchants and owners of

ships ; and had money given us sufficient to carry us either to London or back to Hull, as we thought fit.

Had I now had the sense to have gone back to Hull, and have gone home, I had been happy : and my father, an emblem of our blessed Saviour's parable, had even killed the fatted calf for me ; for, hearing the ship I went in was cast away in Yarmouth Roads, it was a great while before he had any assurance that I was not drowned.

But my ill fate pushed me on with an obstinacy that nothing could resist ; and though I had several times loud calls from my reason and my more composed judgment, to go home, yet I had no power to do it. — I know not what to call this, nor will I urge that it is a secret, overruling decree, that hurries us on to be the instruments of our own destruction, even though it be before us, and that we rush upon it with our eyes open. Certainly, nothing but some such decreed unavoidable misery attending, and which it was impossible for me to escape, could have pushed me forward against the calm reasonings and persuasions of my most retired thoughts, and against two such visible instructions as I had met with in my first attempt.

My comrade, who had helped to harden me before, and who was the master's son, was now less forward than I : the first time he spoke to me after we were at Yarmouth, which was not till two or three days, for we were separated in the town to several quarters ; I say, the first time he saw me,

it appeared his tone was altered, and, looking very melancholy, and shaking his head, he asked me how I did ; telling his father who I was, and how I had come this voyage only for a trial, in order to go farther abroad. His father, turning to me with a grave and concerned tone, "Young man," says he, "you ought never to go to sea any more ; you ought to take this for a plain and visible token, that you are not to be a seafaring man."—"Why, sir?" said I ; "will you go to sea no more?"—"That is another case," said he ; "it is my calling, and therefore my duty ; but as you made this voyage for a trial, you see what a taste Heaven has given you of what you are to expect if you persist. Perhaps this has all befallen us on your account, like Jonah in the ship of Tarshish."—"Pray," continues he, "what are you, and on what account did you go to sea?" Upon that I told him some of my story ; at the end of which he burst out with a strange kind of passion. "What had I done," said he, "that such an unhappy wretch should come into my ship ? I would not set my foot in the same ship with thee again for a thousand pounds." This indeed was, as I said, an excursion of his spirits, which were yet agitated by the sense of his loss, and was farther than he could have authority to go. — However, he afterwards talked very gravely to me ; exhorted me to go back to my father, and not tempt Providence to my ruin ; told me, I might see a visible hand of Heaven against me ; and, "young man," said he, "depend upon it, if you do

not go back, wherever you go, you will meet with nothing but disasters and disappointments, till your father's words are fulfilled upon you."

We parted soon after, for I made him little answer, and I saw him no more ; which way he went, I know not : as for me, having some money in my pocket, I travelled to London by land ; and there, as well as on the road, had many struggles with myself what course of life I should take, and whether I should go home or go to sea. As to going home, shame opposed the best motions that offered to my thoughts ; and it immediately occurred to me how I should be laughed at among the neighbours, and should be ashamed to see, not my father and mother only, but even everybody else. From whence I have often since observed how incongruous and irrational the common temper of mankind is, especially of youth, to that reason which ought to guide them in such cases, viz. that they are not ashamed to sin, and yet are ashamed to repent, not ashamed of the action, for which they ought justly to be esteemed fools ; but are ashamed of the returning, which only can make them be esteemed wise men.

In this state of life, however, I remained some time, uncertain what measures to take, and what course of life to lead. An irresistible reluctance continued to going home ; and as I stayed awhile, the remembrance of the distress I had been in wore off ; and as that abated, the little motion I had in my desires to a return wore off with it, till at last I

quite laid aside the thoughts of it, and looked out for a voyage. That evil influence which carried me first away from my father's house, that hurried me into the wild and indigested notion of raising my fortune, and that impressed those conceits so forcibly upon me as to make me deaf to all good advice, and to the entreaties and even the commands of my father ; I say, the same influence, whatever it was, presented the most unfortunate of all enterprises to my view ; and I went on board a vessel bound to the coast of Africa, or, as our sailors vulgarly call it, a voyage to Guinea.

It was my great misfortune, that in all these adventures I did not ship myself as a sailor ; whereby, though I might indeed have worked a little harder than ordinary, yet, at the same time, I had learned the duty and office of a foremast-man, and in time might have qualified myself for a mate or lieutenant, if not a master : but as it was always my fate to choose for the worse, so I did here ; for having money in my pocket, and good clothes upon my back, I would always go on board in the habit of a gentleman ; and so I neither had any business in the ship, nor learned to do any. It was my lot, first of all, to fall into pretty good company in London ; which does not always happen to such loose and misguided young fellows as I then was : the devil, generally, not omitting to lay some snare for them very early. But it was not so with me : I first fell acquainted with the master of a ship, who had been on the coast of Guinea, and who, having

had very good success there, was resolved to go again. He, taking a fancy to my conversation, which was not at all disagreeable at that time, and hearing me say I had a mind to see the world, told me that, if I would go the voyage with him, I should be at no expense; I should be his messmate and his companion; and if I could carry anything with me, I should have all the advantage of it that the trade would admit; and perhaps I might meet with some encouragement. I embraced the offer, and entering into a strict friendship with this captain, who was an honest and plain-dealing man, I went the voyage with him, and carried a small adventure with me; which, by the disinterested honesty of my friend the captain, I increased very considerably; for I carried about forty pounds in such toys and trifles as the captain directed me to buy. This forty pounds I had mustered together by the assistance of some of my relations whom I corresponded with; and who, I believe, got my father, or, at least, my mother, to contribute so much as that to my first adventure. This was the only voyage which I may say was successful in all my adventures, and which I owe to the integrity and honesty of my friend the captain; under whom also I got a competent knowledge of mathematics and the rules of navigation, learned how to keep an account of the ship's course, take an observation, and, in short, to understand some things that were needful to be understood by a sailor; for, as he took delight to instruct me, I took delight to learn; and, in a word,

this voyage made me both a sailor and a merchant: for I brought home five pounds nine ounces of gold dust for my adventure, which yielded me in London, at my return, almost three hundred pounds, and this filled me with those aspiring thoughts which have since so completed my ruin. Yet even in this voyage I had my misfortunes too; particularly, that I was continually sick, being thrown into a violent calenture by the excessive heat of the climate; our principal trading being upon the coast, from the latitude of fifteen degrees north even to the Line itself.

CHAPTER III

I WAS now set up for a Guinea trader ; and my friend, to my great misfortune, dying soon after his arrival, I resolved to go the same voyage again ; and I embarked in the same vessel with one who was his mate in the former voyage, and had now got the command of the ship. This was the unhappiest voyage that ever man made ; for though I did not carry quite a hundred pounds of my new-gained wealth, so that I had two hundred pounds left, and which I lodged with my friend's widow, who was very just to me, yet I fell into terrible misfortunes in this voyage ; and the first was this, viz. — our ship, making her course towards the Canary Islands, or rather between those islands and the African shore, was surprised, in the gray of the morning, by a Turkish rover, of Sallee, who gave chase to us with all the sail she could make. We crowded also as much canvas as our yards would spread, or our masts carry, to get clear ; but finding the pirate gained upon us, and would certainly come up with us in a few hours,

we prepared to fight, our ship having twelve guns and the rover eighteen. About three in the afternoon he came up with us; and bringing to, by mistake, just athwart our quarter, instead of athwart our stern, as he intended, we brought eight of our guns to bear on that side, and poured in a broadside upon him, which made him sheer off again, after returning our fire, and pouring in also his small shot from near two hundred men which he had on board. However, we had not a man touched, all our men keeping close. He prepared to attack us again, and we to defend ourselves; but laying us on board the next time upon our other quarter, he entered sixty men upon our decks, who immediately fell to cutting and hacking the sails and rigging. We plied them with small shot, half-pikes, powder-chests, and such like, and cleared our deck of them twice. However, to cut short this melancholy part of our story, our ship being disabled, and three of our men killed and eight wounded, we were obliged to yield, and were carried all prisoners into Sallee, a port belonging to the Moors.

The usage I had there was not so dreadful as at first I apprehended: nor was I carried up the country to the emperor's court, as the rest of our men were, but was kept by the captain of the rover as his proper prize, and made his slave, being young and nimble, and fit for his business. At this surprising change of my circumstances, from a merchant to a miserable slave, I was perfectly

overwhelmed ; and now looked back upon my father's prophetic discourse to me, that I should be miserable and have none to relieve me ; which I thought was now so effectually brought to pass, that it could not be worse ; that now the hand of Heaven had overtaken me, and I was undone, without redemption. But, alas ! this was but a taste of the misery I was to go through, as will appear in the sequel of this story.

As my new patron, or master, had taken me home to his house, so I was in hopes he would take me with him when he went to sea again, believing that it would, some time or other, be his fate to be taken by a Spanish or Portuguese man of war, and that then I should be set at liberty. But this hope of mine was soon taken away, for when he went to sea he left me on shore to look after his little garden, and do the common drudgery of slaves about his house ; and when he came home again from his cruise, he ordered me to lie in the cabin, to look after the ship.

Here I meditated nothing but my escape, and what method I might take to effect it, but found no way that had the least probability in it. Nothing presented to make the supposition of it rational ; for I had nobody to communicate it to that would embark with me ; no fellow-slave, no Englishman, Irishman, or Scotchman there but myself ; so that for two years, though I often pleased myself with the imagination, yet I never had the least encouraging prospect of putting it in practice.

After about two years, an odd circumstance presented itself, which put the old thought of making some attempt for my liberty again in my head. My patron lying at home longer than usual, without fitting out his ship, which, as I heard, was for want of money, he used constantly, once or twice a week, sometimes oftener, if the weather was fair, to take the ship's pinnacle and go out into the road a fishing; and as he always took me and a young Moresco with him to row the boat, we made him very merry, and I proved very dexterous in catching fish, insomuch that sometimes he would send me with a Moor, one of his kinsmen, and the youth, the Moresco, as they called him, to catch a dish of fish for him.

It happened one time, that going a fishing in a stark calm morning, a fog rose so thick, that though we were not half a league from the shore, we lost sight of it; and rowing we knew not whither, or which way, we laboured all day and all the next night, and when the morning came, we found we had pulled off to sea, instead of pulling in for the shore, and that we were at least two leagues from the shore: however, we got well in again, though with a great deal of labour, and some danger, for the wind began to blow pretty fresh in the morning; but particularly we were all very hungry.

But our patron, warned by this disaster, resolved to take more care of himself for the future; and having lying by him the longboat of our English ship he had taken, he resolved he would not go a

fishing any more without a compass and some provision; so he ordered the carpenter of the ship, who was an English slave, to build a little state-room or cabin in the middle of the longboat, like that of a barge, with a place to stand behind it, to steer and haul home the main sheet, and room before for a hand or two to stand and work the sails. She sailed with what we called a shoulder-of-mutton sail, and the boom jibbed over the top of the cabin, which lay very snug and low, and had in it room for him to lie, with a slave or two, and a table to eat on, with some small lockers to put in some bottles of such liquor as he thought fit to drink, and particularly his bread, rice, and coffee.

We went frequently out with this boat a fishing, and as I was most dexterous to catch fish for him, he never went without me. It happened that he had appointed to go out in this boat, either for pleasure or for fish, with two or three Moors of some distinction in that place, and for whom he had provided extraordinarily, and had therefore sent on board the boat, overnight, a larger store of provisions than ordinary, and had ordered me to get ready three fusees, with powder and shot, which were on board his ship, for that they designed some sport of fowling as well as fishing.

I got all things ready as he directed, and waited the next morning with the boat washed clean, her ensign and pendants out, and everything to accommodate his guests: when, by and by, my patron came on board alone, and told me his guests had

put off going, upon some business that fell out, and ordered me with a man and boy, as usual, to go out with the boat and catch them some fish, for that his friends were to sup at his house ; and commanded, that as soon as I had got some fish, I should bring it home to his house : all which I prepared to do.

This moment my former notions of deliverance darted into my thoughts, for now I found I was like to have a little ship at my command ; and my master being gone, I prepared to furnish myself, not for a fishing business, but for a voyage ; though I knew not, neither did I so much as consider, whither I should steer ; for any where, to get out of that place, was my way.

My first contrivance was to make a pretence to speak to this Moor, to get something for our subsistence on board ; for I told him we must not presume to eat of our patron's bread : he said that was true ; so he brought a large basket of rusk or biscuit, of their kind, and three jars with fresh water, into the boat. I knew where my patron's case of bottles stood, which it was evident, by the make, were taken out of some English prize, and I conveyed them into the boat while the Moor was on shore, as if they had been there before for our master. I conveyed also a great lump of bees-wax into the boat, which weighed above half a hundred-weight, with a parcel of twine or thread, a hatchet, a saw, and a hammer, all which were of great use to us afterwards, especially the wax, to make can-

dles. Another trick I tried upon him, which he innocently came into also: his name was Ismael, whom they called Muley, or Moley: so I called to him: "Moley," said I, "our patron's guns are on board the boat; can you not get a little powder and shot? it may be we may kill some alcamies" (fowls like our curlews) "for ourselves, for I know he keeps the gunner's stores in the ship." — "Yes," says he, "I will bring some"; and accordingly he brought a great leather pouch, which held about a pound and a half of powder, or rather more, and another with shot, that had five or six pounds, with some bullets, and put all into the boat: at the same time I found some powder of my master's in the great cabin, with which I filled one of the large bottles in the case, which was almost empty, pouring what was in it into another; and thus furnished with every thing needful, we sailed out of the port to fish. The castle, which is at the entrance of the port, knew who we were, and took no notice of us; and we were not above a mile out of the port, before we hauled in our sail and set us down to fish. The wind blew from NN.E., which was contrary to my desire; for, had it blown southerly, I had been sure to have made the coast of Spain, and at last reached to the bay of Cadiz; but my resolutions were, blow which way it would, I would be gone from the horrid place where I was, and leave the rest to fate.

After we had fished some time and caught nothing, for when I had fish on my hook I would

not pull them up, that he might not see them, I said to the Moor, "This will not do; our master will not be thus served; we must stand farther off." He, thinking no harm, agreed; and being at the head of the boat, set the sails; and as I had the helm, I run the boat near a league farther, and then brought to, as if I would fish. Then giving the boy the helm, I stepped forward to where the Moor was, and I took him by surprise, with my arm under his waist, and tossed him clear overboard into the sea. He rose immediately, for he swam like a cork, and called to me, begged to be taken in, and told me he would go all the world over with me. He swam so strong after the boat, that he would have reached me very quickly, there being but little wind; upon which I stepped into the cabin, and fetching one of the fowling-pieces, I presented it at him, and told him, I had done him no hurt, and if he would be quiet, I would do him none; "But," said I, "you swim well enough to reach the shore, and the sea is calm; make the best of your way to shore, and I will do you no harm; but if you come near the boat, I will shoot you through the head; for I am resolved to have my liberty." So he turned himself about, and swam for the shore; and I make no doubt but he reached it with ease, for he was an excellent swimmer.

I could have been content to have taken this Moor with me and have drowned the boy, but there was no venturing to trust him. When he was gone I turned to the boy, whom they called

Xury, and said to him, "Xury, if you will be faithful to me I will make you a great man; but if you will not stroke your face to be true to me" (that is, swear by Mahomet and his father's beard), "I must throw you into the sea too." The boy smiled in my face, and spoke so innocently that I could not mistrust him; and swore to be faithful to me, and go all over the world with me.

While I was in view of the Moor that was swimming, I stood out directly to sea with the boat, rather stretching to windward, that they might think me gone towards the Strait's mouth (as indeed any one that had been in their wits must have been supposed to do); for who would have supposed we were sailing on to the southward, to the truly Barbarian coast, where whole nations of negroes were sure to surround us with their canoes, and destroy us; where we could never once go on shore but we should be devoured by savage beasts, or more merciless savages of human kind?

But as soon as it grew dusk in the evening, I changed my course, and steered directly south and by east, bending my course a little towards the east, that I might keep in with the shore; and having a fair fresh gale of wind and a smooth quiet sea, I made such sail, that I believe by the next day, at three o'clock in the afternoon, when I made the land, I could not be less than one hundred and fifty miles south of Sallee, quite beyond the Emperor of Morocco's dominions, or

indeed of any other king thereabout ; for we saw no people.

Yet such was the fright I had taken at the Moors, and the dreadful apprehensions I had of falling into their hands, that I would not stop, or go on shore, or come to an anchor, the wind continuing fair, till I had sailed in that manner five days ; and then the wind shifting to the southward, I concluded also that if any of our vessels were in chase of me, they also would now give over : so I ventured to make to the coast, and came to an anchor in the mouth of a little river ; I knew not what or where, neither what latitude, what country, what nation, or what river. I neither saw, nor desired to see, any people ; the principal thing I wanted was fresh water. We came into this creek in the evening, resolving to swim on shore as soon as it was dark, and discover the country : but as soon as it was quite dark, we heard such dreadful noises of the barking, roaring, and howling of wild creatures, of we knew not what kinds, that the poor boy was ready to die with fear, and begged of me not to go on shore till day. “ Well, Xury,” said I, “ then I will not ; but it may be, we may see men by day, who will be as bad to us as those lions.” — “ Then we may give them the shoot-gun,” says Xury, laughing ; “ make them run away.” Such English Xury spoke by conversing among us slaves. However, I was glad to see the boy so cheerful, and I gave him a dram out of our patron’s case of bottles to cheer him

up. After all, Xury's advice was good, and I took it. We dropped our little anchor, and lay still all night: I say still, for we slept none; for in two or three hours we saw vast creatures (we knew not what to call them), of many sorts, come down to the sea-shore, and run into the water, wallowing and washing themselves, for the pleasure of cooling themselves, and they made such hideous howlings and yellings, that I never indeed heard the like.

Xury was dreadfully frightened, and indeed so was I too; but we were both more frightened when we heard one of these mighty creatures swimming towards our boat: we could not see him, but we might hear him, by his blowing, to be a monstrous, huge and furious beast. Xury said it was a lion, and it might be so, for aught I know; but poor Xury cried to me to weigh the anchor and row away. "No," says I, "Xury; we can slip our cable with a buoy to it, and go off to sea: they cannot follow us far." I had no sooner said so, but I perceived the creature (whatever it was) within two oars' length, which something surprised me; however, I immediately stepped to the cabin door, and taking up my gun, fired at him; upon which he immediately turned about, and swam to the shore again.

But it is impossible to describe the horrible noises and hideous cries and howlings that were raised, as well upon the edge of the shore as higher within the country, upon the noise or report of

the gun ; a thing, I believe, those creatures had never heard before. This convinced me there was no going on shore for us in the night upon that coast : and how to venture on shore in the day was another question too ; for to have fallen into the hands of any of the savages had been as bad as to have fallen into the paws of lions and tigers ; at least, we were equally apprehensive of the danger of it.

Be that as it would, we were obliged to go on shore somewhere or other for water, for we had not a pint left in the boat : when and where to get it was the point. Xury said, if I would let him go on shore with one of the jars, he would find if there was any water, and bring some to me. I asked him why he would go ; why I should not go, and he stay in the boat. The boy answered with so much affection, that he made me love him ever after. Says he, " If wild mans come, they eat me, you go away." — " Well, Xury," said I, " we will both go ; and if the wild mans come, we will kill them ; they shall eat neither of us." So I gave Xury a piece of rusk bread to eat, and a dram out of our patron's case of bottles, which I mentioned before ; and we hauled in the boat as near the shore as we thought was proper, and so waded to shore, carrying nothing but our arms, and two jars for water.

I did not care to go out of sight of the boat, fearing the coming of canoes with savages down the river ; but the boy, seeing a low place about

a mile up the country, rambled to it ; and, by and by, I saw him come running towards me. I thought he was pursued by some savage, or frightened by some wild beast, and I therefore ran forwards to help him ; but when I came nearer to him, I saw something hanging over his shoulders, which was a creature that he had shot, like a hare, but different in colour, and longer legs ; however, we were very glad of it, and it was very good meat : but the great joy that poor Xury came with, was to tell me he had found good water, and seen no wild mans.

But we found afterwards that we need not take such pains for water ; for a little higher up the creek where we were, we found the water fresh when the tide was out, which flowed but a little way up ; so we filled our jars, and having a fire, feasted on the hare we had killed ; and prepared to go on our way, having seen no footsteps of any human creature in that part of the country.

As I had been one voyage to this coast before, I knew very well that the islands of the Canaries, and the Cape de Verd Islands also, lay not far from the coast. But as I had no instruments to take an observation, to find what latitude we were in, and did not exactly know, or at least remember, what latitude they were in, I knew not where to look for them, or when to stand off to sea towards them, otherwise I might now have easily found some of these islands. But my hope was, that if I stood along this coast till I came to the part where the

English traded, I should find some of their vessels upon their usual design of trade, that would relieve and take us in.

By the best of my calculation, the place where I now was must be that country which, lying between the Emperor of Morocco's dominions and the Negroes, lies waste, and uninhabited except by wild beasts ; the Negroes having abandoned it, and gone farther south, for fear of the Moors, and the Moors not thinking it worth inhabiting, by reason of its barrenness ; and, indeed, both forsaking it because of the prodigious number of tigers, lions, leopards, and other furious creatures which harbour there, so that the Moors use it for their hunting only, where they go like an army, two or three thousand men at a time : and, indeed, for near a hundred miles together upon this coast, we saw nothing but a waste, uninhabited country by day, and heard nothing but howlings and roaring of wild beasts by night.

Once or twice, in the day-time, I thought I saw the Pico of Teneriffe, being the top of the mountain Teneriffe, in the Canaries, and had a great mind to venture out, in hopes of reaching thither ; but having tried twice, I was forced in again by contrary winds ; the sea also going too high for my little vessel ; so I resolved to pursue my first design, and keep along the shore.

Several times I was obliged to land for fresh water, after we had left this place ; and once, in particular, being early in the morning, we came to

an anchor under a little point of land which was pretty high ; and the tide beginning to flow, we lay still, to go farther in. Xury, whose eyes were more about him than, it seems, mine were, calls softly to me, and tells me, that we had best go farther off the shore ; for, says he, “ Look, yonder lies a dreadful monster on the side of that hillock, fast asleep.” I looked where he pointed, and saw a dreadful monster indeed, for it was a terrible great lion, that lay on the side of the shore, under the shade of a piece of the hill, that hung, as it were, over him. “ Xury,” says I, “ you shall go on shore and kill him.” Xury looked frightened, and said, “ Me kill ! he eat me at one mouth ” ; one mouthful he meant. However, I said no more to the boy, but bade him be still ; and I took our biggest gun, which was almost musket-bore, and loaded it with a good charge of powder, and with two slugs, and laid it down ; then I loaded another gun with two bullets : and a third, for we had three pieces, I loaded with five smaller bullets. I took the best aim I could with the first piece, to have shot him in the head ; but he lay so, with his leg raised a little above his nose, that the slugs hit his leg about the knee, and broke the bone : he started up, growling at first, but finding his leg broke, fell down again, and then got up upon three legs, and gave the most hideous roar that ever I heard. I was a little surprised that I had not hit him on the head ; however, I took up the second piece immediately, and though he began to

move off, fired again, and shot him in the head, and had the pleasure to see him drop, and make but little noise, but lie struggling for life. Then Xury took heart, and would have me let him go on shore. "Well, go," said I; so the boy jumped into the water, and taking a little gun in one hand, swam to shore with the other hand, and coming close to the creature, put the muzzle of the piece to his ear, and shot him in the head again, which despatched him quite.

This was game, indeed, to us, but it was no food; and I was very sorry to lose three charges of powder and shot upon a creature that was good for nothing to us. However, Xury said he would have some of him; so he comes on board, and asked me to give him the hatchet: "For what, Xury?" said I.—"Me cut off his head," said he. However, Xury could not cut off his head; but he cut off a foot, and brought it with him, and it was a monstrous great one. I bethought myself, however, that perhaps the skin of him might, one way or other, be of some value to us; and I resolved to take off his skin, if I could. So Xury and I went to work with him: but Xury was much the better workman at it, for I knew very ill how to do it. Indeed, it took us both up the whole day; but at last we got off the hide of him, and spreading it on the top of our cabin, the sun effectually dried it in two days' time, and it afterwards served me to lie upon.

After this stop we made on to the southward continually, for ten or twelve days, living very spar-

PLATE II

ingly on our provisions, which began to abate very much, and going no oftener into the shore than we were obliged to for fresh water. My design in this, was to make the river Gambia, or Senegal: that is to say, anywhere about the Cape de Verd, where I was in hopes to meet with some European ship; and if I did not, I knew not what course I had to take, but to seek for the islands or perish among the Negroes. I knew that all the ships from Europe, which sailed either to the coast of Guinea, or to Brazil, or to the East Indies, made this Cape, or those islands: and in a word I put the whole of my fortune upon this single point, either that I must meet with some ship or must perish.

When I had pursued this resolution about ten days longer, as I have said, I began to see that the land was inhabited; and in two or three places, as we sailed by, we saw people stand upon the shore to look at us: we could also perceive they were quite black and stark naked. I was once inclined to have gone on shore to them; but Xury was my better counsellor, and said to me, "No go, no go." However, I hauled in nearer the shore, that I might talk to them; and I found they ran along the shore by me a good way. I observed they had no weapons in their hands, except one, who had a long slender stick, which Xury said was a lance, and that they would throw them a great way with good aim; so I kept at a distance, but talked to them by signs, as well as I could, and particularly made signs for something to eat. They beckoned to

me to stop my boat, and they would fetch me some meat: upon this I lowered the top of my sail, and lay by, and two of them ran up into the country; and in less than half an hour came back, and brought with them two pieces of dry flesh and some corn, such as the produce of their country; but we neither knew what the one or the other was; however, we were willing to accept it. But how to come at it was our next dispute, for I was not for venturing on shore to them, and they were as much afraid of us: but they took a safe way for us all, for they brought it to the shore, and laid it down, and went and stood a great way off till we fetched it on board, and then came close to us again.

We made signs of thanks to them, for we had nothing to make them amends; but an opportunity offered that very instant to oblige them wonderfully; for while we were lying by the shore, came two mighty creatures, one pursuing the other (as we took it) with great fury, from the mountains towards the sea; whether it was the male pursuing the female, or whether they were in sport or in rage, we could not tell, any more than we could tell whether it was usual or strange; but I believe it was the latter, because, in the first place, those ravenous creatures seldom appear but in the night; and, in the second place, we found the people terribly frightened, especially the women. The man that had the lance, or dart, did not fly from them, but the rest did; however, as the two creatures ran directly into the water, they did not seem to offer

to fall upon any of the Negroes, but plunged themselves into the sea, and swam about, as if they had come for their diversion; at last one of them began to come nearer our boat than I at first expected; but I lay ready for him, for I had loaded my gun with all possible expedition, and bade Xury load both the others. As soon as he came fairly within my reach, I fired, and shot him directly in the head: immediately he sunk down into the water, but rose instantly, and plunged up and down, as if he was struggling for life, and so indeed he was: he immediately made to the shore, but between the wound which was his mortal hurt, and the strangling of the water, he died just before he reached the shore.

It is impossible to express the astonishment of these poor creatures at the noise and fire of my gun; some of them were even ready to die for fear, and fell down as dead with the very terror; but when they saw the creature dead, and sunk in the water, and that I made signs to them to come to the shore, they took heart and came to the shore, and began to search for the creature. I found him by his blood staining the water; and by the help of a rope, which I slung round him, and gave the Negroes to haul, they dragged him on shore, and found that it was a most curious leopard, spotted, and fine to an admirable degree; and the Negroes held up their hands with admiration, to think what it was I had killed him with.

The other creature, frightened with the flash

of fire and the noise of the gun, swam on shore, and ran up directly to the mountains from whence they came; nor could I, at that distance, know what it was. I found quickly the Negroes were for eating the flesh of this creature, so I was willing to have them take it as a favour from me; which, when I made signs to them that they might take him, they were very thankful for. Immediately they fell to work with him; and though they had no knife, yet with a sharpened piece of wood they took off his skin as readily, and much more readily, than we could have done with a knife. They offered me some of the flesh, which I declined, making as if I would give it them, but made signs for the skin, which they gave me very freely, and brought me a great deal more of their provisions, which, though I did not understand, yet I accepted. I then made signs to them for some water, and held out one of my jars to them, turning it bottom upwards, to show that it was empty, and that I wanted to have it filled. They called immediately to some of their friends, and there came two women, and brought a great vessel made of earth, and burnt, as I suppose, in the sun; this they set down to me, as before, and I sent Xury on shore with my jars, and filled them all three. The women were as stark naked as the men.

I was now furnished with roots and corn, such as it was, and water; and leaving my friendly Negroes, I made forward for about eleven days more, without offering to go near the shore, till I saw the

land run out a great length into the sea, at about the distance of four or five leagues before me; and the sea being very calm, I kept a large offing, to make this point. At length, doubling the point, at about two leagues from the land, I saw plainly land on the other side, to seaward: then I concluded, as it was most certain indeed, that this was the Cape de Verd, and those the islands, called from thence Cape de Verd Islands. However, they were at a great distance, and I could not well tell what I had best to do; for if I should be taken with a gale of wind, I might neither reach one nor the other.

In this dilemma, as I was very pensive, I stepped into the cabin and sat me down, Xury having the helm; when, on a sudden, the boy cried out, "Master, master, a ship with a sail!" and the foolish boy was frightened out of his wits, thinking it must needs be some of his master's ships sent to pursue us, when I knew we were gotten far enough out of their reach. I jumped out of the cabin, and immediately saw, not only the ship, but what she was, viz. that it was a Portuguese ship, and, as I thought, was bound to the Coast of Guinea, for Negroes. But, when I observed the course she steered, I was soon convinced they were bound some other way, and did not design to come any nearer to the shore; upon which, I stretched out to sea as much as I could, resolving to speak with them if possible.

With all the sail I could make, I found I should

not be able to come in their way, but that they would be gone by before I could make any signal to them; but after I had crowded to the utmost, and began to despair, they, it seems, saw me, by the help of their perspective glasses, and that it was some European boat, which, they supposed, must belong to some ship that was lost: so they shortened sail, to let me come up. I was encouraged with this, and as I had my patron's ensign on board, I made a waft of it to them for a signal of distress, and fired a gun, both which they saw; for they told me they saw the smoke, though they did not hear the gun. Upon these signals, they very kindly brought to, and lay by for me; and in about three hours' time I came up with them.

They asked me what I was, in Portuguese, and in Spanish, and in French, but I understood none of them; but, at last, a Scotch sailor who was on board, called to me, and I answered him, and told him I was an Englishman, that I had made my escape out of slavery from the Moors, at Sallee: they then bade me come on board, and very kindly took me in and all my goods.

It was an inexpressible joy to me, which any one will believe, that I was thus delivered, as I esteemed it, from such a miserable, and almost hopeless, condition as I was in; and I immediately offered all I had to the captain of the ship, as a return for my deliverance; but he generously told me he would take nothing from me, but that all I had should be delivered safe to me when I came to

the Brazils. "For," says he, "I have saved your life on no other terms than I would be glad to be saved myself; and it may, one time or other, be my lot to be taken up in the same condition. Besides," said he, "when I carry you to the Brazils, so great a way from your own country, if I should take from you what you have, you will be starved there, and then I only take away that life I had given. No, no, Senhor Inglez" (Mr. Englishman), says he, "I will carry you thither in charity, and these things will help to buy your subsistence there, and your passage home again."

CHAPTER IV

As he was charitable in this proposal, so he was just in the performance, to a tittle: for he ordered the seamen, that none should offer to touch anything I had: then he took everything into his own possession, and gave me back an exact inventory of them, that I might have them, even so much as my three earthen jars.

As to my boat, it was a very good one; and that he saw, and told me he would buy it of me for the ship's use; and asked me what I would have for it? I told him, he had been so generous to me in everything, that I could not offer to make any price of the boat, but left it entirely to him: upon which, he told me he would give me a note of hand to pay me eighty pieces of eight for it at Brazil; and when it came there, if any one offered to give more, he would make it up. He offered me also sixty pieces of eight more for my boy Xury, which I was loath to take; not that I was not willing to let the captain have him, but I was very loath to sell the poor boy's liberty, who had assisted me so faithfully in

procuring my own. However, when I let him know my reason, he owned it to be just, and offered me this medium, that he would give the boy an obligation to set him free in ten years if he turned Christian; upon this, and Xury saying he was willing to go to him, I let the captain have him.

We had a very good voyage to the Brazils, and arrived in the Bay de Todos los Santos, or All Saints' Bay, in about twenty-two days after. And now I was once more delivered from the most miserable of all conditions of life; and what to do next with myself, I was now to consider.

The generous treatment the captain gave me, I can never enough remember: he would take nothing of me for my passage, gave me twenty ducats for the leopard's skin, and forty for the lion's skin, which I had in my boat, and caused everything I had in the ship to be punctually delivered to me; and what I was willing to sell, he bought of me; such as the case of bottles, two of my guns, and a piece of the lump of bees-wax,—for I had made candles of the rest; in a word, I made about two hundred and twenty pieces of eight of all my cargo; and with this stock I went on shore in the Brazils.

I had not been long here before I was recommended to the house of a good honest man, like himself, who had an ingenio as they call it (that is, a plantation and a sugar-house). I lived with him some time, and acquainted myself, by that means, with the manner of planting and of making sugar; and seeing how well the planters lived, and how

they got rich suddenly, I resolved, if I could get a license to settle there, I would turn planter among them: endeavouring, in the meantime, to find out some way to get my money, which I had left in London, remitted to me. To this purpose, getting a kind of letter of naturalization, I purchased as much land that was uncured as my money would reach, and formed a plan for my plantation and settlement; such a one as might be suitable to the stock which I proposed to myself to receive from England.

I had a neighbour, a Portuguese of Lisbon, but born of English parents, whose name was Wells, and in much such circumstances as I was. I call him my neighbour, because his plantation lay next to mine, and we went on very sociably together. My stock was but low, as well as his; and we rather planted for food than anything else, for about two years. However, we began to increase, and our land began to come into order; so that the third year we planted some tobacco, and made each of us a large piece of ground ready for planting canes in the year to come; but we both wanted help; and now I found more than before, I had done wrong in parting with my boy Xury.

But, alas! for me to do wrong, that never did right, was no great wonder. I had no remedy but to go on: I had got into an employment quite remote to my genius, and directly contrary to the life I delighted in, and for which I forsook my father's house and broke through all his good ad-

vice: nay, I was coming into the very middle station, or upper degree of low life, which my father advised me to before; and which, if I resolved to go on with, I might as well have staid at home, and never have fatigued myself in the world as I had done: and I used often to say to myself, I could have done this as well in England, among my friends, as have gone five thousand miles off to do it among strangers and savages, in a wilderness, and at such a distance as never to hear from any part of the world that had the least knowledge of me.

In this manner, I used to look upon my condition with the utmost regret. I had nobody to converse with, but now and then this neighbour; no work to be done, but by the labour of my hands: and I used to say, I lived just like a man cast away upon some desolate island, that had nobody there but himself. But how just has it been! and how should all men reflect, that when they compare their present conditions with others that are worse, Heaven may oblige them to make the exchange, and be convinced of their former felicity by their experience: I say, how just has it been, that the truly solitary life I reflected on, in an island of mere desolation, should be my lot, who had so often unjustly compared it with the life which I then led, in which, had I continued, I had, in all probability, been exceeding prosperous and rich!

I was in some degree settled in my measures for carrying on the plantation, before my kind

friend, the captain of the ship that took me up at sea, went back; for the ship remained there, in providing his lading and preparing for his voyage, near three months. When telling him what little stock I had left behind me in London, he gave me this friendly and sincere advice: "Senhor Inglez," says he (for so he always called me), "if you will give me letters, and a procuration here in form to me, with orders to the person who has your money in London, to send your effects to Lisbon, to such persons as I shall direct, and in such goods as are proper for this country, I will bring you the produce of them, God willing, at my return: but since human affairs are all subject to changes and disasters, I would have you give orders for but one hundred pounds sterling, which, you say, is half your stock, and let the hazard be run for the first, so that if it come safe, you may order the rest the same way; and if it miscarry, you may have the other half to have recourse to for your supply." This was so wholesome advice, and looked so friendly, that I could not but be convinced it was the best course I could take; so I accordingly prepared letters to the gentlewoman with whom I left my money, and a procuration to the Portuguese captain, as he desired me.

I wrote the English captain's widow a full account of all my adventures: my slavery, escape, and how I had met with the Portuguese captain at sea, the humanity of his behaviour, and what condition I was now in, with all other necessary

directions for my supply ; and when this honest captain came to Lisbon, he found means, by some of the English merchants there, to send over, not the order only, but a full account of my story to a merchant at London, who represented it effectually to her : whereupon she not only delivered the money, but, out of her own pocket, sent the Portuguese captain a very handsome present for his humanity and charity to me.

The merchant in London, vesting this hundred pounds in English goods, such as the captain had wrote for, sent them directly to him at Lisbon, and he brought them all safe to me at the Brazils : among which, without my direction (for I was too young in my business to think of them), he had taken care to have all sorts of tools, iron work, and utensils, necessary for my plantation, and which were of great use to me. When this cargo arrived, I thought my fortune made, for I was surprised with the joy of it ; and my good steward, the captain, had laid out the five pounds, which my friend had sent him as a present for himself, to purchase and bring me over a servant, under bond for six years' service, and would not accept of any consideration except a little tobacco, which I would have him accept, being of my own produce. Neither was this all : but my goods being all English manufactures, such as cloths, stuffs, baize, and things particularly valuable and desirable in the country, I found means to sell them to a very great advantage ; so that I might

say I had more than four times the value of my first cargo, and was now infinitely beyond my poor neighbour, I mean in the advancement of my plantation: for the first thing I did, I bought me a Negro slave, and a European servant also; I mean another besides that which the captain brought me from Lisbon.

But as abused prosperity is oftentimes made the very means of our adversity, so was it with me. I went on the next year with great success in my plantation; I raised fifty great rolls of tobacco on my own ground, more than I had disposed of for necessaries among my neighbours: and these fifty rolls, being each of above one hundred pounds weight, were well cured, and laid by against the return of the fleet from Lisbon: and now, increasing in business and in wealth, my head began to be full of projects and undertakings beyond my reach; such as are, indeed, often the ruin of the best heads in business. Had I continued in the station I was now in, I had room for all the happy things to have yet befallen me, for which my father so earnestly recommended a quiet, retired life, and which he had so sensibly described the middle station of life to be full of: but other things attended me, and I was still to be the wilful agent of all my own miseries; and, particularly, to increase my fault, and double the reflections upon myself, which in my future sorrows I should have leisure to make, all these mis-carriages were procured by my apparent obstinate

adhering to my foolish inclination of wandering about, and pursuing that inclination, in contradiction to the clearest views of doing myself good in a fair and plain pursuit of those prospects, and those measures of life, which nature and Providence concurred to present me with, and to make my duty.

As I had once done thus in breaking away from my parents, so I could not be content now, but I must go and leave the happy view I had of being a rich and thriving man in my new plantation, only to pursue a rash and immoderate desire of rising faster than the nature of the thing admitted; and thus I cast myself down again into the deepest gulf of human misery that ever man fell into, or perhaps could be consistent with life and a state of health in the world.

To come then, by just degrees, to the particulars of this part of my story. — You may suppose, that having now lived almost four years in the Brazils, and beginning to thrive and prosper very well upon my plantation, I had not only learned the language, but had contracted an acquaintance and friendship among my fellow-planters, as well as among the merchants at St. Salvador, which was our port: and that, in my discourses among them, I had frequently given them an account of my two voyages to the coast of Guinea, the manner of trading with the Negroes there, and how easy it was to purchase on the coast for trifles — such as beads, toys, knives, scissars, hatchets, bits of glass,

and the like — not only gold dust, Guinea grains, elephants' teeth, etc., but Negroes, for the service of the Brazils, in great numbers.

They listened always very attentively to my discourses on these heads, but especially to that part which related to the buying Negroes; which was a trade, at that time, not only not far entered into, but, as far as it was, had been carried on by the *assientos*, or permission of the kings of Spain and Portugal, and engrossed from the public; so that few Negroes were bought, and those excessively dear.

It happened, being in company with some merchants and planters of my acquaintance, and talking of those things very earnestly, three of them came to me the next morning, and told me they had been musing very much upon what I had discoursed with them of the last night, and they came to make a secret proposal to me: and, after enjoining me to secrecy, they told me that they had a mind to fit out a ship to go to Guinea; that they had all plantations as well as I, and were straitened for nothing so much as servants; that as it was a trade that could not be carried on, because they could not publicly sell the Negroes when they came home, so they desired to make but one voyage, to bring the Negroes on shore privately, and divide them among their own plantations; and, in a word, the question was, whether I would go their supercargo in the ship, to manage the trading part upon the coast of Guinea;

and they offered me that I should have an equal share of the Negroes, without providing any part of the stock.

This was a fair proposal, it must be confessed, had it been made to any one that had not a settlement and plantation of his own to look after, which was in a fair way of coming to be very considerable, and with a good stock upon it. But for me, that was thus entered and established, and had nothing to do but go on as I had begun, for three or four years more, and to have sent for the other hundred pounds from England; and who, in that time and with that little addition, could scarce have failed of being worth three or four thousand pounds sterling, and that increasing too; for me to think of such a voyage was the most preposterous thing that ever man, in such circumstances, could be guilty of.

But I, that was born to be my own destroyer, could no more resist the offer than I could restrain my first rambling designs, when my father's good counsel was lost upon me. In a word, I told them I would go with all my heart, if they would undertake to look after my plantation in my absence, and would dispose of it to such as I should direct, if I miscarried. This they all engaged to do, and entered into writings or covenants to do so: and I made a formal will, disposing of my plantation and effects in case of my death; making the captain of the ship that had saved my life, as before, my universal heir; but obliging him to

dispose of my effects as I had directed in my will ; one-half of the produce being to himself, and the other to be shipped to England. In short, I took all possible caution to preserve my effects, and to keep up my plantation : had I used half as much prudence to have looked into my own interest, and have made a judgment of what I ought to have done and not to have done, I had certainly never gone away from so prosperous an undertaking, leaving all the probable views of a thriving circumstance, and gone a voyage to sea, attended with all its common hazards, to say nothing of the reasons I had to expect particular misfortunes to myself.

But I was hurried on, and obeyed blindly the dictates of my fancy, rather than my reason : and accordingly, the ship being fitted out, and the cargo furnished, and all things done as by agreement by my partners in the voyage, I went on board in an evil hour again, the first of September, 1659, being the same day eight years that I went from my parents at Hull, in order to act the rebel to their authority, and the fool to my own interest.

Our ship was about one hundred and twenty tons burden, carried six guns and fourteen men, besides the master, his boy, and myself ; we had on board no large cargo of goods, except of such toys as were fit for our trade with the Negroes, such as beads, bits of glass, shells, and odd trifles, especially little looking-glasses, knives, scissars, hatchets, and the like.

The very same day I went on board we set sail, standing away to the northward upon our own coast, with design to stretch over for the African coast. When they came about ten or twelve degrees of northern latitude, which, it seems, was the manner of their course in those days, we had very good weather, only excessively hot all the way upon our own coast, till we came to the height of Cape St. Augustino; from whence, keeping farther off at sea, we lost sight of land, and steered as if we were bound for the isle Fernando de Noronha, holding our course N. E. by N. and leaving those isles on the east. In this course we passed the Line in about twelve days' time, and were, by our last observation, in seven degrees twenty-two minutes northern latitude, when a violent tornado, or hurricane, took us quite out of our knowledge: it began from the south-east, came about to the north-west, and then settled in the north-east; from whence it blew in such a terrible manner, that for twelve days together we could do nothing but drive, and, scudding away before it, let it carry us whithersoever fate and the fury of the winds directed; and, during these twelve days, I need not say that I expected every day to be swallowed up; nor, indeed, did any in the ship expect to save their lives.

In this distress, we had, besides the terror of the storm, one of our men died of the calenture, and one man and a boy washed overboard. About the twelfth day, the weather abating a little, the master

made an observation as well as he could, and found that he was in about eleven degrees north latitude, but that he was twenty-two degrees of longitude difference west from Cape St. Augustino; so that he found he was got upon the coast of Guiana, or the north part of Brazil, beyond the river Amazons, toward that of the river Oronoco, commonly called the Great River; and began to consult with me what course he should take, for the ship was leaky and very much disabled, and he was for going directly back to the coast of Brazil.

I was positively against that; and looking over the charts of the sea-coast of America with him, we concluded there was no inhabited country for us to have recourse to, till we came within the circle of the Carribee islands, and therefore resolved to stand away for Barbadoes; which by keeping off to sea, to avoid the indraft of the bay or gulf of Mexico, we might easily perform, as we hoped, in about fifteen days' sail; whereas we could not possibly make our voyage to the coast of Africa without some assistance, both to our ship and ourselves.

With this design, we changed our course, and steered away N. W. by W. in order to reach some of our English islands, where I hoped for relief: but our voyage was otherwise determined; for being in the latitude of twelve degrees eighteen minutes, a second storm came upon us, which carried us away with the same impetuosity westward, and drove us so out of the very way of all human com-

merce, that had all our lives been saved, as to the sea, we were rather in danger of being devoured by savages than ever returning to our own country.

In this distress, the wind still blowing very hard, one of our men, early in the morning, cried out, Land! and we had no sooner run out of the cabin to look out, in hopes of seeing whereabouts in the world we were, than the ship struck upon a sand, and in a moment, her motion being so stopped, the sea broke over her in such a manner that we expected we should all have perished immediately; and we were immediately driven into our close quarters, to shelter us from the very foam and spray of the sea.

It is not easy for any one who has not been in the like condition to describe or conceive the consternation of men in such circumstances: we knew nothing where we were, or upon what land it was we were driven, whether an island or the main, whether inhabited or not inhabited; and as the rage of the wind was still great, though rather less than at first, we could not so much as hope to have the ship hold many minutes without breaking in pieces, unless the wind, by a kind of miracle, should immediately turn about. In a word, we sat looking upon one another, and expecting death every moment, and every man acting accordingly, as preparing for another world; for there was little or nothing more for us to do in this; that which was our present comfort, and all the comfort we

had, was, that, contrary to our expectation, the ship did not break yet, and that the master said the wind began to abate.

Now, though we thought that the wind did a little abate, yet the ship having thus struck upon the sand, and sticking too fast for us to expect her getting off, we were in a dreadful condition indeed, and had nothing to do but to think of saving our lives as well as we could. We had a boat at our stern just before the storm, but she was first staved by dashing against the ship's rudder, and, in the next place, she broke away, and either sunk, or was driven off to sea; so there was no hope from her: we had another boat on board, but how to get her off into the sea was a doubtful thing; however, there was no room to debate, for we fancied the ship would break in pieces every minute, and some told us she was actually broken already.

In this distress, the mate of our vessel laid hold of the boat, and with the help of the rest of the men, they got her flung over the ship's side; and getting all into her, we let her go, and committed ourselves, being eleven in number, to God's mercy and the wild sea: for though the storm was abated considerably, yet the sea went dreadfully high upon the shore, and might be well called *den wild zee*, as the Dutch call the sea in a storm.

And now our case was very dismal indeed; for we all saw plainly, that the sea went so high that the boat could not live, and that we should be inevitably drowned. As to making sail, we had

none ; nor, if we had, could we have done anything with it ; so we worked at the oar towards the land, though with heavy hearts, like men going to execution ; for we all knew that, when the boat came nearer to the shore, she would be dashed in a thousand pieces by the breach of the sea. However, we committed our souls to God in the most earnest manner, and the wind driving us towards the shore, we hastened our destruction with our own hands, pulling as well as we could towards land.

What the shore was — whether rock or sand, whether steep or shoal — we knew not ; the only hope that could rationally give us the least shadow of expectation was, if we might happen into some bay or gulf, or the mouth of some river, where by great chance we might have run our boat in, or got under the lee of the land, and perhaps made smooth water. But nothing of this appeared ; and as we made nearer and nearer the shore, the land looked more frightful than the sea.

After we had rowed, or rather driven, about a league and a half, as we reckoned it, a raging wave, mountain-like, came rolling astern of us, and plainly bade us expect the *coup de grace*. In a word, it took us with such fury, that it overset the boat at once ; and separating us, as well from the boat as from one another, gave us not time hardly to say, “ O God ! ” for we were all swallowed up in a moment.

Nothing can describe the confusion of thought which I felt when I sunk into the water ; for though I swam very well, yet I could not deliver myself

from the waves so as to draw my breath, till that wave having driven me, or rather carried me, a vast way on towards the shore, and having spent itself, went back, and left me upon the land almost dry, but half dead with the water I took in. I had so much presence of mind, as well as breath left, that seeing myself nearer the main land than I expected, I got upon my feet, and endeavoured to make on towards the land as fast as I could, before another wave should return and take me up again ; but I soon found it was impossible to avoid it ; for I saw the sea come after me as high as a great hill, and as furious as an enemy which I had no means or strength to contend with : my business was to hold my breath, and raise myself upon the water, if I could ; and so, by swimming, to preserve my breathing, and pilot myself towards the shore, if possible ; my greatest concern now being that the wave, as it would carry me a great way towards the shore when it came on, might not carry me back again with it when it gave back towards the sea.

The wave that came upon me again buried me at once twenty or thirty feet deep in its own body ; and I could feel myself carried with a mighty force and swiftness towards the shore, a very great way ; but I held my breath, and assisted myself to swim still forward with all my might. I was ready to burst with holding my breath, when, as I felt myself rising up, so, to my immediate relief, I found my head and hands shoot out above the surface of the water ; and though it was not two seconds of time that I

could keep myself so, yet it relieved me greatly, gave me breath and new courage. I was covered again with water a good while, but not so long but I held it out; and finding the water had spent itself, and began to return, I struck forward against the return of the waves, and felt ground again with my feet. I stood still a few moments, to recover breath and till the water went from me, and then took to my heels, and ran with what strength I had farther towards the shore. But neither would this deliver me from the fury of the sea, which came pouring in after me again; and twice more I was lifted up by the waves and carried forwards as before, the shore being very flat.

The last time of these two had well nigh been fatal to me; for the sea, having hurried me along as before, landed me, or rather dashed me, against a piece of a rock, and that with such force, that it left me senseless, and indeed helpless, as to my own deliverance; for the blow, taking my side and breast, beat the breath, as it were, quite out of my body; and had it returned again immediately, I must have been strangled in the water: but I recovered a little before the return of the waves, and, seeing I should again be covered with the water, I resolved to hold fast by a piece of the rock, and so to hold my breath, if possible, till the wave went back. Now, as the waves were not so high as the first, being nearer land, I held my hold till the wave abated, and then fetched another run, which brought me so near the shore, that the next wave,

though it went over me, yet did not so swallow me up as to carry me away ; and the next run I took, I got to the main land ; where, to my great comfort, I clambered up the cliffs of the shore, and sat me down upon the grass, free from danger, and quite out of the reach of the water.

I was now landed, and safe on shore, and began to look up and thank God that my life was saved, in a case wherein there was, some minutes before, scarcely any room to hope. I believe it is impossible to express, to the life, what the ecstasies and transports of the soul are, when it is so saved, as I may say, out of the grave : and I did not wonder now at the custom, viz., that when a malefactor, who has the halter about his neck, is tied up, and just going to be turned off, and has a reprieve brought to him ; I say, I do not wonder that they bring a surgeon with it, to let him blood that very moment they tell him of it, that the surprise may not drive the animal spirits from the heart, and overwhelm him.

For sudden joys, like griefs, confound at first.

I walked about on the shore, lifting up my hands, and my whole being, as I may say, wrapped up in the contemplation of my deliverance ; making a thousand gestures and motions which I cannot describe ; reflecting upon my comrades that were drowned, and that there should not be one soul saved but myself ; for, as for them, I never saw them afterwards, or any sign of them, except three

PLATE III

of their hats, one cap, and two shoes that were not fellows.

I cast my eyes to the stranded vessel — when the breach and froth of the sea being so big I could hardly see it, it lay so far off — and considered, “Lord ! how was it possible I could get on shore ?”

After I had solaced my mind with the comfortable part of my condition, I began to look around me, to see what kind of a place I was in, and what was next to be done ; and I soon found my comforts abate, and that, in a word, I had a dreadful deliverance : for I was wet, had no clothes to shift me, nor anything either to eat or drink, to comfort me ; neither did I see any prospect before me, but that of perishing with hunger, or being devoured by wild beasts : and that which was particularly afflicting to me was, that I had no weapon either to hunt and kill any creature for my sustenance, or to defend myself against any other creature that might desire to kill me for theirs. In a word, I had nothing about me but a knife, a tobacco-pipe, and a little tobacco in a box. This was all my provision ; and this threw me into such terrible agonies of mind that, for a while, I ran about like a madman. Night coming upon me, I began, with a heavy heart, to consider what would be my lot if there were any ravenous beasts in that country, seeing at night they always come abroad for their prey.

All the remedy that offered to my thoughts, at that time, was, to get up into a thick bushy tree, like a fir, but thorny — which grew near me, and

where I resolved to sit all night —and consider the next day what death I should die, for as yet I saw no prospect of life. I walked about a furlong from the shore, to see if I could find any fresh water to drink, which I did, to my great joy ; and having drank, and put a little tobacco into my mouth to prevent hunger, I went to the tree, and getting up into it, endeavoured to place myself so as that, if I should fall asleep, I might not fall ; and having cut me a short stick, like a truncheon, for my defence, I took up my lodging ; and having been excessively fatigued, I fell fast asleep, and slept as comfortably as, I believe, few could have done in my condition ; and found myself the most refreshed with it that I think I ever was on such an occasion.

CHAPTER V

WHEN I waked it was broad day, the weather clear, and the storm abated, so that the sea did not rage and swell as before; but that which surprised me most was, that the ship was lifted off in the night from the sand where she lay, by the swelling of the tide, and was driven up almost as far as the rock which I at first mentioned, where I had been so bruised by the wave dashing me against it. This being within about a mile from the shore where I was, and the ship seeming to stand upright still, I wished myself on board, that at least I might save some necessary things for my use.

When I came down from my apartment in the tree, I looked about me again, and the first thing I found was the boat, which lay, as the wind and the sea had tossed her up, upon the land, about two miles on my right hand. I walked as far as I could upon the shore to have got to her; but found a neck, or inlet, of water, between me and the boat, which was about half a mile broad; so I

came back for the present, being more intent upon getting at the ship, where I hoped to find something for my present subsistence.

A little after noon, I found the sea very calm, and the tide ebbed so far out, that I could come within a quarter of a mile of the ship: and here I found a fresh renewing of my grief; for I saw evidently, that if we had kept on board, we had been all safe; that is to say, we had all got safe on shore, and I had not been so miserable as to be left entirely destitute of all comfort and company, as I now was. This forced tears from my eyes again; but as there was little relief in that, I resolved, if possible, to get to the ship: so I pulled off my clothes, for the weather was hot to extremity, and took the water; but when I came to the ship, my difficulty was still greater to know how to get on board; for as she lay aground, and high out of the water, there was nothing within my reach to lay hold of. I swam round her twice, and the second time I spied a small piece of rope, which I wondered I did not see at first, hang down by the fore-chains so low, as that with great difficulty I got hold of it, and by the help of that rope got into the fore-castle of the ship. Here I found that the ship was bulged, and had a great deal of water in her hold; but that she lay so on the side of a bank of hard sand, or rather earth, that her stern lay lifted up upon the bank, and her head low, almost to the water. By this means all her quarter was free, and all that was in that part was dry; for

you may be sure my first work was to search and to see what was spoiled and what was free: and, first, I found that all the ship's provisions were dry and untouched by the water; and, being very well disposed to eat, I went to the bread-room and filled my pockets with biscuit, and ate it as I went about other things, for I had no time to lose. I also found some rum in the great cabin, of which I took a large dram, and which I had indeed need enough of, to spirit me for what was before me. Now I wanted nothing but a boat, to furnish myself with many things which I foresaw would be very necessary to me.

It was in vain to sit still and wish for what was not to be had, and this extremity roused my application. We had several spare yards, and two or three large spars of wood, and a spare topmast or two in the ship; I resolved to fall to work with these, and flung as many overboard as I could manage for their weight, tying every one with a rope, that they might not drive away. When this was done, I went down the ship's side, and pulling them to me, I tied four of them fast together at both ends, as well as I could, in the form of a raft, and laying two or three short pieces of plank upon them, crossways, I found I could walk upon it very well, but that it was not able to bear any great weight, the pieces being too light: so I went to work, and with the carpenter's saw I cut a spare topmast into three lengths, and added them to my raft, with a great deal of labour and pains. But the

hope of furnishing myself with necessaries encouraged me to go beyond what I should have been able to have done upon another occasion.

My raft was now strong enough to bear any reasonable weight. My next care was what to load it with, and how to preserve what I laid upon it from the surf of the sea; but I was not long considering this. I first laid all the planks or boards upon it that I could get, and having considered well what I most wanted, I got three of the seamen's chests, which I had broken open and emptied, and lowered them down upon my raft; these I filled with provisions, viz. bread, rice, three Dutch cheeses, five pieces of dried goats' flesh (which we lived much upon), and a little remainder of European corn, which had been laid by for some fowls which we had brought to sea with us, but the fowls were killed. There had been some barley and wheat together, but, to my great disappointment, I found afterwards that the rats had eaten or spoiled it all. As for liquors, I found several cases of bottles belonging to our skipper, in which were some cordial waters; and, in all, about five or six gallons of rack. These I stowed by themselves, there being no need to put them into the chests, nor any room for them. While I was doing this, I found the tide began to flow, though very calm; and I had the mortification to see my coat, shirt, and waistcoat, which I had left on shore upon the sand, swim away; as for my breeches, which were only linen, and open-kneed, I swam on board in them, and my stock-

ings. However, this put me upon rummaging for clothes, of which I found enough, but took no more than I wanted for present use, for I had other things which my eye was more upon; as, first, tools to work with on shore; and it was after long searching that I found the carpenter's chest, which was indeed a very useful prize to me, and much more valuable than a ship-lading of gold would have been at that time. I got it down to my raft, even whole as it was, without losing time to look into it, for I knew in general what it contained.

My next care was for some ammunition and arms. There were two very good fowling-pieces in the great cabin, and two pistols; these I secured first, with some powder-horns and a small bag of shot, and two old rusty swords. I knew there were three barrels of powder in the ship, but knew not where our gunner had stowed them; but with much search I found them, two of them dry and good, the third had taken water. Those two I got to my raft, with the arms. And now I thought myself pretty well freighted, and began to think how I should get to shore with them, having neither sail, oar, nor rudder; and the least capful of wind would have upset all my navigation.

I had three encouragements: 1st, a smooth, calm sea; 2dly, the tide rising, and setting in to the shore; 3dly, what little wind there was blew me towards the land. And thus, having found two or three broken oars belonging to the boat, and be-

sides the tools which were in the chest, I found two saws, an axe, and a hammer ; and with this cargo I put to sea. For a mile, or thereabouts, my raft went very well, only that I found it drive a little distant from the place where I had landed before ; by which I perceived that there was some indraft of the water, and consequently I hoped to find some creek or river there, which I might make use of as a port to get to land with my cargo.

As I imagined, so it was : there appeared before me a little opening of the land, and I found a strong current of the tide set into it ; so I guided my raft, as well as I could, to get into the middle of the stream. But here I had like to have suffered a second shipwreck, which, if I had, I think it verily would have broken my heart ; for, knowing nothing of the coast, my raft ran aground at one end of it upon a shoal, and, not being aground at the other end, it wanted but a little that all my cargo had slipped off towards that end that was afloat, and so fallen into the water. I did my utmost, by setting my back against the chests, to keep them in their places, but could not thrust off the raft with all my strength ; neither durst I stir from the posture I was in, but holding up the chests with all my might, I stood in that manner near half an hour, in which time the rising of the water brought me a little more upon a level ; and a little after, the water still rising, my raft floated again, and I thrust her off with the oar I had into the channel, and then driving up higher, I at length found myself in the

mouth of a little river, with land on both sides, and a strong current or tide running up. I looked on both sides for a proper place to get to shore, for I was not willing to be driven too high up the river, hoping, in time, to see some ship at sea, and therefore resolved to place myself as near the coast as I could.

At length I spied a little cove on the right shore of the creek, to which, with great pain and difficulty I guided my raft, and at last got so near, as that, reaching ground with my oar, I could thrust her directly in ; but here I had like to have dipped all my cargo into the sea again ; for that shore lying pretty steep, that is to say, sloping, there was no place to land, but where one end of my float, if it ran on shore, would lie so high, and the other sink lower, as before, that it would endanger my cargo again. All that I could do was to wait till the tide was at the highest, keeping the raft with my oar like an anchor, to hold the side of it fast to the shore, near a flat piece of ground, which I expected the water would flow over ; and so it did. As soon as I found water enough, for my raft drew about a foot of water, I thrust her upon that flat piece of ground, and there fastened or moored her, by sticking my two broken oars into the ground one on one side, near one end, and one on the other side, near the other end : and thus I lay till the water ebbed away and left my raft and all my cargo safe on shore.

My next work was to view the country, and seek

a proper place for my habitation, and where to stow my goods, to secure them from whatever might happen. Where I was I yet knew not; whether on the continent or on an island; whether inhabited or not inhabited; whether in danger of wild beasts or not. There was a hill not above a mile from me, which rose up very steep and high, and which seemed to overtop some other hills, which lay as in a ridge from it, northward. I took out one of the fowling-pieces and one of the pistols and a horn of powder; and thus armed, I travelled for discovery up to the top of that hill; where, after I had, with great labour and difficulty, got up to the top, I saw my fate, to my great affliction, viz. that I was in an island, environed every way with the sea, no land to be seen, except some rocks, which lay a great way off, and two small islands, less than this, which lay about three leagues to the west.

I found also that the island I was in was barren, and, as I saw good reason to believe, uninhabited, except by wild beasts, of whom, however, I saw none; yet I saw abundance of fowls, but knew not their kinds; neither, when I killed them, could I tell what was fit for food, and what not. At my coming back, I shot at a great bird, which I saw sitting upon a tree, on the side of a great wood. I believe it was the first gun that had been fired there since the creation of the world: I had no sooner fired, but from all the parts of the wood there arose an innumerable number of fowls, of many sorts, making a confused screaming and cry-

ing, every one according to his usual note ; but not one of them of any kind that I knew. As for the creature I killed, I took it to be a kind of a hawk, its colour and beak resembling it, but it had no talons or claws more than common. Its flesh was carrion and fit for nothing.

Contented with this discovery, I came back to my raft, and fell to work to bring my cargo on shore, which took me up the rest of that day : what to do with myself at night I knew not, nor indeed where to rest : for I was afraid to lie down on the ground, not knowing but some wild beast might devour me ; though, as I afterwards found, there was really no need for those fears. However, as well as I could, I barricadoed myself round with the chests and boards that I had brought on shore, and made a kind of hut for that night's lodging. As for food, I yet saw not which way to supply myself, except that I had seen two or three creatures, like hares, run out of the wood where I shot the fowl.

I now began to consider that I might yet get a great many things out of the ship which would be useful to me, and particularly some of the rigging and sails, and such other things as might come to land ; and I resolved to make another voyage on board the vessel, if possible. And as I knew that the first storm that blew must necessarily break her all in pieces, I resolved to set all other things apart till I got everything out of the ship that I could get. Then I called a council, that is to say, in my

thoughts, whether I should take back the raft ; but this appeared impracticable : so I resolved to go as before, when the tide was down ; and I did so, only that I stripped before I went from my hut ; having nothing on but a chequered shirt, a pair of linen drawers, and a pair of pumps on my feet.

I got on board the ship as before, and prepared a second raft ; and having had experience of the first, I neither made this so unwieldly, nor loaded it so hard, but yet I brought away several things very useful to me ; as, first, in the carpenter's stores, I found two or three bags of nails and spikes, a great screw-jack, a dozen or two of hatchets ; and, above all, that most useful thing called a grindstone. All these I secured together, with several things belonging to the gunner ; particularly, two or three iron crows, and two barrels of musket bullets, seven muskets, and another fowling-piece, with some small quantity of powder more, a large bag full of small shot, and a great roll of sheet lead ; but this last was so heavy, I could not hoist it up to get it over the ship's side. Besides these things, I took all the men's clothes that I could find, and a spare fore-topsail, a hammock, and some bedding ; and with this I loaded my second raft, and brought them all safe on shore, to my very great comfort.

I was under some apprehensions lest, during my absence from the land, my provisions might be devoured on shore : but when I came back, I found no sign of any visitor ; only there sat a creature

like a wild cat upon one of the chests, which, when I came towards it, ran away a little distance, and then stood still. She sat very composed and unconcerned, and looked full in my face, as if she had a mind to be acquainted with me. I presented my gun to her, but, as she did not understand it, she was perfectly unconcerned at it, nor did she offer to stir away ; upon which I tossed her a bit of biscuit, though, by the way, I was not very free of it, for my store was not great ; however, I spared her a bit, I say, and she went to it, smelled of it, and ate it, and looked (as pleased) for more ; but I thanked her, and could spare no more : so she marched off.

Having got my second cargo on shore — though I was fain to open the barrels of powder, and bring them by parcels, for they were too heavy, being large casks — I went to work to make me a little tent, with the sail, and some poles, which I cut for that purpose ; and into this tent I brought everything that I knew would spoil either with rain or sun ; and I piled all the empty chests and casks up in a circle round the tent, to fortify it from any sudden attempt either from man or beast.

When I had done this, I blocked up the door of the tent with some boards within, and an empty chest set up on end without ; and spreading one of the beds upon the ground, laying my two pistols just at my head, and my gun at length by me, I went to bed for the first time, and slept very quietly all night, for I was very weary and heavy ; for the

night before I had slept little, and had laboured very hard all day, as well to fetch all those things from the ship, as to get them on shore.

I had the biggest magazine of all kinds now that ever was laid up, I believe, for one man : but I was not satisfied still ; for while the ship sat upright in that posture, I thought I ought to get everything out of her that I could ; so every day, at low water, I went on board, and brought away something or other : but particularly the third time I went, I brought away as much of the rigging as I could, as also all the small ropes and rope-twine I could get, with a piece of spare canvas, which was to mend the sails upon occasion, and the barrel of wet gunpowder. In a word, I brought away all the sails first and last ; only that I was fain to cut them in pieces, and bring as much at a time as I could ; for they were no more useful to be sails, but as mere canvas only.

But that which comforted me still more was, that, last of all, after I had made five or six such voyages as these, and thought I had nothing more to expect from the ship that was worth my meddling with ; I say, after all this, I found a great hogshead of bread, and three large runlets of rum or spirits, and a box of sugar, and a barrel of fine flour ; this was surprising to me, because I had given over expecting any more provisions, except what was spoiled by the water. I soon emptied the hogshead of that bread, and wrapped it up, parcel by parcel, in pieces of the sails, which I cut

out ; and, in a word, I got all this safe on shore also.

The next day I made another voyage, and now, having plundered the ship of what was portable and fit to hand out, I began with the cables, and cutting the great cable into pieces such as I could move, I got two cables and a hawser on shore, with all the ironwork I could get ; and having cut down the spritsail-yard, and the mizen-yard, and everything I could, to make a large raft, I loaded it with all those heavy goods, and came away ; but my good luck began now to leave me ; for this raft was so unwieldy, and so overladen, that after I was entered the little cove, where I had landed the rest of my goods, not being able to guide it so handily as I did the other, it overset, and threw me and all my cargo into the water ; as for myself, it was no great harm, for I was near the shore ; but as to my cargo, it was a great part of it lost, especially the iron, which I expected would have been of great use to me : however, when the tide was out, I got most of the pieces of cable ashore, and some of the iron, though with infinite labour ; for I was fain to dip for it into the water, a work which fatigued me very much. After this I went every day on board, and brought away what I could get.

I had been now thirteen days ashore, and had been eleven times on board the ship ; in which time I had brought away all that one pair of hands could well be supposed capable to bring ; though I believe

verily, had the calm weather held, I should have brought away the whole ship, piece by piece ; but preparing, the twelfth time, to go on board, I found the wind began to rise. However, at low water, I went on board ; and though I thought I had rummaged the cabin so effectually as that nothing could be found, yet I discovered a locker with drawers in it, in one of which I found two or three razors, and one pair of large scissars, with some ten or a dozen of good knives and forks ; in another I found about thirty-six pounds in money, some European coin, some Brazil, some pieces of eight, some gold, and some silver.

I smiled to myself at the sight of this money ; “ O drug ! ” I exclaimed, “ what art thou good for ? Thou art not worth to me, no, not the taking off the ground ; one of those knives is worth all this heap : I have no manner of use for thee ; e’en remain where thou art, and go to the bottom, as a creature whose life is not worth saving.” However, upon second thoughts, I took it away ; and wrapping all this in a piece of canvas, I began to think of making another raft ; but while I was preparing this, I found the sky overcast, and the wind began to rise, and in a quarter of an hour it blew a fresh gale from the shore. It presently occurred to me, that it was in vain to pretend to make a raft with the wind off shore ; and that it was my business to be gone before the tide of flood began, or otherwise I might not be able to reach the shore at all. Accordingly I let myself down into

PLATE IV

the water, and swam across the channel which lay between the ship and the sands, and even that with difficulty enough, partly with the weight of the things I had about me, and partly the roughness of the water ; for the wind rose very hastily, and before it was quite high water it blew a storm.

But I was got home to my little tent, where I lay, with all my wealth about me very secure. It blew very hard all that night, and in the morning, when I looked out, behold no more ship was to be seen ! I was a little surprised, but recovered myself with this satisfactory reflection, viz. that I had lost no time, nor abated no diligence, to get everything out of her that could be useful to me, and that, indeed, there was little left in her that I was able to bring away, if I had had more time.

I now gave over any more thoughts of the ship, or of anything out of her, except what might drive on shore from her wreck ; as, indeed, divers pieces of her afterwards did ; but those things were of small use to me.

My thoughts were now wholly employed about securing myself against either savages, if any should appear, or wild beasts, if any were in the island ; and I had many thoughts of the method how to do this, and what kind of dwelling to make, whether I should make a cave in the earth, or a tent upon the earth ; and, in short, I resolved upon both ; the manner and description of which, it may not be improper to give an account of.

I soon found the place I was in was not for my

settlement, particularly because it was upon a low, moorish ground, near the sea, and I believed it would not be wholesome ; and more particularly because there was no fresh water near it ; so I resolved to find a more healthy and more convenient spot of ground.

I consulted several things in my situation, which I found would be proper for me : first, air and fresh water, I just now mentioned ; secondly, shelter from the heat of the sun ; thirdly, security from ravenous creatures, whether men or beasts ; fourthly, a view to the sea, that if God sent any ship in sight, I might not lose any advantage for my deliverance, of which I was not willing to banish all my expectation yet.

In search for a place proper for this, I found a little plain on the side of a rising hill, whose front towards this little plain was steep as a house-side, so that nothing could come down upon me from the top. On the side of this rock, there was a hollow place, worn a little way in, like the entrance or door of a cave ; but there was not really any cave, or way into the rock, at all.

On the flat of the green, just before this hollow place, I resolved to pitch my tent. This plain was not above a hundred yards broad, and about twice as long, and lay like a green before my door ; and, at the end of it, descended irregularly every way down into the low ground by the seaside. It was on the N. N. W. side of the hill ; so that it was sheltered from the heat every day, till it came to

a W. and by S. sun, or thereabouts, which in those countries is near the setting.

Before I set up my tent, I drew a half-circle before the hollow place, which took in about ten yards in its semi-diameter from the rock, and twenty yards in its diameter, from its beginning and ending.

In this half-circle I pitched two rows of strong stakes, driving them into the ground till they stood very firm like piles, the biggest end being out of the ground about five feet and a half, and sharpened on the top. The two rows did not stand above six inches from one another.

Then I took the pieces of cable which I cut in the ship, and laid them in rows, one upon another, within the circle, between these two rows of stakes, up to the top, placing other stakes in the inside, leaning against them, about two feet and a half high, like a spur to a post ; and this fence was so strong, that neither man nor beast could get into it or over it. This cost me a great deal of time and labour, especially to cut the piles in the woods, bring them to the place, and drive them into the earth.

The entrance into this place I made to be not by a door, but by a short ladder to go over the top ; which ladder, when I was in, I lifted over after me ; and so I was completely fenced in and fortified, as I thought, from all the world, and consequently slept secure in the night, which otherwise I could not have done ; though, as it appeared afterwards, there was no need of all this caution against the enemies that I apprehended danger from.

CHAPTER VI

INTO this fence or fortress, with infinite labour, I carried all my riches, all my provisions, ammunition, and stores, of which you have the account above; and I made a large tent, which, to preserve me from the rains, that in one part of the year are very violent there, I made double, viz. one smaller tent within, and one larger tent above it, and covered the uppermost with a large tarpaulin, which I had saved among the sails.

And now I lay no more for a while in the bed which I had brought on shore, but in a hammock, which was indeed a very good one, and belonged to the mate of the ship.

Into this tent I brought all my provisions and everything that would spoil by the wet; and having thus enclosed all my goods I made up the entrance, which till now I had left open, and so passed and repassed as I said, by a short ladder.

When I had done this, I began to work my way into the rock, and bringing all the earth and stones that I dug down out through my tent, I laid them

up within my fence in the nature of a terrace, so that it raised the ground within about a foot and a half; and thus I made me a cave, just behind my tent, which served me like a cellar to my house. It cost me much labour and many days, before all these things were brought to perfection; and therefore I must go back to some other things which took up some of my thoughts. At the same time it happened, after I had laid my scheme for the setting up my tent, and making the cave, that a storm of rain falling from a thick, dark cloud, a sudden flash of lightning happened, and after that, a great clap of thunder, as is naturally the effect of it. I was not so much surprised with the lightning as I was with a thought which darted into my mind as swift as the lightning itself: "O my powder!" My very heart sunk within me when I thought that at one blast all my powder might be destroyed; on which, not my defence only, but the providing me food, as I thought, entirely depended. I was nothing near so anxious about my own danger, though, had the powder taken fire, I should never have known who had hurt me.

Such impression did this make upon me, that after the storm was over, I laid aside all my works, my building and fortifying, and applied myself to make bags and boxes, to separate the powder, and to keep it a little and a little in a parcel, in hope, that whatever might come, it might not all take fire at once; and to keep it so apart, that it should not be possible to make one part fire another. I fin-

ished this work in about a fortnight; and I think my powder, which in all was about two hundred and forty pounds weight was divided into not less than a hundred parcels. As to the barrel that had been wet, I did not apprehend any danger from that; so I placed it in my new cave, which, in my fancy, I called my kitchen, and the rest I hid up and down in holes among the rocks, so that no wet might come to it, marking very carefully where I laid it.

In the interval of time while this was doing, I went out at least once every day with my gun, as well to divert myself, as to see if I could kill anything fit for food; and, as near as I could, to acquaint myself with what the island produced. The first time I went out, I presently discovered that there were goats upon the island, which was a great satisfaction to me; but then it was attended with this misfortune to me, viz. that they were so shy, so subtle, and so swift of foot, that it was the most difficult thing in the world to come at them; but I was not discouraged at this, not doubting but I might now and then shoot one, as it soon happened; for after I had found their haunts a little, I laid wait in this manner for them: I observed, if they saw me in the valleys, though they were upon the rocks, they would run away as in a terrible fright; but if they were feeding in the valleys, and I was upon the rocks, they took no notice of me; from whence I concluded, that by the position of their optics, their sight was so directed downward,

that they did not readily see objects that were above them: so afterwards I took this method—I always climbed the rocks first, to get above them, and then had frequently a fair mark. The first shot I made among these creatures, I killed a she-goat, which had a little kid by her, which she gave suck to, which grieved me heartily; but when the old one fell, the kid stood stock still by her, till I came and took her up; and not only so, but when I carried the old one with me, upon my shoulders, the kid followed me quite to my enclosure; upon which I laid down the dam, and took the kid in my arms, and carried it over my pale, in hopes to have bred it up tame: but it would not eat; so I was forced to kill it, and eat it myself. These two supplied me with flesh a great while, for I ate sparingly, and preserved my provisions (my bread especially) as much as possibly I could.

Having now fixed my habitation, I found it absolutely necessary to provide a place to make a fire in, and fuel to burn; and what I did for that, as also how I enlarged my cave and what conveniences I made, I shall give a full account of it in its proper place; but I must first give some little account of myself, and of my thoughts about living, which, it may well be supposed, were not a few.

I had a dismal prospect of my condition; for as I was not cast away upon that island without being driven, as is said, by a violent storm quite out of the course of our intended voyage, and a great way,

viz. some hundreds of leagues, out of the ordinary course of the trade of mankind, I had great reason to consider it as a determination of Heaven, that in this desolate place, and in this desolate manner, I should end my life. The tears would run plentifully down my face when I made these reflections ; and sometimes I would expostulate with myself why Providence should thus completely ruin its creatures, and render them so absolutely miserable, so abandoned without help, so entirely depressed, that it could hardly be rational to be thankful for such a life.

But something always returned swift upon me to check these thoughts, and to reprove me ; and particularly, one day walking with my gun in my hand, by the sea-side, I was very pensive upon the subject of my present condition, when reason, as it were, expostulated with me the other way, thus : “ Well, you are in a desolate condition it is true ; but, pray remember, where are the rest of you ? Did not you come eleven of you into the boat ? Where are the ten ? Why were not they saved, and you lost ? Why were you singled out ? Is it better to be here or there ? ” And then I pointed to the sea. All evils are to be considered with the good that is in them, and with what worse attends them.

Then it occurred to me again, how well I was furnished for my subsistence, and what would have been my case if it had not happened (which was a hundred thousand to one) that the ship floated from the place where she first struck, and was driven so

near to the shore, that I had time to get all these things out of her; what would have been my case, if I had been to have lived in the condition in which I at first came on shore, without necessaries of life, or necessaries to supply and procure them? "Particularly," said I aloud (though to myself), "what should I have done without a gun, without ammunition, without any tools to make anything, or to work with, without clothes, bedding, a tent, or any manner of covering?" And that now I had all these to a sufficient quantity, and was in a fair way to provide myself in such a manner as to live without my gun, when my ammunition was spent: so that I had a tolerable view of subsisting, without any want, as long as I lived; for I considered, from the beginning, how I would provide for the accidents that might happen, and for the time that was to come, not only after my ammunition should be spent, but even after my health or strength should decay.

I confess, I had not entertained any notion of my ammunition being destroyed at one blast, I mean my powder being blown up by lightning; and this made the thoughts of it so surprising to me when it lightened and thundered, as I observed just now.

And now being to enter into a melancholy relation of a scene of silent life, such, perhaps, as was never heard of in the world before, I shall take it from its beginning, and continue it in its order. It was, by my account, the 30th of September, when, in the manner as above said, I first set foot

upon this horrid island ; when the sun, being to us in its autumnal equinox, was almost just over my head : for I reckoned myself, by observation, to be in the latitude of nine degrees twenty-two minutes north of the Line.

CHAPTER VII

AFTER I had been there about ten or twelve days, it came into my thoughts that I should lose my reckoning of time for want of books, and pen and ink, and should even forget the Sabbath days from the working days ; but, to prevent this, I cut it with my knife upon a large post, in capital letters ; and making it into a great cross, I set it up on the shore where I first landed, viz. "I came on shore here on the 30th of September, 1659." Upon the sides of this square post I cut every day a notch with my knife, and every seventh notch was as long again as the rest, and every first day of the month as long again as that long one : and thus I kept my calendar, or weekly, monthly, and yearly reckoning of time.

But it happened that among the many things which I brought out of the ship, in the several voyages which, as above mentioned, I made to it, I got several things of less value, but not at all less useful to me, which I found some time after, in rummaging the chests : as, in particular, pens, ink, and

paper ; several parcels in the captain's, mate's, gunner's, and carpenter's keeping ; three or four compasses, some mathematical instruments, dials, perspectives, charts, and books of navigation ; all of which I huddled together, whether I might want them or no ; also I found three very good Bibles, which came to me in my cargo from England, and which I had packed up among my things ; some Portuguese books also, and, among them, two or three popish prayer-books, and several other books, all which I carefully secured. And I must not forget, that we had in the ship a dog, and two cats, of whose eminent history I may have occasion to say something, in its place ; for I carried both the cats with me ; and as for the dog, he jumped out of the ship himself, and swam on shore to me the day after I went on shore with my first cargo, and was a trusty servant to me for many years : I wanted nothing that he could fetch me, nor any company that he could make up to me, I only wanted to have him talk to me, but that would not do. As I observed before, I found pens, ink, and paper, and I husbanded them to the utmost ; and I shall show that while my ink lasted, I kept things very exact, but after that was gone, I could not ; for I could not make any ink, by any means that I could devise.

And this put me in mind that I wanted many things, notwithstanding all that I had amassed together ; and of these, this of ink was one ; as also a spade, pickaxe, and shovel, to dig or remove the

earth ; needles, pins, and thread ; as for linen, I soon learned to want that without much difficulty.

This want of tools made every work I did go on heavily : and it was near a whole year before I had entirely finished my little pale, or surrounded my habitation. The piles or stakes, which were as heavy as I could well lift, were a long time in cutting and preparing in the woods, and more by far, in bringing home ; so that I spent sometimes two days in cutting and bringing home one of those posts, and a third day in driving it into the ground ; for which purpose I got a heavy piece of wood at first, but at last bethought myself of one of the iron crows ; which, however, though I found it answer, made driving these posts or piles very laborious and tedious work. But what need I have been concerned at the tediousness of anything I had to do, seeing I had time enough to do it in ? nor had I any other employment, if that had been over, at least that I could foresee, except the ranging the island to seek for food ; which I did, more or less, every day.

I now began to consider seriously my condition, and the circumstance I was reduced to ; and I drew up the state of my affairs in writing, not so much to leave them to any that were to come after me (for I was like to have but few heirs), as to deliver my thoughts from daily poring upon them, and afflicting my mind : and as my reason began now to master my despondency, I began to comfort myself as well as I could, and to set the good against

the evil, that I might have something to distinguish my case from worse ; and I stated very impartially, like debtor and creditor, the comforts I enjoyed against the miseries I suffered, thus : —

EVIL.

I am cast upon a horrible, desolate island, void of all hope of recovery.

I am singled out and separated, as it were, from all the world, to be miserable.

I am divided from mankind, a solitaire ; one banished from human society.

I have no clothes to cover me.

I am without any defence, or means to resist any violence of man or beast.

I have no soul to speak to, or relieve me.

GOOD.

But I am alive ; and not drowned, as all my ship's company were.

But I am singled out too from all the ship's crew, to be spared from death ; and He that miraculously saved me from death, can deliver me from this condition.

But I am not starved, and perishing in a barren place, affording no sustenance.

But I am in a hot climate, where, if I had clothes, I could hardly wear them.

But I am cast on an island where I see no wild beast to hurt me, as I saw on the coast of Africa : and what if I had been shipwrecked there ?

But God wonderfully sent the ship in near enough to the shore, that I have got out so many necessary things as will either supply my wants, or enable me to supply myself, even as long as I live.

Upon the whole, here was an undoubted testimony that there was scarce any condition in the world so miserable, but there was something nega-

tive, or something positive, to be thankful for in it: and let this stand as a direction, from the experience of the most miserable of all conditions in this world, that we may always find in it something to comfort ourselves from, and to set, in the description of good and evil, on the credit side of the account.

Having now brought my mind a little to relish my condition, and given over looking out to sea, to see if I could spy a ship; having, I say, given over these things, I began to apply myself to accommodate my way of living, and to make things as easy to me as I could.

I have already described my habitation, which was a tent under the side of a rock, surrounded with a strong pale of posts and cables; but I might now rather call it a wall, for I raised a kind of wall against it of turfs, about two feet thick on the outside; and after some time (I think it was a year and a half) I raised rafters from it, leaning to the rock, and thatched or covered it with boughs of trees, and such things as I could get, to keep out the rain; which I found, at some times of the year, very violent.

I have already observed how I brought all my goods into this pale, and into the cave which I had made behind me. But I must observe, too, that at first this was a confused heap of goods, which, as they lay in no order, so they took up all my place. I had no room to turn myself, so I set myself to enlarge my cave, and work farther into the

earth ; for it was a loose sandy rock, which yielded easily to the labour I bestowed on it ; and when I found I was pretty safe as to the beasts of prey, I worked sideways, to the right hand, into the rock, and then turning to the right again, worked quite out, and made me a door to come out in the outside of my pale or fortification.

This gave me not only egress and regress, as it were, a back way to my tent and to my storehouse, but gave me room to stow my goods.

And now I began to apply myself to make such necessary things as I found I most wanted, particularly a chair and a table ; for without these I was not able to enjoy the few comforts I had in the world ; I could not write, or eat, or do several things with so much pleasure, without a table : so I went to work. And here I must needs observe, that as reason is the substance and original of the mathematics, so by stating and squaring everything by reason, and by making the most rational judgment of things, every man may be, in time, master of every mechanic art. I had never handled a tool in my life ; and yet, in time, by labour, application, and contrivance I found at last, that I wanted nothing but I could have made, especially if I had had tools. However, I made abundance of things, even without tools ; and some with no more tools than an adze and a hatchet, which perhaps were never made that way before, and that with infinite labour. For example, if I wanted a board, I had no other way but to cut down a tree,

PLATE V

set it on an edge before me, and hew it flat on either side with my axe, till I had brought it to be as thin as a plank, and then dub it smooth with my adze. It is true, by this method, I could make but one board of a whole tree; but this I had no remedy for but patience, any more than I had for a prodigious deal of time and labour which it took me up to make a plank or board: but my time or labour was little worth, and so it was as well employed one way as another.

However, I made me a table and a chair, as I observed above, in the first place; and this I did out of the short pieces of boards that I brought on my raft from the ship. But when I wrought out some boards, as above, I made large shelves, of the breadth of a foot and a half, one over another, all along one side of my cave, to lay all my tools, nails, and iron work on; and, in a word, to separate everything at large in their places, that I might easily come at them. I knocked pieces into the wall of the rock, to hang my guns and all things that would hang up: so that, had my cave been seen, it looked like a general magazine of all necessary things; and I had everything so ready at my hand, that it was a great pleasure to me to see all my goods in such order, and especially to find my stock of all necessaries so great.

And now it was that I began to keep a journal of every day's employment; for, indeed, at first, I was in too much hurry, and not only as to labour, but in much discomposure of mind; and my jour-

nal would, too, have been full of many dull things: for example, I must have said thus — “Sept. 30th. After I had got to shore, and had escaped drowning, instead of being thankful to God for my deliverance, having first vomited, with the great quantity of salt water which was gotten into my stomach, and recovering myself a little, I ran about the shore, wringing my hands, and beating my head and face, exclaiming at my misery, and crying out I was undone, undone! till, tired and faint, I was forced to lie down on the ground to repose; but durst not sleep, for fear of being devoured.”

Some days after this, and after I had been on board the ship and got all that I could out of her, I could not forbear getting up to the top of a little mountain, and looking out to sea, in hopes of seeing a ship: then fancy that, at a vast distance, I spied a sail, please myself with the hopes of it, and, after looking steadily, till I was almost blind, lose it quite, and sit down and weep like a child, and thus increase my misery by my folly.

But, having gotten over these things in some measure, and having settled my household stuff and habitation, made me a table and a chair, and all as handsome about me as I could, I began to keep my journal: of which I shall here give you the copy (though in it will be told all these particulars over again) as long as it lasted; for, having no more ink, I was forced to leave it off.

CHAPTER VIII

THE JOURNAL

SEPTEMBER 30th, 1659. I, poor miserable Robinson Crusoe, being shipwrecked, during a dreadful storm, in the offing, came on shore on this dismal unfortunate island, which I called the ISLAND OF DESPAIR ; all the rest of the ship's company being drowned, and myself almost dead.

All the rest of that day I spent in afflicting myself at the dismal circumstances I was brought to, viz. I had neither food, house, clothes, weapon, nor place to fly to : and, in despair of any relief, saw nothing but death before me ; that I should either be devoured by wild beasts, murdered by savages, or starved to death for want of food. At the approach of night I slept in a tree, for fear of wild creatures ; but slept soundly, though it rained all night.

OCTOBER 1. In the morning I saw, to my great surprise, the ship had floated with the high tide, and was driven on shore again much nearer the island ;

which, as it was some comfort on one hand (for seeing her sit upright, and not broken in pieces, I hoped, if the wind abated, I might get on board, and get some food and necessaries out of her for my relief), so, on the other hand, it renewed my grief at the loss of my comrades, who, I imagined, if we had all staid on board, might have saved the ship, or, at least, that they would not have been all drowned, as they were : and that, had the men been saved, we might perhaps have built us a boat, out of the ruins of the ship, to have carried us to some other part of the world. I spent great part of this day in perplexing myself on these things ; but at length, seeing the ship almost dry, I went upon the sand as near as I could, and then swam on board. This day also it continued raining, though with no wind at all.

From the 1st of October to the 24th. All these days entirely spent in many several voyages to get all I could out of the ship ; which I brought on shore, every tide of flood, upon rafts. Much rain also in these days, though with some intervals of fair weather : but, it seems, this was the rainy season.

OCT. 20. I overset my raft, and all the goods I had got upon it ; but being in shoal water, and the things being chiefly heavy, I recovered many of them when the tide was out.

OCT. 25. It rained all night and all day, with some gusts of wind ; during which time the ship broke in pieces (the wind blowing a little harder

than before) and was no more to be seen, except the wreck of her, and that only at low water. I spent this day in covering and securing the goods which I had saved, that the rain might not spoil them.

OCT. 26. I walked about the shore almost all day, to find out a place to fix my habitation ; greatly concerned to secure myself from any attack in the night, either from wild beasts or men. Towards night I fixed upon a proper place, under a rock, and marked out a semicircle for my encampment ; which I resolved to strengthen with a work, wall, or fortification, made of double piles lined within with cables, and without with turf.

From the 26th to the 30th, I worked very hard in carrying all my goods to my new habitation, though some part of the time it rained exceedingly hard.

The 31st, in the morning, I went out into the island with my gun, to see for some food, and discover the country ; when I killed a she-goat, and her kid followed me home, which I afterwards killed also, because it would not feed.

NOVEMBER 1. I set up my tent under a rock, and lay there for the first night ; making it as large as I could, with stakes driven in to swing my hammock upon.

Nov. 2. I set up all my chests and boards, and the pieces of timber which made my rafts ; and with them formed a fence round me, a little within the place I had marked out for my fortification.

Nov. 3. I went out with my gun, and killed two fowls like ducks, which were very good food. In the afternoon I went to work to make me a table.

Nov. 4. This morning I began to order my times of work, of going out with my gun, time of sleep, and time of diversion; viz., every morning I walked out with my gun for two or three hours, if it did not rain; then employed myself to work till about eleven o'clock; then ate what I had to live on; and from twelve to two I lay down to sleep, the weather being excessive hot; and then, in the evening, to work again. The working part of this day and the next was wholly employed in making my table, for I was yet but a very sorry workman: though time and necessity made me a complete natural *mécanic* soon after, as I believe they would any one else.

Nov. 5. This day went abroad with my gun and dog, and killed a wild cat; her skin pretty soft, but her flesh good for nothing: of every creature that I killed I took off the skins, and preserved them. Coming back by the seashore, I saw many sorts of sea fowl which I did not understand; but was surprised, and almost frightened, with two or three seals, which while I was gazing at them (not well knowing what they were) got into the sea, and escaped me for that time.

Nov. 6. After my morning walk I went to work with my table again, and finished it, though not to my liking: nor was it long before I learned to mend it.

Nov. 7. Now it began to be settled fair weather. The 7th, 8th, 9th, 10th, and part of the 12th (for the 11th was Sunday, according to my reckoning), I took wholly up to make me a chair, and with much ado brought it to a tolerable shape, but never to please me; and, even in the making, I pulled it in pieces several times.

Note. I soon neglected my keeping Sundays; for, omitting my mark for them on my post, I forgot which was which.

Nov. 13. This day it rained; which refreshed me exceedingly, and cooled the earth: but it was accompanied with terrible thunder and lightning, which frightened me dreadfully, for fear of my powder. As soon as it was over, I resolved to separate my stock of powder into as many little parcels as possible, that it might not be in danger.

Nov. 14, 15, 16. These three days I spent in making little square chests or boxes, which might hold about a pound, or two pounds at most, of powder: and so, putting the powder in, I stowed it in places as secure and as remote from one another as possible. On one of these three days I killed a large bird that was good to eat; but I knew not what to call it.

Nov. 17. This day I began to dig behind my tent, into the rock, to make room for my farther convenience.

Note. Three things I wanted exceedingly for this work, viz., a pickaxe, a shovel, and a wheelbarrow, or basket; so I desisted from my work, and began

to consider how to supply these wants, and make me some tools. As for a pickaxe, I made use of the iron crows, which were proper enough, though heavy: but the next thing was a shovel or spade; this was so absolutely necessary that, indeed, I could do nothing effectually without it; but what kind of one to make I knew not.

Nov. 18. The next day, in searching the woods, I found a tree of that wood, or like it, which in the Brazils they call the iron tree, from its exceeding hardness: of this, with great labour, and almost spoiling my axe, I cut a piece; and brought it home, too, with difficulty enough, for it was exceeding heavy. The excessive hardness of the wood, and my having no other way, made me a long while upon this machine: for I worked it effectually, by little and little, into the form of a shovel or spade; the handle exactly shaped like ours in England, only that the broad part having no iron shod upon it at bottom, it would not last me so long: however, it served well enough for the uses which I had occasion to put it to; but never was a shovel, I believe, made after that fashion, or so long in making.

I was still deficient, for I wanted a basket, or a wheelbarrow. A basket I could not make by any means, having no such things as twigs that would bend to make wicker ware, at least, none yet found out; and as to the wheelbarrow, I fancied I could make all but the wheel, but that I had no notion of; neither did I know how to go about

it; besides, I had no possible way to make iron gudgeons for the spindle or axis of the wheel to run in; so I gave it over, and, for carrying away the earth which I dug out of the cave, I made me a thing like a hod, which the labourers carry mortar in for the bricklayers. This was not so difficult to me as the making the shovel: and yet this and the shovel, and the attempt which I made in vain to make a wheelbarrow, took me up no less than four days; I mean, always excepting my morning walk with my gun, which I seldom omitted, and very seldom failed also bringing home something fit to eat.

Nov. 23. My other work having now stood still, because of my making these tools, when they were finished I went on; and working every day, as my strength and time allowed, I spent eighteen days entirely in widening and deepening my cave, that it might hold my goods commodiously.

Note. During all this time, I worked to make this room or cave spacious enough to accommodate me as a warehouse or magazine, a kitchen, a dining-room, and a cellar. As for a lodging, I kept to the tent: except that sometimes, in the wet season of the year, it rained so hard that I could not keep myself dry; which caused me afterwards to cover all my place within my pale with long poles, and in the form of rafters, leaning against the rock, and load them with flags and large leaves of trees, like a thatch.

DECEMBER 10. I began now to think my cave or

vault finished; when on a sudden (it seems I had made it too large) a great quantity of earth fell down from the top and one side; so much, that, in short, it frightened me, and not without reason too; for if I had been under it, I should never have wanted a grave-digger. Upon this disaster, I had a great deal of work to do over again, for I had the loose earth to carry out; and, which was of more importance, I had the ceiling to prop up, so that I might be sure no more would come down.

DEC. 11. This day I went to work with it accordingly, and got two shores or posts pitched upright to the top, with two pieces of board across over each post; this I finished the next day, and setting more posts up with boards, in about a week more I had the roof secured; and the posts, standing in rows, served me for partitions to part off my house.

DEC. 17. From this day to the 30th I placed shelves, and knocked up nails on the posts, to hang everything up that could be hung up: and now I began to be in some order within doors.

DEC. 20. I carried everything into the cave, and began to furnish my house, and set up some pieces of boards, like a dresser, to order my victuals upon; but boards began to be very scarce with me; also I made me another table.

DEC. 24. Much rain all night and all day; no stirring out.

DEC. 25. Rain all day.

DEC. 26. No rain; and the earth much cooler than before, and pleasanter.

DEC. 27. Killed a young goat; and lamed another, so that I caught it, and led it home in a string: when I had it home, I bound and splinted up its leg, which was broke.

N. B. I took such care of it that it lived; and the leg grew well and as strong as ever: but, by nursing it so long, it grew tame, and fed upon the little green at my door, and would not go away. This was the first time that I entertained a thought of breeding up some tame creatures, that I might have food when my powder and shot was all spent.

DEC. 28, 29, 30, 31. Great heats and no breeze; so that there was no stirring abroad, except in the evening, for food; this time I spent in putting all my things in order within doors.

JANUARY 1. Very hot still; but I went abroad early and late with my gun, and lay still in the middle of the day. This evening, going farther into the valleys which lay towards the centre of the island, I found there was plenty of goats, though exceeding shy, and hard to come at; however, I resolved to try if I could not bring my dog to hunt them down. Accordingly, the next day, I went out with my dog, and set him upon the goats: but I was mistaken, for they all faced about upon the dog: and he knew his danger too well, for he would not come near them.

JAN. 3. I began my fence or wall; which, being still jealous of my being attacked by somebody, I resolved to make very thick and strong.

N. B. This wall being described before, I pur-

posely omit what was said in the journal; it is sufficient to observe, that I was no less time than from the 3d of January to the 14th of April, working, finishing, and perfecting this wall; though it was no more than about twenty-five yards in length, being a half-circle, from one place in the rock to another place, about twelve yards from it, the door of the cave being in the centre, behind it.

All this time I worked very hard, the rains hindering me many days, nay, sometimes weeks together: but I thought I should never be perfectly secure till this wall was finished; and it is scarce credible what inexpressible labour everything was done with, especially the bringing piles out of the woods and driving them into the ground; for I made them much bigger than I needed to have done.

When this wall was finished and the outside double fenced, with a turf wall raised up close to it, I persuaded myself that if any people were to come on shore there they would not perceive anything like a habitation; and it was very well I did so, as may be observed hereafter, upon a very remarkable occasion.

During this time I made my rounds in the woods for game every day, when the rain permitted me, and made frequent discoveries, in these walks, of something or other to my advantage; particularly, I found a kind of wild pigeons, who build, not as wood-pigeons, in a tree, but rather as house-pigeons, in the holes of the rocks; and taking some young

ones, I endeavoured to breed them up tame, and did so ; but when they grew older they flew all away ; which, perhaps, was, at first, for want of feeding them, for I had nothing to give them ; however, I frequently found their nests, and got their young ones, which were very good meat. And now, in the managing my household affairs, I found myself wanting in many things, which I thought at first it was impossible for me to make ; as indeed, as to some of them, it was : for instance, I could never make a cask to be hooped. I had a small runlet or two, as I observed before ; but I could never arrive at the capacity of making one by them, though I spent many weeks about it ; I could neither put in the heads, nor join the staves so true to one another as to make them hold water ; so I gave that also over. In the next place, I was at a great loss for candle ; so that, as soon as it was dark, which was generally by seven o'clock, I was obliged to go to bed. I remembered the lump of bees-wax with which I made candles in my African adventure ; but I had none of that now ; the only remedy I had was, that when I had killed a goat, I saved the tallow, and with a little dish made of clay, which I baked in the sun, to which I added a wick of some oakum, I made me a lamp ; and this gave me light, though not a clear steady light like a candle. In the middle of all my labours it happened that, in rummaging my things, I found a little bag, which, as I hinted before, had been filled with corn, for the feeding of poultry ; not

for this voyage, but before, as I suppose, when the ship came from Lisbon. What little remainder of corn had been in the bag was all devoured by the rats, and I saw nothing in the bag but husks and dust: and being willing to have the bag for some other use (I think it was to put powder in, when I divided it for fear of the lightning, or some such use), I shook the husks of corn out of it, on one side of my fortification under the rock.

It was a little before the great rain just now mentioned that I threw this stuff away, taking no notice of anything, and not so much as remembering that I had thrown anything there, when, about a month after, I saw some few stalks of something green shooting out of the ground, which I fancied might besome plant I had not seen; but I was surprised, and perfectly astonished, when, after a little longer time, I saw about ten or twelve ears come out, which were perfect green barley, of the same kind as our European, nay, as our English barley.

It is impossible to express the astonishment and confusion of my thoughts on this occasion. I had hitherto acted upon no religious foundation at all: indeed, I had very few notions of religion in my head, nor had entertained any sense of any things that had befallen me, otherwise than as chance, or, as we lightly say, what pleases God; without so much as inquiring into the end of Providence in these things, or his order in governing events in the world. But after I saw barley grow there, in a climate which I knew was not proper for corn,

and especially as I knew not how it came there, it startled me strangely ; and I began to suggest that God had miraculously caused this grain to grow without any help of seed sown, and that it was so directed purely for my sustenance, on that wild miserable place.

This touched my heart a little, and brought tears out of my eyes ; and I began to bless myself that such a prodigy of nature should happen upon my account ; and this was the more strange to me, because I saw near it still, all along by the side of the rock, some other straggling stalks, which proved to be stalks of rice, and which I knew, because I had seen it grow in Africa, when I was ashore there.

I not only thought these the pure productions of Providence for my support, but, not doubting that there was more in the place, I went over all that part of the island where I had been before, searching in every corner, and under every rock, for more of it ; but I could not find any. At last it occurred to my thoughts that I had shook out a bag of chicken's-meat in that place, and then the wonder began to cease ; and I must confess, my religious thankfulness to God's providence began to abate too, upon the discovering that all this was nothing but what was common ; though I ought to have been as thankful for so strange and unforeseen a providence as if it had been miraculous ; for it was really the work of Providence, as to me, that should order or appoint that ten or twelve grains of corn should remain unspoiled, when the

rats had destroyed all the rest, as if it had been dropped from heaven; as also, that I should throw it out in that particular place, where, it being in the shade of a high rock, it sprang up immediately; whereas, if I had thrown it anywhere else at that time, it would have been burned up and destroyed.

I carefully saved the ears of this corn, you may be sure, in their season, which was about the end of June; and, laying up every corn, I resolved to sow them all again; hoping, in time, to have some quantity sufficient to supply me with bread. But it was not till the fourth year that I could allow myself the least grain of this corn to eat, and even then but sparingly, as I shall show afterwards in its order; for I lost all that I sowed the first season, by not observing the proper time; as I sowed just before the dry season, so that it never came up at all, at least not as it would have done; of which in its place.

Besides this barley, there were, as above, twenty or thirty stalks of rice, which I preserved with the same care, and whose use was of the same kind, or to the same purpose, viz., to make me bread, or rather food; for I found ways to cook it up without baking, though I did that also after some time. — But to return to my Journal.

I worked excessively hard these three or four months, to get my wall done; and the 14th of April I closed it up; contriving to get into it, not by a door, but over the wall, by a ladder, that there might be no sign, on the outside, of my habitation.

APRIL 16. I finished the ladder; so I went up with the ladder to the top, and then pulled it up after me, and let it down in the inside: this was a complete enclosure to me; for within I had room enough, and nothing could come at me from without, unless it could first mount my wall.

The very next day after this wall was finished, I had almost all my labour overthrown at once, and myself killed; the case was thus:—As I was busy in the inside of it, behind my tent, just at the entrance into my cave, I was terribly frightened with a most dreadful surprising thing indeed; for, all on a sudden, I found the earth come crumbling down from the roof of my cave, and from the edge of the hill over my head, and two of the posts I had set up in the cave cracked in a frightful manner. I was heartily scared; but thought nothing of what really was the cause, only thinking that the top of my cave was falling in, as some of it had done before: and for fear I should be buried in it, I ran forward to my ladder, and not thinking myself safe there neither, I got over my wall for fear of the pieces of the hill which I expected might roll down upon me. I had no sooner stepped down upon the firm ground, than I plainly saw it was a terrible earthquake: for the ground I stood on shook three times at about eight minutes' distance, with three such shocks as would have overturned the strongest building that could be supposed to have stood on the earth; and a great piece of the top of a rock, which stood about

half a mile from me, next the sea, fell down with such a terrible noise as I never heard in all my life. I perceived also that the very sea was put into a violent motion by it; and I believe the shocks were stronger under the water than on the island.

I was so much amazed with the thing itself (having never felt the like, nor discoursed with any one that had) that I was like one dead or stupified; and the motion of the earth made my stomach sick, like one that was tossed at sea; but the noise of the falling of the rock awaked me, as it were, and, rousing me from the stupified condition I was in, filled me with horror, and I thought of nothing but the hill falling upon my tent and my household goods, and burying all at once; this sunk my very soul within me a second time.

After the third shock was over, and I felt no more for some time, I began to take courage; yet I had not heart enough to go over my wall again, for fear of being buried alive; but sat still upon the ground, greatly cast down and disconsolate, not knowing what to do. All this while I had not the least serious religious thought; nothing but the common "Lord, have mercy upon me!" and when it was over that went away, too.

While I sat thus, I found the air overcast and grow cloudy, as if it would rain; and soon after the wind rose by little and little, so that in less than half an hour it blew a most dreadful hurricane: the sea was, all on a sudden, covered with foam and froth; the shore was covered with a

breach of the water ; the trees were torn up by the roots ; and a terrible storm it was. This held about three hours, and then began to abate ; and in two hours more it was quite calm, and began to rain very hard. All this while I sat upon the ground, very much terrified and dejected ; when, on a sudden, it came into my thoughts that these winds and rain being the consequence of the earthquake, the earthquake itself was spent and over, and I might venture into my cave again. With this thought my spirits began to revive ; and the rain also helping to persuade me, I went in, and sat down in my tent ; but the rain was so violent, that my tent was ready to be beaten down with it ; and I was forced to get into my cave, though very much afraid and uneasy, for fear it should fall on my head. This violent rain forced me to a new work, viz., to cut a hole through my new fortification, like a sink, to let the water go out, which would else have drowned my cave. After I had been in my cave for some time, and found no more shocks of the earthquake follow, I began to be more composed. And now, to support my spirits, which indeed wanted it very much, I went to my little store and took a small cup of rum ; which, however, I did then, and always, very sparingly, knowing I could have no more when that was gone. It continued raining all that night and great part of the next day, so that I could not stir abroad : but my mind being more composed, I began to think of what I had best do ; concluding

that, if the island was subject to these earthquakes, there would be no living for me in a cave, but I must consider of building me some little hut in an open place, which I might surround with a wall, as I had done here, and so make myself secure from wild beasts or men: for if I staid where I was, I should certainly, one time or other, be buried alive.

With these thoughts, I resolved to remove my tent from the place where it now stood, being just under the hanging precipice of the hill, and which, if it should be shaken again, would certainly fall upon my tent. I spent the two next days, being the 19th and 20th of April, in contriving where and how to remove my habitation. The fear of being swallowed alive affected me so that I never slept in quiet; and yet the apprehension of lying abroad, without any fence, was almost equal to it; but still, when I looked about, and saw how everything was put in order, how pleasantly I was concealed, and how safe from danger, it made me very loath to remove. In the mean time, it occurred to me that it would require a vast deal of time for me to do this; and that I must be contented to run the risk where I was, till I had formed a convenient camp, and secured it so as to remove to it. With this conclusion I composed myself for a time; and resolved that I would go to work with all speed to build me a wall with piles and cables, etc., in a circle as before, and set up my tent in it when it was finished; but that I would venture to

stay where I was till it was ready and fit to move to. This was the 21st.

APRIL 22. The next morning I began to consider of means to put this measure into execution; but I was at a great loss about the tools. I had three large axes, and abundance of hatchets (for we carried the hatchets for traffic with the Indians); but with much chopping and cutting knotty hard wood, they were all full of notches, and dull; and though I had a grindstone, I could not turn it and grind my tools too. This caused me as much thought as a statesman would have bestowed upon a grand point of politics, or a judge upon the life and death of a man. At length I contrived a wheel with a string, to turn it with my foot, that I might have both my hands at liberty.

Note. I had never seen any such thing in England, or at least not to take notice how it was done, though since I have observed it is very common there; besides that, my grindstone was very large and heavy. This machine cost me a full week's work to bring it to perfection.

APRIL 28, 29. These two whole days I took up in grinding my tools, my machine for turning my grindstone performing very well.

APRIL 30. Having perceived that my bread had been low a great while, I now took a survey of it, and reduced myself to one biscuit-cake a day, which made my heart very heavy.

CHAPTER IX

MAY 1. In the morning, looking towards the seaside, the tide being low, I saw something lie on the shore bigger than ordinary, and it looked like a cask ; when I came to it, I found a small barrel, and two or three pieces of the wreck of the ship, which were driven on shore by the late hurricane; and looking towards the wreck itself, I thought it seemed to lie higher out of the water than it used to do. I examined the barrel that was driven on shore, and soon found it was a barrel of gunpowder; but it had taken water, and the powder was caked as hard as a stone: however, I rolled it farther on the shore for the present, and went on upon the sands, as near as I could to the wreck of the ship, to look for more.

When I came down to the ship, I found it strangely removed. The forecastle, which lay before buried in the sand, was heaved up at least six feet: and the stern (which was broke to pieces, and parted from the rest, by the force of the sea, soon after I had left rummaging of her) was tossed,

as it were, up, and cast on one side: and the sand was thrown so high on that side next her stern, that I could now walk quite up to her when the tide was out; whereas there was a great piece of water before, so that I could not come within a quarter of a mile of the wreck without swimming. I was surprised with this at first, but soon concluded it must be done by the earthquake; and as by this violence the ship was more broken open than formerly, so many things came daily on shore, which the sea had loosened, and which the winds and water rolled by degrees to the land.

This wholly diverted my thoughts from the design of removing my habitation; and I busied myself mightily, that day especially, in searching whether I could make any way into the ship; but I found nothing was to be expected of that kind, for all the inside of the ship was choked up with sand. However, as I had learned not to despair of anything, I resolved to pull everything to pieces that I could of the ship, concluding that everything I could get from her would be of some use or other to me.

MAY 3. I began with my saw, and cut a piece of a beam through, which I thought held some of the upper part or quarter-deck together; and when I had cut it through, I cleared away the sand as well as I could from the side which lay highest; but the tide coming in, I was obliged to give over for that time.

MAY 4. I went a-fishing, but caught not one fish that I durst eat of, till I was weary of my sport;

when, just going to leave off, I caught a young dolphin. I had made me a long line of some rope-yarn, but I had no hooks ; yet I frequently caught fish enough, as much as I cared to eat ; all which I dried in the sun, and ate them dry.

MAY 5. Worked on the wreck : cut another beam asunder, and brought three great fir planks off from the decks, which I tied together, and made swim on shore when the tide of flood came on.

MAY 6. Worked on the wreck : got several iron bolts out of her, and other pieces of iron work ; worked very hard, and came home very much tired, and had thoughts of giving it over.

MAY 7. Went to the wreck again, but not with an intent to work ; but found the weight of the wreck had broke itself down, the beams being cut ; that several pieces of the ship seemed to lie loose ; and the inside of the hold lay so open that I could see into it, but almost full of water and sand.

MAY 8. Went to the wreck, and carried an iron crow to wrench up the deck, which lay now quite clear of the water and sand. I wrenched up two planks, and brought them on shore also with the tide. I left the iron crow in the wreck for next day.

MAY 9. Went to the wreck, and with the crow made way into the body of the wreck, and felt several casks, and loosened them with the crow, but could not break them up. I felt also a roll of English lead, and could stir it ; but it was too heavy to remove.

MAY 10 to 14. Went every day to the wreck,

and got a great many pieces of timber, and boards, or plank, and two or three hundredweight of iron.

MAY 15. I carried two hatchets, to try if I could not cut a piece off the roll of lead, by placing the edge of one hatchet, and driving it with the other ; but as it lay about a foot and a half in the water, I could not make any blow to drive the hatchet.

MAY 16. It had blown hard in the night, and the wreck appeared more broken by the force of the water ; but I stayed so long in the woods, to get pigeons for food, that the tide prevented my going to the wreck that day.

MAY 17. I saw some pieces of the wreck blown on shore, at a great distance, two miles off me, but resolved to see what they were, and found it was a piece of the head, but too heavy for me to bring away.

MAY 24. Every day, to this day, I worked on the wreck ; and with hard labour I loosened some things so much, with the crow, that the first blowing tide several casks floated out, and two of the seamen's chests : but the wind blowing from the shore, nothing came to land that day but pieces of timber, and a hogshead, which had some Brazil pork in it ; but the salt water and the sand had spoiled it. I continued this work every day to the 15th of June, except the time necessary to get food ; which I always appointed, during this part of my employment, to be when the tide was up, that I might be ready when it was ebb'd out : and by this time I had gotten timber, and plank, and iron

work, enough to have built a good boat, if I had known how : and I also got, at several times, and in several pieces, near one hundredweight of the sheet-lead.

JUNE 16. Going down to the seaside, I found a large tortoise, or turtle. This was the first I had seen ; which, it seems, was only my misfortune, not any defect of the place, or scarcity ; for had I happened to be on the other side of the island, I might have had hundreds of them every day, as I found afterwards ; but perhaps had paid dear enough for them.

JUNE 17 I spent in cooking the turtle. I found in her threescore eggs : and her flesh was to me, at that time, the most savoury and pleasant that I ever tasted in my life, having had no flesh, but of goats and fowls, since I landed in this horrid place.

JUNE 18. Rained all that day, and I stayed within. I thought, at this time, the rain felt cold, and I was somewhat chilly ; which I knew was not usual in that latitude.

JUNE 19. Very ill, and shivering, as if the weather had been cold.

JUNE 20. No rest all night ; violent pains in my head, and feverish.

JUNE 21. Very ill ; frightened almost to death with the apprehensions of my sad condition, to be sick, and no help : prayed to God, for the first time since the storm off Hull ; but scarce knew what I said, or why, my thoughts being all confused.

JUNE 22. A little better: but under dreadful apprehensions of sickness.

JUNE 23. Very bad again, cold and shivering, and then a violent headache.

JUNE 24. Much better.

JUNE 25. An ague very violent: the fit held me seven hours; cold fit, and hot, with faint sweats after it.

JUNE 26. Better; and, having no victuals to eat, took my gun, but found myself very weak: however, I killed a she-goat, and with much difficulty got it home, and broiled some of it, and ate. I would fain have stewed it, and made some broth, but had no pot.

JUNE 27. The ague again so violent that I lay a-bed all day, and neither ate nor drank. I was ready to perish for thirst, but so weak I had not strength to stand up, or to get myself any water to drink. Prayed to God again, but was light-headed; and when I was not, I was so ignorant that I knew not what to say: only lay and cried, "Lord, look upon me! Lord, pity me! Lord, have mercy upon me!" I suppose I did nothing else for two or three hours; till the fit wearing off, I fell asleep, and did not wake till far in the night. When I awoke, I found myself much refreshed, but weak, and exceeding thirsty: however, as I had no water in my whole habitation, I was forced to lie till morning, and went to sleep again. In this second sleep I had this terrible dream: I thought that I was sitting on the ground, on the outside of my wall, where

I sat when the storm blew after the earthquake, and that I saw a man descend from a great black cloud, in a bright flame of fire, and light upon the ground; he was all over as bright as a flame, so that I could but just bear to look towards him; his countenance was most inexpressibly dreadful, impossible for words to describe; when he stepped upon the ground with his feet, I thought the earth trembled, just as it had done before in the earthquake; and all the air looked, to my apprehension, as if it had been filled with flashes of fire. He had no sooner landed upon the earth, but he moved forward towards me, with a long spear or weapon in his hand, to kill me; and when he came to a rising ground, at some distance, he spoke to me, or I heard a voice so terrible that it is impossible to express the terror of it; all that I can say I understood, was this: "Seeing all these things have not brought thee to repentance, now thou shalt die"; at which words, I thought he lifted up the spear that was in his hand, to kill me.

No one that shall ever read this account will expect that I should be able to describe the horrors of my soul at this terrible vision; I mean that, even while it was a dream, I even dreamed of those horrors; nor is it any more possible to describe the impression that remained upon my mind when I awaked, and found it was but a dream.

I had, alas! no divine knowledge: what I had received by the good instruction of my father was then worn out, by an uninterrupted series, for eight

years, of seafaring wickedness, and a constant conversation with none but such as were, like myself, wicked and profane to the last degree. I do not remember that I had, in all that time, one thought that so much as tended either to looking upward towards God, or inward towards a reflection upon my own ways; but a certain stupidity of soul, without desire of good or consciousness of evil, had entirely overwhelmed me; and I was all that the most hardened, unthinking, wicked creature among our common sailors can be supposed to be; not having the least sense, either of the fear of God, in danger, or of thankfulness to him, in deliverances.

In the relating what is already part of my story, this will be the more easily believed, when I shall add, that through all the variety of miseries that had to this day befallen me, I never had so much as one thought of its being the hand of God, or that it was a just punishment for my sin, either my rebellious behaviour against my father, or my present sins, which were great; or even as a punishment for the general course of my wicked life. When I was on the desperate expedition on the desert shores of Africa, I never had so much as one thought what would become of me, or one wish to God to direct me whither I should go, or to keep me from the danger which apparently surrounded me, as well from voracious creatures as cruel savages; but I was quite thoughtless of a God or a Providence; acted like a mere brute, from the principles of nature, and by the dictates of common

sense only; and indeed hardly that. When I was delivered and taken up at sea by the Portuguese captain, well used, and dealt with justly and honourably, as well as charitably, I had not the least thankfulness in my thoughts. When, again, I was shipwrecked, ruined, and in danger of drowning, on this island, I was as far from remorse, or looking on it as a judgment; I only said to myself often, that I was an unfortunate dog, and born to be always miserable.

It is true, when I first got on shore here, and found all my ship's crew drowned and myself spared, I was surprised with a kind of ecstasy, and some transports of soul, which, had the grace of God assisted, might have come up to true thankfulness; but it ended where it began, in a mere common flight of joy; or, as I may say, being glad I was alive, without the least reflection upon the distinguished goodness of the hand which had preserved me, and had singled me out to be preserved when all the rest were destroyed, or any inquiry why Providence had been thus merciful to me: just the same common sort of joy which seamen generally have, after they are got safe ashore from a shipwreck, which they drown all in the next bowl of punch, and forget almost as soon as it is over; and all the rest of my life was like it. Even when I was afterwards, on due consideration, made sensible of my condition, — how I was cast on this dreadful place, out of the reach of human kind, out of all hope of relief, or prospect of redemption, — as

soon as I saw but a prospect of living, and that I should not starve and perish for hunger, all the sense of my affliction wore off, and I began to be very easy, applied myself to the works proper for my preservation and supply, and was far enough from being afflicted at my condition, as a judgment from Heaven, or as the hand of God against me; these were thoughts which very seldom entered into my head.

The growing-up of the corn, as is hinted in my Journal, had, at first, some little influence upon me, and began to affect me with seriousness, as long as I thought it had something miraculous in it; but as soon as that part of the thought was removed, all the impression which was raised from it wore off also, as I have noted already. Even the earthquake, though nothing could be more terrible in its nature, or more immediately directing to the invisible Power which alone directs such things, yet no sooner was the fright over, but the impression it had made went off also. I had no more sense of God, or his judgments, much less of the present affliction of my circumstances being from his hand, than if I had been in the most prosperous condition of life. But now, when I began to be sick, and a leisure view of the miseries of death came to place itself before me, when my spirits began to sink under the burden of a strong distemper, and nature was exhausted with the violence of the fever, conscience, that had slept so long, began to awake, and I reproached myself with my

past life, in which I had so evidently, by uncommon wickedness, provoked the justice of God to lay me under uncommon strokes, and to deal with me in so vindictive a manner. These reflections oppressed me for the second or third day of my distemper; and in the violence as well of the fever as of the dreadful reproaches of my conscience, extorted from me some words like praying to God, though I cannot say it was a prayer attended either with desires or with hopes; it was rather the voice of mere fright and distress. My thoughts were confused, the convictions great upon my mind, and the horror of dying in such a miserable condition raised vapours in my head with the mere apprehension; and, in these hurries of my soul, I knew not what my tongue might express; but it was rather exclamation, such as, "Lord, what a miserable creature am I! If I should be sick, I shall certainly die for want of help; and what will become of me?" Then the tears burst out of my eyes, and I could say no more for a good while. In this interval, the good advice of my father came to my mind, and presently his prediction, which I mentioned at the beginning of this story, viz., that if I did take this foolish step, God would not bless me; and I should have leisure hereafter to reflect upon having neglected his counsel, when there might be none to assist in my recovery. "Now," said I aloud, "my dear father's words are come to pass: God's justice has overtaken me, and I have none to help or hear me. I rejected the voice of

Providence, which had mercifully put me in a station of life wherein I might have been happy and easy; but I would neither see it myself, nor learn from my parents to know the blessing of it. I left them to mourn over my folly; and now I am left to mourn under the consequences of it; I refused their help and assistance who would have pushed me in the world, and would have made everything easy to me; and now I have difficulties to struggle with, too great for even nature itself to support; and no assistance, no comfort, no advice." Then I cried out, "Lord, be my help, for I am in great distress." This was the first prayer, if I may call it so, that I had made for many years. — But I return to my Journal.

CHAPTER X

JUNE 28. Having been somewhat refreshed with the sleep I had had, and the fit being entirely off, I got up ; and though the fright and terror of my dream was very great, yet I considered that the fit of the ague would return again the next day, and now was my time to get something to refresh and support myself when I should be ill. The first thing I did was to fill a large square case-bottle with water, and set it upon my table, in reach of my bed ; and to take off the chill or aguish disposition of the water, I put about a quarter of a pint of rum into it, and mixed them together. Then I got me a piece of the goat's flesh and broiled it on the coals, but could eat very little. I walked about, but was very weak, and withal very sad and heavy-hearted in the sense of my miserable condition, dreading the return of my distemper the next day. At night, I made my supper of three of the turtle's eggs, which I roasted in the ashes, and ate, as we call it, in the shell : and this was the first bit of meat I had ever asked

God's blessing to, as I could remember, in my whole life. After I had eaten, I tried to walk, but found myself so weak that I could hardly carry the gun (for I never went out without that); so I went but a little way, and sat down upon the ground, looking out upon the sea, which was just before me, and very calm and smooth. As I sat here, some such thoughts as these occurred to me : "What is this earth and sea, of which I have seen so much? Whence is it produced? And what am I, and all the other creatures, wild and tame, human and brutal? Whence are we? Surely, we are all made by some secret power, who formed the earth and sea, the air and sky. And who is that?" Then it followed most naturally, "It is God that has made all. Well, but then," it came on, "if God has made all these things, he guides and governs them all, and all things that concern them; for the power that could make all things must certainly have power to guide and direct them; if so, nothing can happen in the great circuit of his works, either without his knowledge or appointment. And if nothing happens without his knowledge, he knows that I am here, and am in this dreadful condition: and if nothing happens without his appointment, he has appointed all this to befall me." Nothing occurred to my thought, to contradict any of these conclusions; and therefore it rested upon me with the greatest force, that it must needs be that God had appointed all this to befall me; that I was brought to this miserable circumstance

by his direction, he having the sole power, not of me only, but of everything that happens in the world. Immediately it followed, "Why has God done this to me? What have I done to be thus used?" My conscience presently checked me in that inquiry, as if I had blasphemed: and methought it spoke to me like a voice, "Wretch! dost *thou* ask what thou hast done? Look back upon a dreadful mis-spent life, and ask thyself what thou hast *not* done? Ask, why is it that thou wert not long ago destroyed? Why wert thou not drowned in Yarmouth Roads; killed in the fight when the ship was taken by the Sallee man-of-war; devoured by the wild beasts on the coast of Africa; or drowned *here*, when all the crew perished but thyself? Dost *thou* ask what thou hast done?" I was struck dumb with these reflections, as one astonished, and had not a word to say, no, not to answer to myself; and, rising up pensive and sad, walked back to my retreat, and went over my wall, as if I had been going to bed: but my thoughts were sadly disturbed, and I had no inclination to sleep; so I sat down in the chair, and lighted my lamp, for it began to be dark. Now, as the apprehension of the return of my distemper terrified me very much, it occurred to my thought that the Brazilians take no physic but their tobacco for almost all distempers; and I had a piece of a roll of tobacco in one of the chests, which was quite cured, and some also that was green, and not quite cured.

I went, directed by Heaven, no doubt: for in this chest I found a cure both for soul and body. I opened the chest, and found what I looked for, viz., the tobacco; and as the few books I had saved lay there too, I took out one of the Bibles which I mentioned before, and which, to this time, I had not found leisure or so much as inclination to look into. I say, I took it out, and brought both that and the tobacco with me to the table. What use to make of the tobacco I knew not, as to my distemper, nor whether it was good for it or not; but I tried several experiments with it, as if I was resolved it should hit one way or other. I first took a piece of a leaf, and chewed it in my mouth; which, indeed, at first, almost stupified my brain, the tobacco being green and strong, and such as I had not been much used to. Then I took some and steeped it an hour or two in some rum, and resolved to take a dose of it when I lay down: and lastly, I burnt some upon a pan of coals, and held my nose close over the smoke of it as long as I could bear it, as well for the heat as almost for suffocation. In the interval of this operation I took up the Bible and began to read; but my head was too much disturbed by the tobacco to bear reading, at least at that time; only, having opened the book casually, the first words that occurred to me were these: "Call on me in the day of trouble, and I will deliver thee, and thou shalt glorify me." These words were very apt to my case; and made some impression upon my

thoughts at the time of reading them, though not so much as they did afterwards ; for, as for being *delivered*, the word had no sound, as I may say, to me ; the thing was so remote, so impossible in my apprehension of things, that, as the children of Israel said when they were promised flesh to eat, “ Can God spread a table in the wilderness ? ” so I began to say, “ Can even God himself deliver me from this place ? ” And as it was not for many years that any hopes appeared, this prevailed very often upon my thoughts : but, however, the words made a great impression upon me, and I mused upon them very often. It now grew late : and the tobacco had, as I said, dozed my head so much that I inclined to sleep ; so I left my lamp burning in the cave, lest I should want anything in the night, and went to bed. But before I lay down, I did what I never had done in all my life : I kneeled down, and prayed to God to fulfil the promise to me, that if I called upon him in the day of trouble he would deliver me. After my broken and imperfect prayer was over, I drank the rum in which I had steeped the tobacco ; which was so strong and rank of the tobacco that indeed I could scarce get it down ; immediately upon this I went to bed. I found presently the rum flew up into my head violently ; but I fell into a sound sleep, and waked no more till, by the sun, it must necessarily be near three o’clock in the afternoon the next day ; nay, to this hour, I am partly of opinion that I slept all the

next day and night, and till almost three the day after ; for otherwise, I know not how I should lose a day out of my reckoning in the days of the week, as it appeared, some years after, I had done ; for if I had lost it by crossing and recrossing the Line, I should have lost more than one day ; but certainly I lost a day in my account, and never knew which way. Be that, however, one way or the other, when I awaked I found myself exceedingly refreshed, and my spirits lively and cheerful : when I got up I was stronger than I was the day before, and my stomach better, for I was hungry ; and, in short, I had no fit the next day, but continued much altered for the better. This was the 29th.

The 30th was my well day, of course ; and I went abroad with my gun, but did not care to travel too far. I killed a sea fowl or two, something like a brand goose, and brought them home ; but was not very forward to eat them ; so I ate some more of the turtle's eggs, which were very good. This evening I renewed the medicine, which I had supposed did me good the day before, viz. the tobacco steeped in rum ; only I did not take so much as before, nor did I chew any of the leaf, or hold my head over the smoke : however, I was not so well the next day, which was the first of July, as I hoped I should have been ; for I had a little of the cold fit, but it was not much.

JULY 2. I renewed the medicine all the three ways, and dosed myself with it as at first, and doubled the quantity which I drank.

JULY 3. I missed the fit for good and all, though I did not recover my full strength for some weeks after. While I was thus gathering strength, my thoughts ran exceedingly upon this Scripture, "I will deliver thee"; and the impossibility of my deliverance lay much upon my mind, in bar of my ever expecting it. But as I was discouraging myself with such thoughts, it occurred to my mind that I pored so much upon my deliverance from the main affliction that I disregarded the deliverance I had received; and I was, as it were, made to ask myself such questions as these, viz., "Have I not been delivered, and wonderfully, too, from sickness; from the most distressed condition that could be and that was so frightful to me? and what notice have I taken of it? Have I done my part? God has delivered me, but I have not glorified him; that is to say, I have not owned and been thankful for that as a deliverance; and how can I expect a greater deliverance?" This touched my heart very much; and immediately I knelt down, and gave God thanks aloud for my recovery from my sickness.

JULY 4. In the morning I took the Bible, and beginning at the New Testament, I began seriously to read it; and imposed upon myself to read a while every morning and every night; not binding myself to the number of chapters, but as long as my thoughts should engage me. It was not long after I set seriously to this work that I found my heart more deeply and sincerely affected with the wickedness of my past life. The impression of my

dream revived; and the words, "All these things have not brought thee to repentance," ran seriously in my thoughts. I was earnestly begging of God to give me repentance, when it happened providentially, the very same day, that, reading the Scripture, I came to these words, "He is exalted a Prince and a Saviour; to give repentance and to give remission." I threw down the book; and with my heart as well as my hands lifted up to heaven, in a kind of ecstasy of joy, I cried out aloud, "Jesus, thou son of David! Jesus, thou exalted Prince and Saviour! give me repentance!" This was the first time in all my life I could say, in the true sense of the words, that I prayed; for now I prayed with a sense of my condition, and with a true Scripture view of hope, founded on the encouragement of the word of God: and from this time, I may say, I began to have hope that God would hear me.

Now I began to construe the words mentioned above, "Call on me, and I will deliver thee," in a different sense from what I had ever done before; for then I had no notion of anything being called *deliverance* but my being delivered from the captivity I was in: for though I was indeed at large in the place, yet the island was certainly a prison to me, and that in the worst sense in the world. But now I learned to take it in another sense: now I looked back upon my past life with such horror, and my sins appeared so dreadful, that my soul sought nothing of God but deliverance from the

load of guilt that bore down all my comfort. As for my solitary life, it was nothing; I did not so much as pray to be delivered from it, or think of it; it was all of no consideration, in comparison with this. And I add this part here, to hint to whoever shall read it that, whenever they come to a true sense of things, they will find deliverance from sin a much greater blessing than deliverance from affliction.

My condition began now to be, though not less miserable as to my way of living, yet much easier to my mind; and my thoughts being directed, by constantly reading the Scripture and praying to God, to things of a higher nature, I had a great deal of comfort within, which, till now, I knew nothing of; also, as my health and strength returned, I bestirred me to furnish myself with everything that I wanted, and make my way of living as regular as I could.

From the 4th of July to the 14th, I was chiefly employed in walking about with my gun in my hand, a little and a little at a time, as a man that was gathering up his strength after a fit of sickness: for it is hardly to be imagined how low I was, and to what weakness I was reduced. The application which I made use of was perfectly new, and perhaps what had never cured an ague before; neither can I recommend it to any one to practise, by this experiment: and though it did carry off the fit, yet it rather contributed to weakening me; for I had frequent convulsions in my nerves and limbs for

some time. I learned from it also this, in particular; that being abroad in the rainy season was the most pernicious thing to my health that could be, especially in those rains which came attended with storms and hurricanes of wind; for as the rain which came in the dry season was almost always accompanied with such storms, so I found that this rain was much more dangerous than the rain which fell in September and October.

I had now been in this unhappy island above ten months; all possibility of deliverance from this condition seemed to be entirely taken from me, and I firmly believed that no human shape had ever set foot upon that place. Having secured my habitation, as I thought, fully to my mind, I had a great desire to make a more perfect discovery of the island, and to see what other productions I might find, which I yet knew nothing of.

It was on the 15th of July that I began to take a more particular survey of the island itself. I went up the creek first, where, as I hinted, I brought my rafts on shore. I found, after I came about two miles up, that the tide did not flow any higher, and that it was no more than a little brook of running water, very fresh and good: but this being the dry season, there was hardly any water in some parts of it; at least, not any stream. On the banks of this brook I found many pleasant savannahs or meadows, plain, smooth, and covered with grass; and on the rising parts of them, next to the higher grounds (where the water, as it might be supposed,

never overflowed), I found a great deal of tobacco, green, and growing to a very great and strong stalk; and there were divers other plants, which I had no knowledge of or understanding about, and that might, perhaps, have virtues of their own, which I could not find out. I searched for the cassava root, which the Indians, in all that climate, make their bread of; but I could find none. I saw large plants of aloes, but did not understand them. I saw several sugar-canes, but wild, and, for want of cultivation, imperfect. I contented myself with these discoveries for this time, and came back, musing with myself what course I might take to know the virtue and goodness of any of the fruits or plants which I should discover; but could bring it to no conclusion; for, in short, I had made so little observation while I was in the Brazils that I knew little of the plants in the field; at least, very little that might serve me to any purpose now in my distress.

The next day, the 16th, I went up the same way again; and after going something farther than I had gone the day before, I found the brook and the savannahs begin to cease, and the country become more woody than before. In this part I found different fruits; and particularly I found melons upon the ground in great abundance, and grapes upon the trees: the vines, indeed, had spread over the trees, and the clusters of grapes were now just in their prime, very ripe and rich. This was a surprising discovery, and I was exceedingly glad of them, but I was warned by my experience to eat

sparingly of them, remembering that when I was ashore in Barbary, the eating of grapes killed several of our Englishmen, who were slaves there, by throwing them into fluxes and fevers. I found, however, an excellent use for these grapes; and that was to cure or dry them in the sun, and keep them as dried grapes or raisins are kept; which I thought would be (as indeed they were) as wholesome and as agreeable to eat when no grapes were to be had.

I spent all that evening there, and went not back to my habitation; which, by the way, was the first night, as I might say, I had lain from home. At night, I took my first contrivance, and got up into a tree, where I slept well; and the next morning proceeded on my discovery, travelling near four miles, as I might judge by the length of the valley: keeping still due north, with a ridge of hills on the south and north sides of me. At the end of this march I came to an opening, where the country seemed to descend to the west; and a little spring of fresh water, which issued out at the side of the hill by me, ran the other way, that is, due east; and the country appeared so fresh, so green, so flourishing, everything being in a constant verdure, or flourish of spring, that it looked like a planted garden. I descended a little on the side of that delicious vale, surveying it with a secret kind of pleasure (though mixed with other afflicting thoughts), to think that this was all my own; that I was king and lord of all this country indefeasibly, and had a right of possession; and, if I could

convey it, I might have it in inheritance as completely as any lord of a manor in England. I saw here abundance of cocoa trees, and orange, lemon, and citron trees, but all wild, and very few bearing any fruit; at least not then. However, the green limes that I gathered were not only pleasant to eat, but very wholesome; and I mixed their juice afterwards with water, which made it very wholesome, and very cool and refreshing. I found now I had business enough, to gather and carry home; and I resolved to lay up a store, as well of grapes as limes and lemons, to furnish myself for the wet season, which I knew was approaching. In order to this, I gathered a great heap of grapes in one place, a lesser heap in another place; and a great parcel of limes and lemons in another place; and taking a few of each with me, I travelled homeward, and resolved to come again and bring a bag or sack, or what I could make, to carry the rest home. Accordingly, having spent three days in this journey, I came home (so I must now call my tent and my cave); but before I got thither, the grapes were spoiled; the richness of the fruits, and the weight of the juice, having broken and bruised them, they were good for little or nothing; as to the limes, they were good, but I could bring only a few.

The next day being the 19th, I went back, having made me two small bags to bring home my harvest; but I was surprised, when, coming to my heap of grapes, which were so rich and fine when

I gathered them, I found them all spread about, trod to pieces, and dragged about, some here, some there, and abundance eaten and devoured. By this I concluded there were some wild creatures thereabouts which had done this, but what they were I knew not. However, as I found there was no laying them up in heaps, and no carrying them away in a sack, but that one way they would be destroyed, and the other way they would be crushed with their own weight, I took another course: I then gathered a large quantity of the grapes, and hung them upon the out-branches of the trees, that they might cure and dry in the sun; and as for the limes and lemons, I carried as many back as I could well stand under.

When I came home from this journey, I contemplated with great pleasure the fruitfulness of that valley, and the pleasantness of the situation; the security from storms on that side; the water and the wood; and concluded that I had pitched upon a place to fix my abode in which was by far the worst part of the country. Upon the whole, I began to consider of removing my habitation, and to look out for a place equally safe as where I was now situate; if possible, in that pleasant fruitful part of the island.

This thought ran long in my head; and I was exceeding fond of it for some time, the pleasantness of the place tempting me; but when I came to a nearer view of it, I considered that I was now by the seaside, where it was at least possible that some-

thing might happen to my advantage, and, by the same ill-fate that brought me hither, might bring some other unhappy wretches to the same place; and though it was scarce probable that any such thing should ever happen, yet to enclose myself among the hills and woods in the centre of the island was to anticipate my bondage, and to render such an affair not only improbable but impossible; and that therefore I ought not by any means to remove. However, I was so enamoured of this place that I spent much of my time there for the whole remaining part of the month of July; and though, upon second thoughts, I resolved, as above stated, not to remove, yet I built me a little kind of a bower, and surrounded it at a distance with a strong fence, being a double hedge, as nigh as I could reach, well staked, and filled between with brushwood. Here I lay very secure sometimes two or three nights together; always going over it with a ladder, as before: so that I fancied now I had my country and my sea-coast house. This work took me up till the beginning of August.

I had but newly finished my fence, and began to enjoy my labour, when the rains came on, and made me stick close to my first habitation: for though I had made a tent like the other, with a piece of sail, and spread it very well, yet I had not the shelter of a hill to keep me from storms, nor a cave behind me to retreat into when the rains were extraordinary.

About the beginning of August, as I said, I had

finished my bower, and began to enjoy myself. The 3d of August I found the grapes I had hung up were perfectly dried, and indeed were excellent good raisins of the sun; so I began to take them down from the trees; and it was very happy that I did so, as the rains which followed would have spoiled them, and I should have lost the best part of my winter food; for I had above two hundred large bunches of them. No sooner had I taken them all down, and carried most of them home to my cave, but it began to rain; and from hence, which was the 14th of August, it rained, more or less, every day till the middle of October; and sometimes so violently that I could not stir out of my cave for several days.

In this season, I was much surprised with the increase of my family. I had been concerned for the loss of one of my cats, who ran away from me, or, as I thought, had been dead; and I heard no more of her, till, to my astonishment, she came home with three kittens. This was the more strange to me, because, about the end of August, though I had killed a wild cat, as I called it, with my gun, yet I thought it was quite a different kind from our European cats; yet the young cats were the same kind of house-breed as the old one; and both of my cats being females, I thought it very strange. But from these three I afterwards came to be so pestered with cats that I was forced to kill them like vermin, or wild beasts, and to drive them from my house as much as possible.

From the 14th of August to the 26th, incessant rain, so that I could not stir, and was now very careful not to be much wet. In this confinement, I began to be straitened for food ; but venturing out twice, I one day killed a goat, and the last day, which was the 24th, found a very large tortoise, which was a treat to me. My food was now regulated thus : I ate a bunch of raisins for my breakfast, a piece of the goat's flesh, or of the turtle, broiled, for my dinner (for, to my great misfortune, I had no vessel to boil or stew anything), and two or three of the turtle's eggs for my supper.

During this confinement in my cover from the rain, I worked daily two or three hours at enlarging my cave ; and by degrees worked it on towards one side, till I came to the outside of the hill, and made a door, or way out, which came beyond my fence or wall ; and so I came in and out this way. But I was not perfectly easy at lying so open : for as I had managed myself before, I was in a perfect enclosure ; whereas, now, I thought I lay exposed ; and yet I could not perceive that there was any living thing to fear, the biggest creature that I had as yet seen upon the island being a goat.

SEPTEMBER 30. I was now come to the unhappy anniversary of my landing : I cast up the notches on my post, and found I had been on shore three hundred and sixty-five days. I kept this day as a solemn fast ! setting it apart for religious exercise, prostrating myself on the ground with the most

serious humiliation, confessing my sins to God, acknowledging his righteous judgments upon me, and praying to him to have mercy on me through Jesus Christ; and having not tasted the least refreshment for twelve hours, even till the going down of the sun, I then ate a biscuit and a bunch of grapes, and went to bed, finishing the day as I began it. I had all this time observed no sabbath-day; for as at first I had no sense of religion upon my mind, I had, after some time, omitted to distinguish the weeks, by making a longer notch than ordinary for the sabbath-day, and so did not really know what any of the days were: but now having cast up the days, as above, I found I had been there a year; so I divided it into weeks, and set apart every seventh day for a sabbath; though I found, at the end of my account, I had lost a day or two in my reckoning. A little after this, my ink beginning to fail me, I contented myself to use it more sparingly; and to write down only the most remarkable events of my life, without continuing a daily memorandum of other things.

The rainy season and the dry season began now to appear regular to me, and I learned to divide them so as to provide for them accordingly; but I bought all my experience before I had it; and what I am going to relate was one of the most discouraging experiments that I had made at all.

I have mentioned that I had saved a few ears of barley and rice, which I had so surprisingly

found sprung up, as I thought, of themselves. I believe there were about thirty stalks of rice and about twenty of barley; and now I thought it a proper time to sow it after the rains; the sun being in its southern position, going from me. Accordingly I dug a piece of ground, as well as I could, with my wooden spade, and dividing it into two parts, I sowed my grain; but as I was sowing, it casually occurred to my thoughts that I would not sow it all at first, because I did not know when was the proper time for it; so I sowed about two thirds of the seed, leaving about a handful of each: and it was a great comfort to me afterwards that I did so, for not one grain of what I sowed this time came to anything; for the dry month following, and the earth having thus had no rain after the seed was sown, it had no moisture to assist its growth, and never came up at all till the wet season had come again, and then it grew as if it had been but newly sown. Finding my first seed did not grow, which I easily imagined was from the drought, I sought for a moister piece of ground to make another trial in; and I dug up a piece of ground near my new bower, and sowed the rest of my seed in February, a little before the vernal equinox. This, having the rainy months of March and April to water it, sprung up very pleasantly, and yielded a very good crop; but having only part of the seed left, and not daring to sow all that I had, I got but a small quantity at last, my whole crop not amounting to above half a peck of each

kind. But by this experiment I was made master of my business, and knew exactly when was the proper time to sow ; and that I might expect two seed-times, and two harvests, every year.

While this corn was growing, I made a little discovery, which was of use to me afterwards. As soon as the rains were over, and the weather began to settle, which was about the month of November, I made a visit up the country to my bower, where, though I had not been for some months, yet I found all things just as I had left them. The circle or double hedge that I had made was not only firm and entire, but the stakes, which I had cut out of some trees that grew thereabouts, were all shot out and grown with long branches, as much as a willow-tree usually shoots the first year after lopping its head ; but I could not tell what tree to call it that these stakes were cut from. I was surprised, and yet very well pleased, to see the young trees grow ; and I pruned them, and led them to grow as much alike as I could ; and it is scarce credible how beautiful a figure they grew into in three years : so that, though the hedge made a circle of about twenty-five yards in diameter, yet the trees, for such I might now call them, soon covered it, and it was a complete shade, sufficient to lodge under all the dry season. This made me resolve to cut some more stakes, and make me a hedge like this, in a semicircle round my wall (I mean that of my first dwelling), which I did ; and placing the trees or stakes in a double row, at about eight

yards distance from my first fence, they grew presently; and were at first a fine cover to my habitation, and afterwards served for a defence also, as I shall observe in its order.

CHAPTER XI

I FOUND now that the seasons of the year might generally be divided, not into summer and winter as in Europe, but into the rainy seasons and the dry seasons, which were generally thus: from the middle of February to the middle of April, rainy, the sun being then on or near the equinox; from the middle of April till the middle of August, dry, the sun being then north of the Line; from the middle of August till the middle of October, rainy, the sun being then come back to the Line; from the middle of October till the middle of February, dry, the sun being then to the south of the Line.

The rainy seasons held sometimes longer and sometimes shorter, as the winds happened to blow; but this was the general observation I made. After I had found, by experience, the ill consequences of being abroad in the rain, I took care to furnish myself with provisions beforehand, that I might not be obliged to go out; and I sat within doors as much as possible during the wet months. This time I found much employment, and very suitable

also to the time; for I found great occasion for many things which I had no way to furnish myself with but by hard labour and constant application; particularly, I tried many ways to make myself a basket; but all the twigs I could get for the purpose proved so brittle that they would do nothing. It proved of excellent advantage to me now that, when I was a boy, I used to take a great delight in standing at a basket-maker's in the town where my father lived, to see them make their wickerware; and being, as boys usually are, very officious to help, and a great observer of the manner how they worked those things, and sometimes lending a hand, I had by these means full knowledge of the methods of it, so that I wanted nothing but the materials, when it came into my mind that the twigs of that tree from whence I cut my stakes that grew might possibly be as tough as the sallows, willows, and osiers, in England; and I resolved to try. Accordingly, the next day, I went to my country-house, as I called it; and cutting some of the smaller twigs, I found them to my purpose as much as I could desire: whereupon I came the next time prepared with a hatchet to cut down a quantity, which I soon found, for there was great plenty of them. These I set up to dry within my circle or hedge: and when they were fit for use, I carried them to my cave: and here, during the next season, I employed myself in making, as well as I could, several baskets; both to carry earth, or to carry or lay up anything as I had occasion for. Though I did not

finish them very handsomely, yet I made them sufficiently serviceable for my purpose: and thus, afterwards, I took care never to be without them; and as my wicker-ware decayed, I made more, especially strong deep baskets, to place my corn in, instead of sacks, when I should come to have any quantity of it. Having mastered this difficulty, and employed a world of time about it, I bestirred myself to see, if possible, how to supply two other wants. I had no vessel to hold anything that was liquid, except two runlets which were almost full of rum, and some glass bottles, some of the common size, and others (which were case-bottles) square, for the holding of waters, spirits, etc. I had not so much as a pot to boil anything, except a great kettle which I saved out of the ship, and which was too big for such use as I desired it, viz., to make broth, and stew a bit of meat by itself. The second thing I would fain have had was a tobacco-pipe: but it was impossible for me to make one; however, I found a contrivance for that too at last. I employed myself in planting my second row of stakes or piles, and also in this wicker-working all the summer or dry season, when another business took me up more time than it could be imagined I could spare.

I mentioned before that I had a great mind to see the whole island, and that I had travelled up the brook, and so on to where I had built my bower, and where I had an opening quite to the sea, on the other side of the island. I now resolved to travel quite across to the sea-shore, on that side;

so taking my gun, a hatchet, and my dog, and a larger quantity of powder and shot than usual, with two biscuit-cakes, and a great bunch of raisins in my pouch, for my store, I began my journey. When I had passed the vale where my bower stood, as above, I came within view of the sea, to the west; and it being a very clear day, I fairly descried land, whether an island or continent I could not tell; but it lay very high, extending from W. to WSW. at a very great distance; by my guess, it could not be less than fifteen or twenty leagues off.

I could not tell what part of the world this might be, otherwise than that I knew it must be part of America; and, as I concluded by all my observations, must be near the Spanish dominions, and perhaps was all inhabited by savages, where, if I should have landed, I had been in a worse condition than I was now. I therefore acquiesced in the dispositions of Providence, which I began now to own and to believe ordered everything for the best; I say, I quieted my mind with this, and left off afflicting myself with fruitless wishes of being there. Besides, after some pause upon this affair, I considered that if this land was the Spanish coast, I should certainly, one time or other, see some vessel pass or repass one way or other; but if not, then it was the savage coast between the Spanish country and the Brazils, whose inhabitants are indeed the worst of savages; for they are cannibals, or men-eaters, and fail not to murder and devour all human beings that fall into their hands.

With these considerations, walking very leisurely forward, I found this side of the island, where I now was, much pleasanter than mine; the open or savannah fields sweetly adorned with flowers and grass, and full of very fine woods. I saw abundance of parrots; and fain would have caught one, if possible, to have kept it to be tame, and taught it to speak to me. I did, after taking some pains, catch a young parrot; for I knocked it down with a stick, and, having recovered it, I brought it home; but it was some years before I could make him speak; however, at last I taught him to call me by my name very familiarly. But the accident that followed, though it be a trifle, will be very diverting in its place.

I was exceedingly amused with this journey. I found in the low grounds hares, as I thought them to be, and foxes: but they differed greatly from all the other kinds I had met with; nor could I satisfy myself to eat them, though I killed several. But I had no need to be venturous, for I had no want of food, and of that which was very good too; especially these three sorts, viz., goats, pigeons, and turtle or tortoise. With these, added to my grapes, Leadenhall-market could not have furnished a table better than I, in proportion to the company; and though my case was deplorable enough, yet I had great cause for thankfulness, as I was not driven to any extremities for food, but had rather plenty, even to dainties.

I never travelled on this journey above two miles

outright in a day, or thereabout, but I took so many turns and returns to see what discoveries I could make that I came weary enough to the place where I resolved to sit down for the night; and then I either reposed myself in a tree, or surrounded myself with a row of stakes, set upright in the ground, either from one tree to another, or so as no wild creature could come at me without waking me.

As soon as I came to the sea-shore, I was surprised to see that I had taken up my lot on the worst side of the island, for here indeed the shore was covered with innumerable turtles, whereas, on the other side, I had found but three in a year and a half. Here was also an infinite number of fowls of many kinds; some of which I had seen, and some of which I had not seen before, and many of them very good meat; but such as I knew not the names of, except those called penguins.

I could have shot as many as I pleased, but was very sparing of my powder and shot; and therefore had more mind to kill a she-goat, if I could, which I could better feed on. But, though there were many goats here, more than on my side the island, yet it was with much more difficulty that I could come near them, the country being flat and even, and they saw me much sooner than when I was upon a hill.

I confess this side of the country was much pleasanter than mine; yet I had not the least inclination to remove; for as I was fixed in my hab-

itation, it became natural to me, and I seemed all the while I was here to be as it were upon a journey, and from home. However, I travelled along the sea-shore towards the east, I suppose about twelve miles; and then setting up a great pole upon the shore for a mark, I concluded I would go home again; and that the next journey I took should be on the other side of the island, east from my dwelling, and so round till I came to my post again: of which in its place.

I took another way to come back than that I went, thinking I could easily keep so much of the island in my view that I could not miss my first dwelling by viewing the country; but I found myself mistaken; for being come about two or three miles, I found myself descended into a very large valley, but so surrounded with hills, and those hills covered with wood, that I could not see which was my way by any direction but that of the sun, nor even then, unless I knew very well the position of the sun at that time of the day. And it happened, to my farther misfortune, that the weather proved hazy for three or four days while I was in this valley; and not being able to see the sun, I wandered about very uncomfortable, and at last was obliged to find out the sea-side, look for my post, and come back the same way I went; and then by easy journeys I turned homeward, the weather being exceeding hot, and my gun, ammunition, hatchet, and other things very heavy.

CHAPTER XII

IN this journey, my dog surprised a young kid, and seized upon it; and running to take hold of it, I caught it, and saved it alive from the dog. I had a great mind to bring it home if I could; for I had often been musing whether it might not be possible to get a kid or two, and so raise a breed of tame goats, which might supply me when my powder and shot should be all spent. I made a collar for this little creature, and with a string which I had made of some rope-yarn, which I always carried about me, I led him along, though with some difficulty, till I came to my bower, and there I enclosed and left him; for I was very impatient to be at home, from whence I had been absent above a month.

I cannot express what a satisfaction it was to me to come into my old hutch, and lie down in my hammock bed. This little wandering journey, without a settled place of abode, had been so unpleasant to me that my own house, as I called it to myself, was a perfect settlement to me, compared

to that ; and it rendered everything about me so comfortable that I resolved I would never go a great way from it again while it should be my lot to stay on the island.

I reposed myself here a week, to rest and regale myself after my long journey : during which, most of the time was taken up in the weighty affair of making a cage for my Poll, who began now to be more domestic, and to be mighty well acquainted with me. Then I began to think of the poor kid which I had penned within my little circle, and resolved to fetch it home, or give it some food : accordingly I went, and found it where I left it (for indeed it could not get out), but was almost starved for want of food. I went and cut boughs of trees, and branches of such shrubs as I could find, and threw it over, and having fed it, I tied it as I did before, to lead it away ; but it was so tame with being hungry that I had no need to have tied it, for it followed me like a dog ; and as I continually fed it, the creature became so loving, so gentle, and so fond that it was from that time one of my domestics also, and would never leave me afterwards.

The rainy season of the autumnal equinox was now come, and I kept the 30th of September in the same solemn manner as before, being the anniversary of my landing on the island ; having now been there two years, and no more prospect of being delivered than the first day I came here. I spent the whole day in humble and thankful

acknowledgments for the many wonderful mercies which my solitary condition was attended with, and without which it might have been infinitely more miserable. I gave humble and hearty thanks to God for having been pleased to discover to me that it was possible I might be more happy even in this solitary condition than I should have been in the enjoyment of society, and in all the pleasures of the world ; that he could fully make up to me the deficiencies of my solitary state, and the want of human society, by his presence, and the communications of his grace to my soul ; supporting, comforting, and encouraging me to depend upon his providence here, and to hope for his eternal presence hereafter.

It was now that I began sensibly to feel how much more happy the life I now led was, with all its miserable circumstances, than the wicked, cursed, abominable life I led all the past part of my days ; and now I changed both my sorrows and my joys : my very desires altered, my affections changed their gusts, and my delights were perfectly new from what they were at my first coming, or indeed for the two years past. Before, as I walked about, either on my hunting, or for viewing the country, the anguish of my soul at my condition would break out upon me on a sudden, and my very heart would die within me, to think of the woods, the mountains, the deserts I was in ; and how I was a prisoner, locked up with the eternal bars and bolts of the ocean, in an uninhabited wilderness, without

redemption. In the midst of the greatest composures of my mind, this would break out upon me like a storm, and make me wring my hands and weep like a child; sometimes it would take me in the middle of my work, and I would immediately sit down and sigh, and look upon the ground for an hour or two together. This was still worse to me; but if I could burst into tears, or give vent to my feelings by words, it would go off; and my grief, being exhausted, would abate.

But now I began to exercise myself with new thoughts; I daily read the word of God, and applied all the comforts of it to my present state. One morning, being very sad, I opened the Bible upon these words, "I will never leave thee, nor forsake thee"; immediately it occurred that these words were to me; why else should they be directed in such a manner, just at the moment when I was mourning over my condition, as one forsaken of God and man? "Well then," said I, "if God does not forsake me, of what ill consequence can it be, or what matters it, though the world should forsake me; seeing, on the other hand, if I had all the world, and should lose the favour and blessing of God, there would be no comparison in the loss?"

From this moment I began to conclude in my mind that it was possible for me to be more happy in this forsaken, solitary condition, than it was probable I should ever have been in any other particular state of the world; and with this thought I was going to give thanks to God for bringing me

to this place. I know not what it was, but something shocked my mind at that thought, and I durst not speak the words. "How canst thou be such a hypocrite," said I, even audibly, "to pretend to be thankful for a condition, which, however thou mayest endeavour to be contented with, thou wouldest rather pray heartily to be delivered from?" Here I stopped; but though I could not say I thanked God for being here, yet I sincerely gave thanks to God for opening my eyes, by whatever afflicting providences, to see the former condition of my life, and to mourn for my wickedness, and repent. I never opened the Bible, or shut it, but my very soul within me blessed God for directing my friend in England, without any order of mine, to pack it up among my goods; and for assisting me afterwards to save it out of the wreck of the ship.

Thus, and in this disposition of mind, I began my third year; and though I have not given the reader the trouble of so particular an account of my works this year as the first, yet in general it may be observed that I was very seldom idle; but having regularly divided my time, according to the several daily employments that were before me; such as, first, my duty to God, and the reading the Scriptures, which I constantly set apart some time for, thrice every day; secondly, going abroad with my gun for food, which generally took me up three hours every morning, when it did not rain; thirdly, ordering, curing, preserving, and cooking

what I had killed or caught for my supply; these took up great part of the day; also it is to be considered that in the middle of the day, when the sun was in the zenith, the violence of the heat was too great to stir out; so that about four hours in the evening was all the time I could be supposed to work in; with this exception, that sometimes I changed my hours of hunting and working, and went to work in the morning, and abroad with my gun in the afternoon.

To this short time allowed for labour, I desire may be added the exceeding laboriousness of my work, the many hours which, for want of tools, want of help, and want of skill, everything I did took up out of my time: for example, I was full two-and-forty days making me a board for a long shelf, which I wanted in my cave, whereas, two sawyers, with their tools and a sawpit, would have cut six of them out of the same tree in half a day.

My case was this: it was a large tree that was to be cut down, because my board was to be a broad one. This tree I was three days cutting down, and two more in cutting off the boughs, and reducing it to a log or piece of timber. With inexpressible hacking and hewing, I reduced both the sides of it into chips, till it was light enough to move; then I turned it, and made one side of it smooth and flat as a board, from end to end; then, turning that side downward, cut the other side, till I brought the plank to be about three

inches thick, and smooth on both sides. Any one may judge the labour of my hands in such a piece of work; but labour and patience carried me through that and many other things; I only observe this in particular, to show the reason why so much of my time went away with so little work, viz., that what might be a little, to be done with help and tools, was a vast labour, and required a prodigious time, to do alone, and by hand. Notwithstanding this, with patience and labour I went through many things; and, indeed, everything that my circumstances made necessary for me to do, as will appear by what follows.

I was now in the months of November and December, expecting my crop of barley and rice. The ground I had manured or dug up for them was not great; for, as I observed, my seed of each was not above the quantity of half a peck, having lost one whole crop by sowing in the dry season; but now my crop promised very well; when, on a sudden, I found I was in danger of losing it all again by enemies of several sorts, which it was scarce possible to keep from it; as, first, the goats, and wild creatures which I called hares, who, tasting the sweetness of the blade, lay in it night and day, as soon as it came up, and ate it so close that it could get no time to shoot up into stalk.

I saw no remedy for this but by making an enclosure about it with a hedge, which I did with a great deal of toil; and the more, because it required speed. However, as my arable land was

but small, suited to my crop, I got it tolerably well fenced in about three weeks' time ; and shooting some of the creatures in the daytime, I set my dog to guard it in the night, tying him up to a stake at the gate, where he would stand and bark all night long ; so in a little time the enemies forsook the place, and the corn grew very strong and well, and began to ripen apace.

But as the beasts ruined me before, while my corn was in the blade, so the birds were as likely to ruin me now, when it was in the ear ; for going along by the place to see how it throve, I saw my little crop surrounded with fowls, I know not of how many sorts, who stood, as it were, watching till I should be gone. I immediately let fly among them (for I always had my gun with me) ; I had no sooner shot but there rose up a little cloud of fowls, which I had not seen at all, from among the corn itself.

This touched me sensibly, for I foresaw that in a few days they would devour all my hopes ; that I should be starved, and never be able to raise a crop at all ; and what to do I could not tell : however, I resolved not to lose my corn, if possible, though I should watch it night and day. In the first place, I went among it, to see what damage was already done, and found they had spoiled a good deal of it ; but that as it was yet too green for them, the loss was not so great but that the remainder was likely to be a good crop if it could be saved.

I staid by it to load my gun, and then coming away, I could easily see the thieves sitting upon all the trees about me, as if they only waited till I was gone away; and the event proved it to be so; for as I walked off, as if gone, I was no sooner out of their sight than they dropped down, one by one, into the corn again. I was so provoked that I could not have patience to stay till more came on, knowing that every grain they ate now was, as it might be said, a peck loaf to me in the consequence; so coming up to the hedge, I fired again, and killed three of them. This was what I wished for; so I took them up, and served them as we serve notorious thieves in England, viz., hanged them in chains for a terror to others. It is impossible to imagine that this should have such an effect as it had; for the fowls not only never came to the corn, but, in short, they forsook all that part of the island, and I could never see a bird near the place as long as my scarecrows hung there. This I was very glad of, you may be sure; and about the latter end of December, which was our second harvest of the year, I reaped my corn.

I was sadly put to it for a scythe or sickle to cut it down: and all I could do was to make one, as well as I could, out of one of the broadswords, or cutlasses, which I saved among the arms out of the ship. However, as my first crop was but small, I had no great difficulty to cut it down: in short, I reaped it my way, for I cut nothing off but the

ears, and carried it away in a great basket which I had made, and so rubbed it out with my hands; and at the end of all my harvesting, I found that out of my half peck of seed I had near two bushels of rice, and above two bushels and a half of barley; that is to say, by my guess, for I had no measure.

However, this was great encouragement to me; and I foresaw that, in time, it would please God to supply me with bread; and yet here I was perplexed again, for I neither knew how to grind, or make meal of my corn, or, indeed, how to clean it and part it; nor, if made into meal, how to make bread of it; and if how to make it, yet I knew not how to bake it. These things being added to my desire of having a good quantity for store, and to secure a constant supply, I resolved not to taste any of this crop, but to preserve it all for seed against the next season; and, in the mean time, to employ all my study and hours of working to accomplish this great work of providing myself with corn and bread.

It might be truly said that now I worked for my bread. It is a little wonderful, and what I believe few people have thought much upon, viz., the strange multitude of little things necessary in the providing, producing, curing, dressing, making, and finishing this one article of bread. I, that was reduced to a mere state of nature, found this to my daily discouragement, and was made more sensible of it every hour, even after I had got the first hand-

ful of seed-corn, which, as I have said, came up unexpectedly, and indeed to a surprise.

First, I had no plough to turn up the earth, no spade or shovel to dig it: well, this I conquered, by making a wooden spade, as I observed before; but this did my work in but a wooden manner; and though it cost me a great many days to make it, yet, for want of iron, it not only wore out the sooner, but made my work the harder, and performed it much worse. However, this I bore with, and was content to work it out with patience, and bear with the badness of the performance. When the corn was sown, I had no harrow, but was forced to go over it myself, and drag a great heavy bough of a tree over it, to scratch it, as it may be called, rather than rake or harrow it. When it was growing and grown, I have observed already how many things I wanted to fence it, secure it, mow or reap it, cure and carry it home, thresh, part it from the chaff, and save it: then I wanted a mill to grind it, sieves to dress it, yeast and salt to make it into bread, and an oven to bake it; and yet all these things I did without, as shall be observed; and the corn was an inestimable comfort and advantage to me. All this, as I said, made everything laborious and tedious to me, but that there was no help for; neither was my time so much loss to me, because, as I had divided it, a certain part of it was every day appointed to these works; and as I resolved to use none of the corn for bread till I had a greater quantity by me, I had the next six months to apply

myself wholly, by labour and invention, to furnish myself with utensils proper for the performing all the operations necessary for making corn fit for my use.

CHAPTER XIII

BUT now I was to prepare more land ; for I had seed enough to sow above an acre of ground. Before I did this, I had a week's work at least to make me a spade ; which, when it was done, was but a sorry one indeed, and very heavy, and required double labour to work with it. However, I went through that, and sowed my seed in two large flat pieces of ground, as near my house as I could find them to my mind, and fenced them in with a good hedge, the stakes of which were all cut off that wood which I had set before, and knew it would grow ; so that, in one year's time, I knew I should have a quick or living hedge that would want but little repair. This work took me up full three months ; because a great part of the time was in the wet season, when I could not go abroad. Within doors, that is, when it rained and I could not go out, I found employment on the following occasions ; always observing that, while I was at work, I diverted myself with talking to my parrot, and teaching him to speak ; and I quickly taught

him to know his own name, and at last to speak it out pretty loud, "Poll"; which was the first word I ever heard spoken in the island by any mouth but my own. This, therefore, was not my work, but an assistant to my work; for now, as I said, I had a great employment upon my hands, as follows: I had long studied, by some means or other, to make myself some earthen vessels, which indeed I wanted much, but knew not where to come at them; however, considering the heat of the climate, I did not doubt but if I could find out any clay, I might botch up some such pot as might, being dried in the sun, be hard and strong enough to bear handling, and to hold anything that was dry, and required to be kept so; and as this was necessary in the preparing corn, meal, etc., which was the thing I was upon, I resolved to make some as large as I could, and fit only to stand like jars, to hold what should be put into them.

It would make the reader pity me, or rather laugh at me, to tell how many awkward ways I took to raise this pastil; what odd, misshapen, ugly things I made; how many of them fell in, and how many fell out, the clay not being stiff enough to bear its own weight; how many cracked by the over-violent heat of the sun, being set out too hastily; and how many fell in pieces with only removing, as well before as after they were dried; and, in a word, how, after having laboured hard to find the clay, to dig it, to temper it, to bring it home and work it, I could not make above two

large earthen ugly things (I cannot call them jars) in about two months' labour.

However, as the sun baked these two very dry and hard, I lifted them very gently up, and set them down again in two great wicker baskets, which I had made on purpose for them, that they might not break; and as between the pot and the basket there was a little room to spare, I stuffed it full of the rice and barley straw; and these two pots being to stand always dry, I thought would hold my dry corn, and perhaps the meal, when the corn was bruised.

Though I miscarried so much in my design for large pots, yet I made several smaller things with better success; such as little round pots, flat dishes, pitchers, and pipkins, and anything my hand turned to; and the heat of the sun baked them very hard.

But all this would not answer my end, which was to get an earthen pot to hold liquids and bear the fire, which none of these could do. It happened some time after, making a pretty large fire for cooking my meat, when I went to put it out after I had done with it, I found a broken piece of one of my earthenware vessels in the fire, burnt as hard as a stone, and red as a tile. I was agreeably surprised to see it, and said to myself that certainly they might be made to burn whole if they would burn broken.

This set me to study how to order my fire so as to make it burn some pots. I had no notion of a kiln, such as the potters burn in, or of glazing

them with lead, though I had some lead to do it with ; but I placed three large pipkins and two or three pots in a pile, one upon another, and placed my fire-wood all round it, with a great heap of embers under them. I plied the fire with fresh fuel round the outside, and upon the top, till I saw the pots in the inside red-hot quite through, and observed that they did not crack at all : when I saw them clear red, I let them stand in that heat about five or six hours, till I found one of them, though it did not crack, did melt or run ; for the sand which was mixed with the clay melted by the violence of the heat, and would have run into glass if I had gone on ; so I slacked my fire gradually till the pots began to abate of the red colour ; and watching them all night, that I might not let the fire abate too fast, in the morning I had three very good, I will not say handsome, pipkins, and two other earthen pots, as hard burnt as could be desired ; and one of them perfectly glazed with the running of the sand.

After this experiment, I need not say that I wanted no sort of earthenware for my use ; but I must needs say, as to the shapes of them, they were very indifferent, as any one may suppose, as I had no way of making them but as the children make dirt pies, or as a woman would make pies that never learned to raise paste. No joy at a thing of so mean a nature was ever equal to mine, when I found I had made an earthen pot that would bear the fire ; and I had hardly patience to stay till they

were cold, before I set one on the fire again, with some water in it, to boil me some meat, which it did admirably well ; and with a piece of a kid I made some very good broth ; though I wanted oatmeal and several other ingredients requisite to make it so good as I would have had it been.

My next concern was to get a stone mortar to stamp or beat some corn in ; for as to the mill, there was no thought of arriving to that perfection of art with one pair of hands. To supply this want I was at a great loss ; for, of all trades in the world, I was as perfectly unqualified for a stonecutter as for any whatever, neither had I any tools to go about it with. I spent many a day to find out a great stone big enough to cut hollow, and make fit for a mortar ; but could find none at all, except what was in the solid rock, and which I had no way to dig or cut out ; nor, indeed, were the rocks in the island of sufficient hardness, as they were all of a sandy, crumbling stone, which would neither bear the weight of a heavy pestle nor would break the corn without filling it with sand ; so, after a great deal of time lost in searching for a stone, I gave it over, and resolved to look out a great block of hard wood, which I found indeed much easier ; and getting one as big as I had strength to stir, I rounded it, and formed it on the outside with my axe and hatchet ; and then, with the help of the fire, and infinite labour, made a hollow place in it, as the Indians in Brazil make their canoes. After this, I made a great heavy pestle, or beater, of the

wood called iron-wood : and this I prepared and laid by against I had my next crop of corn, when I proposed to myself to grind, or rather pound, my corn into meal, to make my bread.

My next difficulty was to make a sieve, or search, to dress my meal, and to part it from the bran and the husk, without which I did not see it possible I could have any bread. This was a most difficult thing, even but to think on ; for I had nothing like the necessary thing to make it ; I mean fine thin canvas or stuff, to search the meal through. Here I was at a full stop for many months ; nor did I really know what to do : linen I had none left but what was mere rags ; I had goats' hair, but neither knew how to weave it nor spin it ; and had I known how, here were no tools to work it with. All the remedy I found for this was at last recollecting I had, among the seamen's clothes which were saved out of the ship, some neckcloths of calico or muslin ; with some pieces of these I made three small sieves, proper enough for the work, and thus I made shift for some years ; how I did afterwards, I shall show in its place.

The baking part was the next thing to be considered, and how I should make bread when I came to have corn : for, first, I had no yeast ; as to that part, there was no supplying the want, so I did not concern myself much about it ; but for an oven I was indeed puzzled. At length I found out an expedient for that also, which was this : I made some earthen vessels, very broad but not deep, that is to

say, about two feet diameter, and not above nine inches deep ; these I burned in the fire, as I had done the other, and laid them by ; and when I wanted to bake, I made a great fire upon my hearth, which I had paved with some square tiles, of my own making and burning also ; but I should not call them square. When the fire-wood was burned into embers, or live coals, I drew them forward upon the hearth, so as to cover it all over, and there let them lie till the hearth was very hot ; then, sweeping away all the embers, I set down my loaf, or loaves, and, covering them with the earthen pot, drew the embers all round the outside of the pot, to keep in and add to the heat ; and thus, as well as in the best oven in the world, I baked my barley loaves, and became, in a little time, a good pastry-cook into the bargain ; for I made myself several cakes and puddings of the rice ; but made no pies, as I had nothing to put into them except the flesh of fowls or goats.

It need not be wondered at if all these things took me up most part of the third year of my abode here ; for it is to be observed, in the intervals of these things, I had my new harvest and husbandry to manage : I reaped my corn in its season, and carried it home as well as I could, and laid it up in the ear, in my large baskets, till I had time to rub it out ; for I had no floor to thresh it on, or instrument to thresh it with.

And now, indeed, my stock of corn increasing, I really wanted to build my barns bigger : I wanted

a place to lay it up in; for the increase of the corn now yielded me so much that I had of the barley about twenty bushels, and of rice as much, or more, insomuch that now I resolved to begin to use it freely; for my bread had been quite gone a great while; I resolved also to see what quantity would be sufficient for me a whole year, and to sow but once a year.

Upon the whole, I found that the forty bushels of barley and rice were much more than I could consume in a year; so I resolved to sow just the same quantity every year that I sowed the last, in hopes that such a quantity would fully provide me with bread, etc.

CHAPTER XIV

ALL the while these things were doing, you may be sure my thoughts ran many times upon the prospect of land which I had seen from the other side of the island; and I was not without some secret wishes that I was on shore there; fancying that, seeing the main land, and an inhabited country, I might find some way or other to convey myself farther, and perhaps at last find some means of escape.

But all this while I made no allowance for the dangers of such a condition, and that I might fall into the hands of savages, and perhaps such as I might have reason to think far worse than the lions and tigers of Africa; and that if I once came in their power, I should run a hazard of more than a thousand to one of being killed, and perhaps of being eaten; for I had heard that the people of the Caribbean coast were cannibals, or man-eaters; and I knew, by the latitude, that I could not be far off from that shore. Then supposing they were not cannibals, yet that they might kill me, as they had

many Europeans who had fallen into their hands, even when they have been ten or twenty together; much more I, who was but one, and could make little or no defence; all these things, I say, which I ought to have considered well of, and did cast up in my thoughts afterwards, took up none of my apprehensions at first; yet my head ran mightily upon the thought of getting over to the shore.

Now I wished for my boy Xury, and the long-boat with the shoulder-of-mutton sail, with which I sailed above a thousand miles on the coast of Africa; but this was in vain. Then I thought I would go and look at our ship's boat, which, as I have said, was blown up upon the shore a great way, in the storm, when we were first cast away. She lay nearly where she did at first, but not quite; having turned, by the force of the waves and the winds, almost bottom upward, against a high ridge of beachy rough sand; but no water about her, as before. If I had had hands to have refitted her, and to have launched her into the water, the boat would have done very well, and I might have gone back into the Brazils with her easily enough; but I might have foreseen that I could no more turn her and set her upright upon her bottom than I could remove the island; however, I went to the woods, and cut levers and rollers, and brought them to the boat, resolving to try what I could do; suggesting to myself that if I could but turn her down, and repair the damage she had received, she

would be a very good boat, and I might venture to sea in her.

I spared no pains, indeed, in this piece of fruitless toil, and spent, I think, three or four weeks about it; at last, finding it impossible to heave her up with my little strength, I fell to digging away the sand, to undermine her and so as to make her fall down, setting pieces of wood to thrust and guide her right in the fall. But when I had done this, I was unable to stir her up again, or to get under her, much less to move her forward towards the water; so I was forced to give it over; and yet, though I gave over the hopes of the boat, my desire to venture over the main increased rather than diminished, as the means for it seemed impossible.

At length, I began to think whether it was not possible to make myself a canoe, or periagua, such as the natives of those climates make, even without tools, or, as I might say, without hands, of the trunk of a great tree. This I not only thought possible, but easy, and pleased myself extremely with the idea of making it, and with my having much more convenience for it than any of the Negroes or Indians; but not at all considering the particular inconveniences which I lay under more than the Indians did, viz., the want of hands to move it into the water when it was made, a difficulty much harder for me to surmount than all the consequences of want of tools could be to them; for what could it avail me, if, after I had chosen my

tree, and with much trouble cut it down, and might be able with my tools to hew and dub the outside into the proper shape of a boat, and burn or cut out the inside to make it hollow, so as to make a boat of it — if, after all this, I must leave it just where I found it, and was not able to launch it into the water?

One would imagine, if I had had the least reflection upon my mind of my circumstances while I was making this boat, I should have immediately thought how I was to get it into the sea: but my thoughts were so intent upon my voyage in it that I never once considered how I should get it off the land; and it was really, in its own nature, more easy for me to guide it over forty-five miles of sea than the forty-five fathoms of land, where it lay, to set it afloat in the water.

I went to work upon this boat the most like a fool that ever man did who had any of his senses awake. I pleased myself with the design, without determining whether I was able to undertake it; not but that the difficulty of launching my boat came often into my head; but I put a stop to my own inquiries into it by this foolish answer: "Let us first make it; I warrant I will find some way or other to get it along when it is done."

This was a most preposterous method; but the eagerness of my fancy prevailed, and to work I went. I felled a cedar tree, and I question much whether Solomon ever had such a one for the building of the Temple at Jerusalem; it was five feet

ten inches diameter at the lower part next the stump, and four feet eleven inches diameter at the end of twenty-two feet, where it lessened and then parted into branches. It was not without infinite labour that I felled this tree; I was twenty days hacking and hewing at the bottom, and fourteen more getting the branches and limbs, and the vast spreading head of it, cut off. After this, it cost me a month to shape it and dub it to a proportion, and to something like the bottom of a boat, that it might swim upright as it ought to do. It cost me near three months more to clear the inside, and work it out so as to make an exact boat of it: this I did, indeed, without fire, by mere mallet and chisel, and by the dint of hard labour, till I had brought it to be a very handsome periagua, and big enough to have carried six-and-twenty men, and consequently big enough to have carried me and all my cargo.

When I had gone through this work, I was extremely delighted with it. The boat was really much bigger than ever I saw a canoe or a periagua that was made of one tree, in my life. Many a weary stroke it had cost, you may be sure; and there remained nothing but to get it into the water; which, had I accomplished, I make no question but I should have begun the maddest voyage, and the most unlikely to be performed, that ever was undertaken.

But all my devices to get it into the water failed me; though they cost me inexpressible labour too. It lay about one hundred yards from the water, and

not more; but the first inconvenience was, it was up-hill towards the creek. Well, to take away this discouragement, I resolved to dig into the surface of the earth, and so make a declivity; this I began, and it cost me a prodigious deal of pains (but who grudge pains that have their deliverance in view?) When this was worked through, and this difficulty managed, it was still much the same, for I could no more stir the canoe than I could the other boat. Then I measured the distance of ground, and resolved to cut a dock, or canal, to bring the water up to the canoe, seeing I could not bring the canoe down to the water. Well, I began this work; and when I began to enter upon it, and calculate how deep it was to be dug, how broad, how the stuff was to be thrown out, I found by the number of hands I had, having none but my own, that it must have been ten or twelve years before I could have gone through with it; for the shore lay so high that at the upper end it must have been at least twenty feet deep; this attempt, though with great reluctance, I was at length obliged to give over also.

This grieved me heartily; and now I saw, though too late, the folly of beginning a work before we count the cost, and before we judge rightly of our own strength to go through with it.

In the middle of this work I finished my fourth year in this place, and kept my anniversary with the same devotion, and with as much comfort as before; for, by a constant study and serious application to the word of God and by the assistance

of his grace, I gained a different knowledge from what I had before ; I entertained different notions of things ; I looked now upon the world as a thing remote, which I had nothing to do with, no expectation from, and, indeed, no desires about : in a word, I had nothing to do with it, nor was ever likely to have ; I thought it looked, as we may perhaps look upon it hereafter, viz., as a place I had lived in, but was come out of it ; and well might I say, as Father Abraham to Dives, “ Between me and thee is a great gulf fixed.”

In the first place, I was here removed from all the wickedness of the world ; I had neither the lust of the flesh, the lust of the eye, nor the pride of life. I had nothing to covet, for I had all that I was now capable of enjoying : I was lord of the whole manor ; or, if I pleased, I might call myself king or emperor over the whole country which I had possession of ; there were no rivals ; I had no competitor, none to dispute sovereignty or command with me. I might have raised ship-loadings of corn, but I had no use for it ; so I let as little grow as I thought enough for my occasion. I had tortoise or turtle enough, but now and then one was as much as I could put to any use ; I had timber enough to have built a fleet of ships, and I had grapes enough to have made wine, or to have cured into raisins, to have loaded that fleet when it had been built.

But all I could make use of was all that was valuable ; I had enough to eat and supply my wants,

and what was the rest to me? If I killed more flesh than I could eat, the dog must eat it, or vermin; if I sowed more corn than I could eat, it must be spoiled; the trees that I cut down were lying to rot on the ground; I could make no more use of them than for fuel, and that I had no other occasion for but to dress my food.

In a word, the nature and experience of things dictated to me, upon just reflection, that all the good things of this world are of no farther good to us than for our use; and that whatever we may heap up to give others, we enjoy only as much as we can use, and no more. The most covetous gripping miser in the world would have been cured of the vice of covetousness if he had been in my case, for I possessed infinitely more than I knew what to do with. I had no room for desire, except it was for things which I had not, and they were comparatively but trifles, though indeed of great use to me. I had, as I hinted before, a parcel of money, as well gold as silver, about thirty-six pounds sterling. Alas! there the nasty, sorry, useless stuff lay: I had no manner of business for it; and I often thought within myself that I would have given a handful of it for a gross of tobacco-pipes, or for a hand-mill to grind my corn; nay, I would have given it all for a sixpenny-worth of turnip and carrot seed from England, or for a handful of peas and beans, and a bottle of ink. As it was, I had not the least advantage by it, or benefit from it; but there it lay in a drawer, and

grew mouldy with the damp of the cave in the wet seasons ; and if I had had the drawer full of diamonds, it had been the same case, — they would have been of no manner of value to me because of no use.

I had now brought my state of life to be much more comfortable in itself than it was at first, and much easier to my mind, as well as to my body. I frequently sat down to meat with thankfulness, and admired the hand of God's providence, which had thus spread my table in the wilderness ; I learned to look more upon the bright side of my condition, and less upon the dark side, and to consider what I enjoyed, rather than what I wanted ; and this gave me sometimes such secret comforts that I cannot express them ; and which I take notice of here, to put those discontented people in mind of it, who cannot enjoy comfortably what God has given them, because they see and covet something that he has not given them. All our discontents about what we want appeared to me to spring from the want of thankfulness for what we have.

Another reflection was of great use to me, and doubtless would be so to any one that should fall into such distress as mine was ; and this was, to compare my present condition with what I at first expected it would be ; nay, with what it would certainly have been if the good providence of God had not wonderfully ordered the ship to be cast up near to the shore where I not only could come at her, but

could bring what I got out of her to the shore, for my relief and comfort ; without which I had wanted for tools to work, weapons for defence, and gunpowder and shot for getting my food.

I spent whole hours, I may say whole days, in representing to myself, in the most lively colours, how I must have acted if I had got nothing out of the ship. I could not have so much as got any food, except fish and turtles ; and that, as it was long before I found any of them, I must have perished ; that I should have lived, if I had not perished, like a mere savage ; that if I had killed a goat or a fowl by any contrivance, I had no way to flay or open it, or part the flesh from the skin and the bowels, or to cut it up, but must gnaw it with my teeth, and pull it with my claws like a beast.

These reflections made me very sensible of the goodness of Providence to me, and very thankful for my present condition, with all its hardships and misfortunes ; and this part also I cannot but recommend to the reflection of those who are apt, in their misery, to say, Is any affliction like mine ? Let them consider how much worse the cases of some people are, and their case might have been, if Providence had thought fit.

I had another reflection, which assisted me also to comfort my mind with hopes ; and this was, comparing my present condition with what I had deserved, and had therefore reason to expect from the hand of Providence. I had lived a dreadful

life, perfectly destitute of the knowledge and fear of God. I had been well instructed by my father and mother; neither had they been wanting to me, in their endeavours to infuse an early religious awe of God into my mind, a sense of my duty, and what the nature and end of my being required of me. But, alas! falling early into the seafaring life, which, of all lives, is the most destitute of the fear of God, though his terrors are always before them; I say, falling early into the seafaring life, and into seafaring company, all that little sense of religion which I had entertained was laughed out of me by my messmates, by a hardened despising of dangers, and the views of death, which grew habitual to me, by my long absence from all manner of opportunities to converse with anything but what was like myself, or to hear anything that was good, or tending towards it.

So void was I of everything that was good, or of the least sense of what I was, or was to be, that in the greatest deliverances I enjoyed (such as my escape from Sallee, my being taken up by the Portuguese master of a ship, my being planted so well in the Brazils, my receiving the cargo from England, and the like), I never had once the words, "Thank God," so much as on my mind, or in my mouth; nor in the greatest distress had I so much as a thought to pray to him, or so much as to say, "Lord, have mercy upon me!" no, nor to mention the name of God, unless it was to swear by, and blaspheme it.

I had terrible reflections upon my mind for many months, as I have already observed, on account of my wicked and hardened life past ; and when I looked about me, and considered what particular providences had attended me since my coming into this place, and how God had dealt bountifully with me, — had not only punished me less than my iniquity had deserved, but had so plentifully provided for me, — this gave me great hopes that my repentance was accepted, and that God had yet mercies in store for me.

With these reflections I worked my mind up, not only to a resignation to the will of God in the present disposition of my circumstances, but even to a sincere thankfulness for my condition ; and that I, who was yet a living man, ought not to complain, seeing I had not the due punishment of my sins ; that I enjoyed so many mercies which I had no reason to have expected in that place that I ought never more to repine at my condition, but to rejoice, and to give daily thanks for that daily bread which nothing but a crowd of wonders could have brought ; that I ought to consider I had been fed by a miracle, even as great as that of feeding Elijah by ravens, nay, by a long series of miracles ; and that I could hardly have named a place in the uninhabitable part of the world where I could have been cast more to my advantage ; a place where, as I had no society, which was my affliction on one hand, so I found no ravenous beasts, no furious wolves or tigers,

to threaten my life; no venomous or poisonous creatures, which I might feed on to my hurt; no savages, to murder and devour me. In a word, as my life was a life of sorrow one way, so it was a life of mercy another; and I wanted nothing to make it a life of comfort but to make myself sensible of God's goodness to me, and care over me in this condition; and after I did make a just improvement of these things, I went away, and was no more sad.

I had now been here so long that many things which I brought on shore for my help were either quite gone, or very much wasted and near spent.

My ink, as I observed, had been gone for some time, all but a very little, which I eked out with water, a little and a little, till it was so pale it scarce left any appearance of black upon the paper. As long as it lasted, I made use of it to minute down the days of the month on which any remarkable thing happened to me; and, first, by casting up times past, I remember that there was a strange concurrence of days in the various providences which befel me, and which, if I had been superstitiously inclined to observe days as fatal or fortunate, I might have had reason to have looked upon with a great deal of curiosity.

First, I had observed that the same day that I broke away from my father and my friends, and ran away to Hull, in order to go to sea, the same day afterwards I was taken by the Sallee man-of-war, and made a slave; the same day of the year

that I escaped out of the wreck of the ship in Yarmouth Roads, that same day, years afterwards, I made my escape from Sallee in the boat : and the same day of the year I was born on, the 30th of September, that same day I had my life so miraculously saved twenty-six years after, when I was cast on shore in this island ; so that my wicked life and my solitary life began both on one day.

The next thing to my ink being wasted was that of my bread, I mean the biscuit which I brought out of the ship : this I had husbanded to the last degree, allowing myself but one cake of bread a day for above a year ; and yet I was quite without bread for near a year before I got any corn of my own ; and great reason I had to be thankful that I had any at all, the getting it being, as has been already observed, next to miraculous.

My clothes, too, began to decay mightily : as to linen, I had none for a great while, except some chequered shirts which I found in the chests of the other seamen, and which I carefully preserved, because many times I could bear no clothes on but a shirt, and it was a very great help to me that I had, among all the men's clothes of the ship, almost three dozen of shirts. There were also, indeed, several thick watchcoats of the seamen's which were left, but they were too hot to wear ; and though it is true that the weather was so violently hot that there was no need of clothes, yet I could not go quite naked, no, though I had been inclined to it, which I was not, nor could I abide the thought of

it, though I was all alone. The reason why I could not go quite naked was, I could not bear the heat of the sun so well when quite naked as with some clothes on; nay, the very heat frequently blistered my skin: whereas, with a shirt on, the air itself made some motion, and whistling under the shirt was two-fold cooler than without it. No more could I ever bring myself to go out in the heat of the sun without a cap or hat; the heat of the sun beating with such violence, as it does in that place, would give me the headache presently, by darting so directly upon my head, without a cap or hat on, so that I could not bear it; whereas, if I put on my hat, it would presently go away.

Upon these views, I began to consider about putting the few rags I had, which I called clothes, into some order. I had worn out all the waistcoats I had, and my business was now to try if I could not make jackets out of the great watchcoats that I had by me, and with such other materials as I had; so I set to work a-tailoring, or rather, indeed, a-botching, for I made most piteous work of it. However, I made shift to make two or three new waistcoats, which I hoped would serve me a great while: as for breeches, or drawers, I made but a very sorry shift indeed, till afterwards.

I have mentioned that I saved the skins of all the creatures that I killed, I mean four-footed ones; and I had hung them up, stretched out with sticks, in the sun, by which means some of them were so dry and hard that they were fit for little, but

others I found very useful. The first thing I made of these was a great cap for my head, with the hair on the outside, to shoot off the rain; and this I performed so well that after this I made me a suit of clothes wholly of the skins, that is to say, a waistcoat and breeches, open at the knees, and both loose; for they were rather wanting to keep me cool than warm. I must not omit to acknowledge that they were wretchedly made; for if I was a bad carpenter, I was a worse tailor. However, they were such as I made very good shift with; and when I was abroad, if it happened to rain, the hair of my waistcoat and cap being uppermost, I was kept very dry.

After this, I spent a great deal of time and pains to make me an umbrella; I was indeed in great want of one, and had a great mind to make one; I had seen them made in the Brazils, where they were very useful in the great heats which are there; and I felt the heats every jot as great here, and greater too, being nearer the equinox; besides, as I was obliged to be much abroad, it was a most useful thing to me, as well for the rains as the heats. I took a world of pains at it, and was a great while before I could make anything likely to hold; nay, after I thought I had hit the way, I spoiled two or three before I made one to my mind; but at last I made one that answered indifferently well. The main difficulty I found was to make it to let down: I could make it spread, but if it did not let down too, and draw in, it was not portable for me any

way but just over my head, which would not do. However, at last, as I said, I made one to answer, and covered it with skins, the hair upwards, so that it cast off the rain like a pent-house, and kept off the sun so effectually that I could walk out in the hottest of the weather with greater advantage than I could before in the coolest; and when I had no need of it, could close it and carry it under my arm.

Thus I lived mighty comfortably, my mind being entirely composed by resigning to the will of God, and throwing myself wholly upon the disposal of his providence. This made my life better than sociable; for when I began to regret the want of conversation, I would ask myself whether thus conversing mutually with my own thoughts, and, as I hope I may say, with even God himself, by ejaculations, was not better than the utmost enjoyment of human society in the world!

CHAPTER XV

I CANNOT say that after this, for five years, any extraordinary thing happened to me, but I lived on in the same course, in the same posture and place, just as before ; the chief things I was employed in, besides my yearly labour of planting my barley and rice, and curing my raisins, of both which I always kept just enough to have sufficient stock of one year's provision beforehand : I say, besides this yearly labour, and my daily pursuit of going out with my gun, I had one labour, to make me a canoe, which at last I finished ; so that, by digging a canal to it of six feet wide, and four feet deep, I brought it into the creek, almost half a mile. As for the first, which was so vastly big, as I made it without considering beforehand, as I ought to do, how I should be able to launch it, so, never being able to bring it into the water, or bring the water to it, I was obliged to let it lie where it was, as a memorandum to teach me to be wiser the next time : indeed, the next time, though I could not get a tree proper for it, and was in a

place where I could not get the water to it at any less distance than, as I have said, near half a mile, yet as I saw it was practicable at last, I never gave it over; and though I was near two years about it, yet I never grudged my labour, in hopes of having a boat to go off to sea at last.

However, though my little periagua was finished, yet the size of it was not at all answerable to the design which I had in view when I made the first; I mean, of venturing over to the *terra firma*, where it was about forty miles broad; accordingly, the smallness of my boat assisted to put an end to that design, and now I thought no more of it. As I had a boat, my next design was to make a cruise round the island; for, as I had been on the other side in one place, crossing, as I have already described it, over the land, so the discoveries I made in that little journey made me very eager to see other parts of the coast; and now I had a boat, I thought of nothing but sailing round the island.

For this purpose, that I might do everything with discretion and consideration, I fitted up a little mast in my boat, and made a sail to it out of some of the pieces of the ship's sails which lay in store, and of which I had a great stock by me. Having fitted my mast and sail, and tried the boat, I found she would sail very well: then I made little lockers, or boxes, at each end of my boat, to put provisions, necessaries, ammunition, etc., into, to be kept dry, either from rain or the

spray of the sea ; and a little long hollow place I cut in the inside of the boat, where I could lay my gun, making a flap to hang down over it, to keep it dry.

I fixed my umbrella also in a step at the stern, like a mast, to stand over my head, and keep the heat of the sun off me, like an awning ; and thus every now and then took a little voyage upon the sea, but never went far out, nor far from the little creek. At last, being eager to view the circumference of my little kingdom, I resolved upon my cruise ; and accordingly I victualled my ship for the voyage, putting in two dozen of loaves (cakes I should rather call them) of barley bread, an earthen pot full of parched rice (a food I ate a great deal of), a little bottle of rum, half a goat, and powder and shot for killing more, and two large watch-coats, of those which, as I mentioned before, I had saved out of the seamen's chests ; these I took, one to lie upon, and the other to cover me in the night.

It was the sixth of November, in the sixth year of my reign, or my captivity, which you please, that I set out on this voyage, and I found it much longer than I expected ; for though the island itself was not very large, yet when I came to the east side of it, I found a great ledge of rocks lie out about two leagues into the sea, some above water, some under it ; and beyond that a shoal of sand, lying dry half a league more, so that I was obliged to go a great way out to sea to double the point.

When first I discovered them, I was going to give over my enterprise, and come back again, not knowing how far it might oblige me to go out to sea, and, above all, doubting how I should get back again ; so I came to an anchor ; for I had made me a kind of anchor with a piece of broken grappling which I got out of the ship.

Having secured my boat, I took my gun and went on shore, climbing up on a hill which seemed to overlook that point, where I saw the full extent of it, and resolved to venture.

In my viewing the sea from that hill where I stood, I perceived a strong, and indeed a most furious current, which ran to the east, and even came close to the point ; and I took the more notice of it because I saw there might be some danger that, when I came into it, I might be carried out to sea by the strength of it, and not be able to make the island again ; and, indeed, had I not got first upon this hill I believe it would have been so ; for there was the same current on the other side of the island, only that it set off at a farther distance, and I saw there was a strong eddy under the shore ; so I had nothing to do but to get out of the first current, and I should presently be in an eddy.

I lay here, however, two days, because the wind blowing pretty fresh at ESE., and that being just contrary to the said current, made a great breach of the sea upon the point ; so that it was not safe for me to keep too close to the shore, for

the breach, nor to go too far off, because of the stream.

The third day, in the morning, the wind having abated overnight, the sea was calm, and I ventured; but I am a warning-piece again to all rash and ignorant pilots: for no sooner was I come to the point, when I was not even my boat's length from the shore, but I found myself in a great depth of water, and a current like the sluice of a mill; it carried my boat along with it with such violence that all I could do could not keep her so much as on the edge of it; but I found it hurried me farther and farther out from the eddy, which was on my left hand. There was no wind stirring to help me, and all I could do with my paddles signified nothing; and now I began to give myself over for lost; for as the current was on both sides of the island, I knew in a few leagues' distance they must join again, and then I was irrecoverably gone; nor did I see any possibility of avoiding it; so that I had no prospect before me but of perishing, not by the sea, for that was calm enough, but of starving for hunger. I had indeed found a tortoise on the shore, as big almost as I could lift, and had tossed it into the boat; and I had a great jar of fresh water, that is to say, one of my earthen pots; but what was all this to being driven into the vast ocean, where, to be sure, there was no shore, no main land or island, for a thousand leagues at least?

And now I saw how easy it was for the providence of God to make even the most miserable

condition of mankind worse. Now I looked back upon my desolate, solitary island as the most pleasant place in the world ; and all the happiness my heart could wish for was to be but there again. I stretched out my hands to it, with eager wishes : " O happy desert ! " said I, " I shall never see thee more. O miserable creature ! whither am I going ! " Then I reproached myself with my unthankful temper, and how I had repined at my solitary condition ; and now what would I give to be on shore there again ! Thus we never see the true state of our condition till it is illustrated to us by its contraries, nor know how to value what we enjoy but by the want of it. It is scarce possible to imagine the consternation I was now in, being driven from my beloved island (for so it appeared to me now to be) into the wide ocean, almost two leagues, and in the utmost despair of ever recovering it again. However, I worked hard, till indeed my strength was almost exhausted, and kept my boat as much to the northward, that is, towards the side of the current which the eddy lay on, as possibly I could ; when about noon, as the sun passed the meridian, I thought I felt a little breeze of wind in my face, springing up from SSE. This cheered my heart a little, and especially when, in about half an hour more, it blew a pretty gentle gale. By this time I was got at a frightful distance from the island, and had the least cloudy or hazy weather intervened, I had been undone another way too ; for I had no compass on board, and should never

have known how to have steered towards the island if I had but once lost sight of it ; but the weather continuing clear, I applied myself to get up my mast again, and spread my sail, standing away to the north as much as possible, to get out of the current.

Just as I had set my mast and sail, and the boat began to stretch away, I saw even by the clearness of the water some alteration of the current was near ; for where the current was so strong, the water was foul ; but perceiving the water clear, I found the current abate ; and presently I found to the east, at about half a mile, a breach of the sea upon some rocks : these rocks I found caused the current to part again, and as the main stress of it ran away more southerly, leaving the rocks to the north-east, so the other returned by the repulse of the rocks, and made a strong eddy, which ran back again to the north-west, with a very sharp stream.

They who know what it is to have a reprieve brought to them upon the ladder, or to be rescued from thieves just going to murder them, or who have been in such-like extremities, may guess what my present surprise of joy was, and how gladly I put my boat into the stream of this eddy ; and the wind also freshening, how gladly I spread my sail to it, running cheerfully before the wind, and with a strong tide or eddy under foot.

This eddy carried me about a league in my way back again, directly towards the island, but about two leagues more to the northward than the cur-

rent which carried me away at first : so that, when I came near the island, I found myself open to the northern shore of it, that is to say, the other end of the island, opposite to that which I went out from.

When I had made something more than a league of way by the help of this current or eddy, I found it was spent, and served me no farther. However, I found that being between two great currents, viz., that on the south side, which had hurried me away, and that on the north, which lay about a league on the other side ; I say, between these two, in the wake of the island, I found the water at least still, and running no way ; and having still a breeze of wind fair for me, I kept on steering directly for the island, though not making such fresh way as I did before.

About four o'clock in the evening, being then within a league of the island, I found the point of the rocks which occasioned this disaster, stretching out, as is described before, to the southward, and, casting off the current more southerly, had, of course, made another eddy to the north ; and this I found very strong, but not directly setting the way my course lay, which was due west, but almost full north. However, having a fresh gale, I stretched across this eddy, slanting north-west ; and, in about an hour, came within about a mile of the shore, where, it being smooth water, I soon got to land.

When I was on shore, I fell on my knees, and

gave God thanks for my deliverance, resolving to lay aside all thoughts of my deliverance by my boat ; and refreshing myself with such things as I had, I brought my boat close to the shore, in a little cove that I had spied under some trees, and laid me down to sleep, being quite spent with the labour and fatigue of the voyage.

I was now at a great loss which way to get home with my boat ; I had run so much hazard, and knew too much of the case, to think of attempting it by the way I went out ; and what might be at the other side (I mean the west side) I knew not, nor had I any mind to run any more ventures ; so I only resolved in the morning to make my way westward along the shore, and see if there was no creek where I might lay up my frigate in safety, so as to have her again if I wanted her. In about three miles, or thereabout, coasting the shore, I came to a very good inlet or bay, about a mile over, which narrowed till it came to a very little rivulet or brook, where I found a very convenient harbour for my boat, and where she lay as if she had been in a little dock made on purpose for her. Here I put in, and having stowed my boat very safe, I went on shore, to look about me and see where I was.

I soon found I had but a little passed by the place where I had been before, when I travelled on foot to that shore ; so taking nothing out of my boat but my gun and umbrella, for it was exceeding hot, I began my march. The way was com-

fortable enough after such a voyage as I had been upon, and I reached my old bower in the evening, where I found everything standing as I had left it; for I always kept it in good order, being, as I said before, my country-house.

I got over the fence, and laid me down in the shade to rest my limbs, for I was very weary, and fell asleep: but judge you, if you can that read my story, what a surprise I must be in when I was awaked out of my sleep by a voice, calling me by my name several times, "Robin, Robin, Robin Crusoe; poor Robin Crusoe! Where are you, Robin Crusoe? Where are you? Where have you been?"

I was so dead asleep at first, being fatigued with rowing, or paddling, as it is called, the first part of the day, and with walking the latter part, that I did not wake thoroughly; but, dozing between sleeping and waking, thought I dreamed that somebody spoke to me; but as the voice continued to repeat "Robin Crusoe, Robin Crusoe," at last I began to wake more perfectly, and was at first dreadfully frightened, and started up in the utmost consternation; but no sooner were my eyes open but I saw my Poll sitting on the top of the hedge; and immediately knew it was he that spoke to me: for just in such bemoaning language I had used to talk to him, and teach him; and he had learned it so perfectly that he would sit upon my finger, and lay his bill close to my face, and cry, "Poor Robin Crusoe; Where are you? Where have you been?"

How came you here?" and such things as I had taught him.

However, even though I knew it was the parrot, and that indeed it could be nobody else, it was a good while before I could compose myself. First, I was amazed how the creature got thither; and then how he should just keep about the place, and nowhere else: but as I was well satisfied it could be nobody but honest Poll, I got over it; and holding out my hand, and calling him by his name, Poll, the sociable creature came to me, and sat upon my thumb, as he used to do, and continued talking to me, "Poor Robin Crusoe!" and how did I come here? and where had I been? just as if he had been overjoyed to see me again; and so I carried him home along with me.

I now had enough of rambling to sea for some time, and had enough to do for many days to sit still, and to reflect upon the danger I had been in. I would have been very glad to have had my boat again on my side of the island; but I knew not how it was practicable to get it about. As to the east side of the island, which I had gone round, I knew well enough there was no venturing that way; my very heart would shrink, and my very blood run chill, but to think of it; and as to the other side of the island, I did not know how it might be there; but supposing the current ran with the same force against the shore at the east as it passed by it on the other, I might run the same risk of being driven down the stream, and carried by the

island, as I had been before of being carried away from it; so, with these thoughts, I contented myself to be without any boat, though it had been the product of so many months' labour to make it, and of so many more to get it into the sea.

In this government of my temper I remained near a year, lived a very sedate, retired life, as you may well suppose; and my thoughts being very much composed, as to my condition, and fully comforted in resigning myself to the dispositions of Providence, I thought I lived really very happily in all things, except that of society.

I improved myself in this time in all the mechanic exercises which my necessities put me upon applying myself to; and I believe I could, upon occasion, have made a very good carpenter, especially considering how few tools I had.

Besides this, I arrived at an unexpected perfection in my earthenware, and contrived well enough to make them with a wheel, which I found infinitely easier and better; because I made things round and shapeable, which before were filthy things indeed to look upon. But I think I was never more vain of my own performance, or more joyful for anything I found out, than for my being able to make a tobacco-pipe; and though it was a very ugly clumsy thing when it was done, and only burned red, like other earthenware, yet as it was hard and firm, and would draw the smoke, I was exceedingly comforted with it; for I had been always used to smoke; and there were pipes in the ship; but I for-

got them at first, not thinking that there was tobacco in the island; and afterwards, when I searched the ship again, I could not come at any pipes at all.

In my wicker-ware also I improved much, and made abundance of necessary baskets, as well as my invention showed me; though not very handsome, yet they were such as were very handy and convenient for my laying things up in, or fetching things home. For example, if I killed a goat abroad, I could hang it up in a tree, flay it, dress it, and cut it in pieces, and bring it home in a basket; and the like by a turtle; I could cut it up, take out the eggs, and a piece or two of the flesh, which was enough for me, and bring them home in a basket, and leave the rest behind me. Also large deep baskets were the receivers of my corn, which I always rubbed out as soon as it was dry and cured, and kept it in great baskets.

I began now to perceive my powder abated considerably; this was a want which it was impossible for me to supply, and I began seriously to consider what I must do when I should have no more powder, that is to say, how I should do to kill any goats. I had, as is observed, in the third year of my being here, kept a young kid, and bred her up tame, and I was in hopes of getting a he-goat: but I could not by any means bring it to pass till my kid grew an old goat; and as I could never find in my heart to kill her, she died at last of mere age.

CHAPTER XVI

BEING now in the eleventh year of my residence, and as I have said, my ammunition growing low, I set myself to study some art to trap and snare the goats, to see whether I could not catch some of them alive; and particularly, I wanted a she-goat great with young. For this purpose, I made snares to hamper them; and I do believe they were more than once taken in them, but my tackle was not good, for I had no wire, and I always found them broken, and my bait devoured. At length I resolved to try a pitfall: so I dug several large pits in the earth, in places where I had observed the goats used to feed, and over those pits I placed hurdles, of my own making too, with a great weight upon them; and several times I put ears of barley and dry rice, without setting the trap; and I could easily perceive that the goats had gone in and eaten up the corn, for I could see the marks of their feet. At length I set three traps in one night, and going the next morning, I found them all standing. and yet the bait eaten and gone. This was very dis-

couraging ; however, I altered my traps ; and, not to trouble you with particulars, going one morning to see my traps, I found in one of them a large old he-goat, and in one of the others three kids, a male and two females.

As to the old one, I knew not what to do with him ; he was so fierce I durst not go into the pit to him ; that is to say, to go about to bring him away alive, which was what I wanted. I could have killed him, but that was not my business, nor would it answer my end ; so I even let him out, and he ran away, as if he had been frightened out of his wits. But I had forgot then, what I had learned afterwards, that hunger will tame a lion. If I had let him stay there three or four days without food, and then have carried him some water to drink, and then a little corn, he would have been as tame as one of the kids ; for they are mighty sagacious, tractable creatures, where they are well used. However, for the present I let him go, knowing no better at that time : then I went to the three kids, and taking them one by one, I tied them with strings together, and with some difficulty brought them all home.

It was a good while before they would feed ; but throwing them some sweet corn, it tempted them, and they began to be tame. And now I found that if I expected to supply myself with goat's flesh when I had no powder or shot left, breeding some up tame was my only way ; when, perhaps, I might have them about my house like a flock of sheep.

But then it occurred to me that I must keep the tame from the wild, or else they would always run wild when they grew up ; and the only way for this was to have some enclosed piece of ground, well fenced, either with hedge or pale, to keep them in so effectually that those within might not break out or those without break in.

This was a great undertaking for one pair of hands ; yet as I saw there was an absolute necessity for doing it, my first work was to find out a proper piece of ground, where there was likely to be herbage for them to eat, water for them to drink, and cover to keep them from the sun.

Those who understand such enclosures will think I had very little contrivance when I pitched upon a place very proper for all these (being a plain open piece of meadow land, or savannah, as our people call it in the western colonies) which had two or three little drills of fresh water in it, and at one end was very woody ; I say, they will smile at my forecast when I shall tell them I began my enclosing this piece of ground in such a manner that my hedge or pale must have been at least two miles about. Nor was the madness of it so great as to the compass, for if it was ten miles about, I was like to have time enough to do it in ; but I did not consider that my goats would be as wild in so much compass as if they had had the whole island, and I should have so much room to chase them in that I should never catch them.

My hedge was begun and carried on, I believe,

about fifty yards, when this thought occurred to me; so I presently stopped short, and, for the first beginning, I resolved to enclose a piece of about one hundred and fifty yards in length, and one hundred yards in breadth: which, as it would maintain as many as I should have in any reasonable time, so, as my stock increased, I could add more ground to my enclosure.

This was acting with some prudence, and I went to work with courage. I was about three months hedging in the first piece; and, till I had done it, I tethered the three kids in the best part of it, and used them to feed as near me as possible, to make them familiar; and very often I would go and carry them some ears of barley, or a handful of rice, and feed them out of my hand: so that after my enclosure was finished, and I let them loose, they would follow me up and down, bleating after me for a handful of corn.

This answered my end: and in about a year and a half I had a flock of about twelve goats, kids and all; and in two years more, I had three-and-forty, beside several that I took and killed for my food. After that I enclosed five several pieces of ground to feed them in, with little pens to drive them into, to take them as I wanted, and gates out of one piece of ground into another.

But this was not all; for now I not only had goat's flesh to feed on when I pleased, but milk too; a thing which, indeed, in the beginning, I did not so much as think of, and which, when it came

into my thoughts, was really an agreeable surprise; for now I set up my dairy, and had sometimes a gallon or two of milk in a day. And as Nature, who gives supplies of food to every creature, dictates even naturally how to make use of it, so I, that had never milked a cow, much less a goat, or seen butter or cheese made, only when I was a boy, after a great many essays and miscarriages, made me both butter and cheese at last, and also salt (though I found it partly made to my hand by the heat of the sun upon some of the rocks of the sea), and never wanted it afterwards. How mercifully can our Creator treat his creatures, even in those conditions in which they seemed to be overwhelmed in destruction! How can he sweeten the bitterest providences, and give us cause to praise him for dungeons and prisons! What a table was here spread for me in a wilderness, where I saw nothing, at first, but to perish for hunger!

It would have made a stoic smile to have seen me and my little family sit down to dinner. There was my majesty, the prince and lord of the whole island; I had the lives of all my subjects at my absolute command; I could hang, draw, give liberty, and take it away; and no rebels among all my subjects.

Then to see how like a king I dined too, all alone, attended by my servants: Poll, as if he had been my favourite, was the only person permitted to talk to me. My dog, who was now grown very old and crazy, and had found no species to multi-

ply his kind upon, sat always at my right hand; and two cats, one on one side of the table, and one on the other, expecting now and then a bit from my hand, as a mark of special favour.

But these were not the two cats which I brought on shore at first, for they were both of them dead, and had been interred near my habitation by my own hand; but one of them having multiplied by I know not what kind of creature, these were two which I had preserved tame; whereas the rest ran wild in the woods, and became indeed troublesome to me at last; for they would often come into my house, and plunder me too, till at last I was obliged to shoot them, and did kill a great many; at length they left me. — With this attendance, and in this plentiful manner, I lived; neither could I be said to want anything but society; and of that, some time after this, I was like to have too much.

I was something impatient, as I have observed, to have the use of my boat, though very loath to run any more hazards; and therefore sometimes I sat contriving ways to get her about the island, and at other times I sat myself down contented enough without her. But I had a strange uneasiness in my mind to go down to the point of the island, where, as I have said, in my last ramble, I went up the hill to see how the shore lay, and how the current set, that I might see what I had to do: this inclination increased upon me every day, and at length I resolved to travel thither by land, following the edge of the shore. I did so; but had any one in England

been to meet such a man as I was, it must either have frightened him, or raised a great deal of laughter; and as I frequently stood still to look at myself, I could not but smile at the notion of my travelling through Yorkshire with such an equipage, and in such a dress. Be pleased to take a sketch of my figure, as follows.

I had a great high shapeless cap, made of a goat's skin, with a flap hanging down behind, as well to keep the sun from me as to shoot the rain off from running into my neck; nothing being so hurtful in these climates as the rain upon the flesh, under the clothes.

I had a short jacket of goat's skin, the skirts coming down to about the middle of the thighs, and a pair of open-kneed breeches of the same; the breeches were made of the skin of an old he-goat, whose hair hung down such a length on either side that, like pantaloons, it reached to the middle of my legs: stockings and shoes I had none, but had made me a pair of somethings, I scarce know what to call them, like buskins, to flap over my legs, and lace on either side like spatterdashes, but of a most barbarous shape, as indeed were all the rest of my clothes.

I had on a broad belt of goat's skin dried, which I drew together with two thongs of the same, instead of buckles; and in a kind of a frog on either side of this, instead of a sword and dagger, hung a little saw and a hatchet; one on one side, and one on the other. I had another belt, not so broad, and

PLATE VI

fastened in the same manner, which hung over my shoulder; and at the end of it, under my left arm, hung two pouches, both made of goat's skin too: in one of which hung my powder, in the other my shot. At my back I carried my basket, and on my shoulder my gun; and over my head a great clumsy ugly goat's-skin umbrella, but which, after all, was the most necessary thing I had about me, next to my gun. As for my face, the colour of it was really not so mulatto-like as one might expect from a man not at all careful of it, and living within nine or ten degrees of the equinox. My beard I had once suffered to grow till it was about a quarter of a yard long; but as I had both scissars and razors sufficient, I had cut it pretty short, except what grew on my upper lip, which I had trimmed into a large pair of Mahometan whiskers, such as I had seen worn by some Turks at Sallee; for the Moors did not wear such, though the Turks did. Of these mustachios or whiskers, I will not say they were long enough to hang my hat upon them, but they were of a length and shape monstrous enough, and such as, in England, would have passed for frightful.

But all this is by the bye; for, as to my figure, I had so few to observe me that it was of no manner of consequence; so I say no more to that part. In this kind of figure I went my new journey, and was out five or six days. I travelled first along the seashore, directly to the place where I first brought my boat to an anchor, to get upon the rocks; and having no boat now to take care of, I went over the

land, a nearer way, to the same height that I was upon before; when, looking forward to the point of the rocks which lay out, and which I was obliged to double with my boat, as is said above, I was surprised to see the sea all smooth and quiet; no rippling, no motion, no current, any more than in any other places. I was at a strange loss to understand this, and resolved to spend some time in the observing it, to see if nothing from the sets of the tide had occasioned it; but I was presently convinced how it was, viz., that the tide of ebb, setting from the west, and joining with the current of waters from some great river on the shore, must be the occasion of this current; and that according as the wind blew more forcibly from the west or from the north, this current came nearer or went farther from the shore: for waiting thereabouts till evening, I went up to the rock again, and then the tide of ebb being made, I plainly saw the current again as before, only that it ran farther off, being near half a league from the shore; whereas, in my case, it set close upon the shore, and hurried me and my canoe along with it, which, at another time, it would not have done.

This observation convinced me that I had nothing to do but to observe the ebbing and the flowing of the tide, and I might very easily bring my boat about the island again: but when I began to think of putting it in practice, I had such a terror upon my spirits at the remembrance of the danger I had been in that I could not think of it again with any patience; but, on the contrary, I took up

another resolution, which was more safe, though more laborious; and this was that I would build or rather make me another periagua or canoe; and so have one for one side of the island and one for the other.

You are to understand that now I had, as I may call it, two plantations in the island: one, my little fortification or tent with the wall about it, under the rock, with the cave behind me, which, by this time, I had enlarged into several apartments or caves, one within another. One of these, which was the driest and largest, and had a door out beyond my wall or fortification, that is to say, beyond where my wall joined to the rock, was all filled up with the large earthen pots, of which I have given an account, and with fourteen or fifteen great baskets, which would hold five or six bushels each, where I laid up my stores of provision, especially my corn, some in the ear, cut off short from the straw, and the other rubbed out with my hand.

As for my wall, made, as before, with long stakes or piles, these piles grew all like trees, and were by this time grown so big, and spread so very much, that there was not the least appearance, to any one's view, of any habitation behind them. Near this dwelling of mine, but a little farther within the land, and upon lower ground, lay my two pieces of corn land, which I kept duly cultivated and sowed, and which duly yielded me their harvest in its season; and whenever I had occasion for more corn, I had more land adjoining as fit as that.

Besides this, I had my country-seat ; and I had now a tolerable plantation there also : for, first, I had my little bower, as I called it, which I kept in repair ; that is to say, I kept the hedge which encircled it in constantly fitted up to its usual height, the ladder standing always in the inside : I kept the trees, which at first were no more than my stakes, but were now grown very firm and tall, always cut, so that they might spread and grow thick and wild, and make the more agreeable shade, which they did effectually to my mind. In the middle of this I had my tent always standing, being a piece of a sail spread over poles set up for that purpose, and which never wanted any repair or renewing ; and under this I had made me a squab or couch, with the skins of the creatures I had killed, and with other soft things ; and a blanket laid on them, such as belonged to our sea-bedding, which I had saved, and a great watch-coat to cover me ; and here, whenever I had occasion to be absent from my chief seat, I took up my country habitation.

Adjoining to this I had my enclosures for my cattle, that is to say, my goats ; and as I had taken an inconceivable deal of pains to fence and enclose this ground, I was anxious to see it kept so entire, lest the goats should break through, that I never left off, till, with infinite labour, I had stuck the outside of the hedge so full of small stakes, and so near to one another, that it was rather a pale than a hedge, and there was scarce room to put a hand through between them ; which afterwards, when

those stakes grew, as they all did in the next rainy season, made the enclosure strong like a wall, — indeed, stronger than any wall.

This will testify for me that I was not idle, and that I spared no pains to bring to pass whatever appeared necessary for my comfortable support; for I considered the keeping-up a breed of tame creatures thus at my hand would be a living magazine of flesh, milk, butter, and cheese for me as long as I lived in the place, if it were to be forty years; and that keeping them in my reach depended entirely upon my perfecting my enclosures to such a degree that I might be sure of keeping them together; which, by this method, indeed, I so effectually secured that when these little stakes began to grow, I had planted them so very thick that I was forced to pull some of them up again.

In this place also I had my grapes growing, which I principally depended on for my winter store of raisins, and which I never failed to preserve very carefully, as the best and most agreeable dainty of my whole diet; and, indeed, they were not only agreeable, but medicinal, wholesome, nourishing, and refreshing to the last degree.

As this was also about half-way between my other habitation and the place where I had laid up my boat, I generally stayed and lay here in my way thither: for I used frequently to visit my boat; and I kept all things about or belonging to her in very good order. Sometimes I went out in her to divert myself, but no more hazardous voyages

would I go, nor scarce ever above a stone's cast or two from the shore, I was so apprehensive of being hurried out of my knowledge again by the currents or winds, or any other accident. — But now I come to a new scene of my life.
